**WordPress is a Content Management System or CMS program built in PHP. CMSs are web applications that, as the name suggests, manage website content such as blog posts, images, and even videos. To make it simple, it is like a big website template that has been premade, for you not to bother creating or writing lines of code. All you need to do are to customize it with the help of intuitive graphical interfaces and tools then input the content that you want to display on your website. If WordPress is just one of the many CMSs out**

**there in the web, why choose WordPress instead of the other CMSs? Well, few of the biggest factors why many people prefer WordPress are simplicity, wide array of customization, popularity, and the community. The simplicity of WordPress is ideal for those who have little idea on how the web works and have little knowledge when it comes to web development. With its user friendliness, almost everybody can master using WordPress in no time. However, it does not mean that WordPress is only ideal for beginners. WordPress has advanced features and customizations that even**
