Photo Quest - Discovering Your Photographic & Artistic Voice is a sequel to Rick Sammon's internationally best-selling book, **Photo Therapy Motivation and Wisdom - discovering the power of pictures**. This book, Rick's 41st, was written for photographers, as well as for all types of artists - because the lessons and philosophies on these pages are universal to all creatives. Like **Photo Therapy**, **Photo Quest** includes only words of wisdom motivation and inspiration. There are no photographs in this book. Rick says there are two reasons for not including photographs (unlike his 40 other books and 18 online classes that are richly illustrated with hundreds of photographs from his travels around the world): "One, I want you to slow down and read the text carefully; Two, I want you to think about your photography and art when you are reading about an idea or technique - and not be distracted by my colorful images." Rick Sammon has assembled an all-star team of photo and creative mentors for this important book - a team that offers advice and insight on finding one's photographic and artist voice. As Rick says, "You'd be hard pressed to find this much talent between the covers of one photography book." This list of contributors reads like a "Who's Who" in the world of photography in 2020. These pros include Erin Babnick, Martin Baily, Richard Bernabe, Steve Brazill, Jeff Cable, Tony Corbell, Patricia Davidson, Dave DeBaermaeker, Ron Clifford, Ed Cooley, Unmsh Dinda, Frank Doorhof, Piper Mackay, Scott Kelby, Karen Hutton, Don Komarechka, Ian Plant, Trey Ratcliff, Art Wolfe - and more! If you are in search of becoming a more creative photographer, and not just ways of taking better pictures (there is a big difference), you have come to the right place. And if you are thinking about "changing lanes" - changing your career or making creative changes in your life - this book is for you. On these pages you will learn about (in chapter titles of the same name): **Finding Your Superpower and Inner Voice, Your Secret Weapon, Idea to Image, Specializing or Not Specializing, The Rollercoaster Ride of Creatives, The Importance of Your Conversation, Changing Lanes, Creating a Sense of Mystery, Photography & The Death of Reality, Know Your Audience & Build Your Brand** - and more. Each of the 22 chapters in the book ends with a **Mission - an assignment** - that will help you on your personal photo quest, which Rick feels will be one of the most rewarding adventures in your photographic and artistic life. This book is also filled with dozens of inspirational quotes relating to photographs and all artists. Here is one of Rick's favorites: **An artist cannot fail; it is a success to be one.** - Charles Cooley

"Flight is the essence of birdness. I strive to illustrate the beauty and complexity of avian flight." -- Peter Cavanagh **100 Flying Birds: Photographing the Mechanics of Flight** offers a vivid and varied glimpse into the world of birds. A white-tailed eagle plummeting through a Japanese sky, a brown pelican striking a silhouette against an Ecuadorian sunset, an Atlantic puffin carrying its fish dinner above the Scottish coast, or a keel-billed toucan gliding through a Costa Rican jungle canopy; readers will marvel at the splendor of birds in flight while learning the techniques to capture these gravity-defying moments from a world-class nature photographer. For each picture, author and photographer Peter Cavanagh shares his most evocative thoughts: the challenges of the shoot, the beauty of the location, and the curiosities of the species. Bird people will enjoy the bird photographs and facts, travelers will gobble up the tales of distant parts, and photographers will absorb the technical details. For instance, readers might be surprised to see that a very slow shutter speed can freeze the motion of hummingbird wings. Peter Cavanagh has collected 100 beautiful photos spanning a wide range of species. The subjects of each of the 11 chapters are: **Eagles Hummingbirds Gulls and Terns Small Waterbirds Large Waterbirds Ducks, Geese and Swans Raptors Condors and Corvids Cranes Songbirds Favorites**

This beautiful book accompanies a new photographic competition celebrating some of the best bird photography of the year. The **Bird Photographer of the Year** competition celebrates the artistry of bird photography, and this large-format book is lavishly illustrated to reflect this. A celebration of avian beauty and diversity, it is a tribute to both the dedication and passion of the photographers as well as a reflection of the quality of today's modern digital imaging systems. The book includes the winning and short-listed images from the competition, now in its fifth year, showcasing some of the finest bird photography from around the world. A proportion of the profits from the book goes directly to the BTO to support their conservation work. The advent of digital technology has revolutionised photography in recent years, and the book brings to life some of the most stunning bird photography currently on offer. It features a vast variety of photographs by hardened pros, keen amateurs and hobbyists alike, reflecting the huge diversity of bird enthusiasts and nature lovers which is so important in ensuring their conservation and survival.

As humans, we are drawn to predators like no other group of animals. They are the epitome of form and function, and have a level of perfection that we revere. In 2009, wildlife expert, conservationist and photographer David Plummer was diagnosed with Parkinson's disease. Rather than let it defeat him, he was galvanised to grab life by the horns and achieve the perfect wildlife shot. Over the

next seven years, he did much more than that. The result is this breathtaking collection of over 200 of his best and favourite photographs of exotic and wild animals in their natural habitats. To capture them, David travelled to some of the most remote and stunning locations across the world, from Africa to India to the Galápagos Islands and back to his native England. 7 Years of Camera Shake showcases seven years of immersive and illuminating photography: of predators on the prowl, of prey in the clutches of death, of the inexplicable synchronisation of nature, of the beautiful relationship between mother and child, and much, much more. Plummer's work has been featured in wildlife publications and national and international press, and now the work he has produced since his diagnosis is showcased here, accompanied by his thoughts and anecdotes on how he achieved each perfect shot.
