The Package strictly follows the pattern of CBSE Class 12th Syllabus. 3. It also contains the detailed explanation for each question solved. 4. It will help you strengthen the concepts at class 12th level. 5. This Package will surely Build your confidence to score excellent marks in following Board Exam Paper. Key Feature Free Class 12th Biology 2012 Solved Paper ebook Ideal to understand the exam pattern Will give a clear idea of how to study and what to study for the exam Demonstrating the shortcomings of current policy and legal approaches to access and benefit-sharing (ABS) in the Convention on Biological Diversity (CBD), this book recognizes that genetic resources are widely distributed across countries and that bilateral contracts undermine fairness and equity. The book offers a practical and feasible regulatory alternative to ensure the goal of fairness and equity is effectively and efficiently met. Through a legal analysis that also incorporates historic, economic and sociological perspectives, the book argues that genetic resources are not tangible resources but information. It shows that the existing preference for bilateralism and contracts reflects resistance on the part of many of the stakeholders involved in the CBD process to recognize them as such. ABS issues respond very well to the economics of information, yet as the author explains, these have been either sidelined or overlooked. At a time when the Nagoya Protocol on ABS has renewed interest in feasible policy options, the author provides a constructive and provocative critique. The institutional, policy and regulatory framework constitute "bounded openness" under which fairness and equity emerge.

The role humans play in the field of information technology continues to hold relevance even with the industry's rapid growth. People contribute heavily to the physical, cognitive, and organizational domain of computing, yet there is a lack of exploration into this phenomenon. Humanoid aspects of technology require extensive research in order to avoid marginalization and insufficient data. The Handbook of Research on the Role of Human Factors in IT Project Management is a collection of innovative research on the methods and applications of the task of human characteristics in the design and development of new technology. While highlighting topics including digitalization, risk management, and task analysis, this book is ideally designed for IT professionals, managers, support executives, project managers, managing directors, academicians, researchers, and students seeking current research on the dynamics of human influence in technological projects.

The presented book covers the questions of the UPSC Civil Services Examination of General Studies in Topic-wise solved Papers of the last 28 years (1995-2022) & CSAT (2011-2022). All chapters have been prepared according to the previous year's UPSC Civil Services Prelims Paper-I & II. The book has also been incorporated with Information & Instructions for Civil Services Exams: Plan & Schemes of Examinations, Tips & Strategies along with Time Management for Civil Services Exams Preparation. Explanations are error free as well as precise. Asked questions are arranged in topics such as History of India, Physical, Indian & World Geography, Indian Polity & Governance, Economic & Social Development, General Issues on Environment, Ecology, Bio-diversity & Climate Change, General Science, General Knowledge and Current Events. In CSAT question papers are categorised such as General Comprehension, Interpersonal Skills, Communication & Decision Making, Basic Numeracy, Mental Ability, Analytical & Logical Reasoning and English Language. The book also provides list of 31 Years UPSC Main Essay Questions Papers Section-wise along with 350+ Probable Essay Topics. This book provides an idea of nature of questions asked in the previous year's exams. Practise for your exams on the genuine exam papers and extra revision guidance.

This book will be of interest to a broad readership, regardless of whether they have a background in sociolinguistics, functional linguistics or genre theories. It presents an accessible "meta-language" (i.e. a language for talking about language) that is workable and usable for teachers and researchers from both language and content backgrounds, thus facilitating collaboration across content and language subject panels. Chapters 1 to 3 lay the theoretical foundation of this common meta-language by critically reviewing, systematically presenting and integrating key theoretical resources for teachers and researchers in this field. In turn, Chapters 4 to 7 focus on issues in pedagogy and assessment, and on school-based approaches to LAC and CLIL, drawing on both research studies and the experiences of front-line teachers and school administrators. Chapter 8 provides a critical and reflexive angle on the field by asking difficult questions regarding how LAC and CLIL are often situated in contexts characterized by inequality of access to the linguistic and cultural capitals, where the local languages of the students are usually neglected or viewed unfavourably in relation to the L2 in mainstream society, and where teachers are usually positioned as recipients of knowledge rather than makers of knowledge. In closing, Chapter 9 reviews the state of the art in the field and proposes directions for future inquiry.

Chinese students in the UK have been increasing in number for many years, yet competition from other Western educators and increasing investment in China's own education system has led to concern that UK institutions may soon see a decline in their market share. Dr. Reynolds addresses this issue in Chinese Students in UK Further Education by attempting to understand students' experiences from their perspective. Beginning with an exploration of why these students choose to come and study in the UK, and why they are coming at younger ages, the book goes on to discuss topics such as risk, technology and diversity, in order to understand which factors have the greatest influence on where they choose to study and whether they choose to remain at an institution. Drawing on data from two different education institutions, providers of GCSE A-level programmes for students aged 16–18 years, Dr. Reynolds attempts to understand what these students experience during their studies, how they manage new social relationships, and whether, upon course completion, they achieved the results they desired at the outset. Moreover, the book aims to ascertain whether the students feel, in hindsight, that the decision to risk investing in UK further education was right and what they might communicate about UK study to contacts in China and elsewhere. The book examines what further education institutions do well and where they might improve, to help develop Chinese students' educational experiences. As such, it will be essential reading for academics, researchers and postgraduates in the fields of further education, sociology of education, international and intercultural education and mobility studies.
