*Kadence Mulligan's star was rising. She and her best friend, Lauren DeSanto, watched their songs go viral on YouTube, then she launched a solo career when a nasty throat infection paralyzed Lauren's vocal chords. Everyone knows Lauren and Kadence had a major falling-out over Kady's boyfriend. But Lauren knows how deceptive Kadence could be sometimes. And nobody believes Lauren when she claims she had nothing to do with the disappearance. Or the blood evidence... As the town and local media condemns Lauren, she realizes the only way to clear her name is to discover the truth herself. Lauren slowly unravels the twisted life of Kadence Mulligan and sees that there was more to her than she ever knew. But will she realize she's unknowingly playing a part in an elaborate game to cover up a crime before it's too late?*

*The true story of two mass-casualty incidents that occurred within days of each other at a US Air Force base. Using the words of the people who experienced the tragedies, the book provides in-depth look at the before, during and after of a preventable active-shooter incident and an avoidable fatal plane crash. The base psychiatrist knew the airman was dangerous. "This is the kind of patient who ... one day ... he's going to come back and kill you." Aircrews knew the rogue pilot was dangerous. "We predicted the worst air-show disaster in history when we found out that he was gonna fly." Written by Andy Brown, the man who ended the Killing spree, the result of more than seven years of research. Brown "masterfully weaves" the two stories together in a powerful narrative. He also reveals the preparations he made that enabled him to end a pistol-versus-rifle gunfight with a 70yd shot from his handgun. Part true crime, part law-enforcement biography memoir and part military history. Warnings Unheeded is presented in an objective style that shows what can happen when authorities become complacent, when the precursors of violence are ignored and the lessons from history are forgotten.*

*A journalistic look at the shooting at Marjory Stoneman Douglas High School in Parkland and the fight for gun control—as told by the student reporters for the school's newspaper and TV station. This timely and media-driven approach to the Parkland shooting, as reported by teens in the journalism and broadcasting programs and in the Marjory Stoneman Douglas newspaper, is an inside look at that tragic day and the events that followed that only they could tell. It showcases how the teens have become media savvy and the skills they have learned and honed—harnessing social media, speaking to the press, and writing effective op-eds. Students will also share specific insight into what it has been like being approached by the press and how that has informed the way they interview their own subjects. "One thing is clear: The Parkland students are smart, media savvy, and here to fight for common sense gun laws." --Hello Giggles*

*"I never believed in love. I am happy the way my life is right now." Jake Ryan did not look for love nor did he need love in his life until he met Rose. Rose Thompson, an independent woman who had been burned by love once but still wishes to be in love. What will happen when two polar opposites meet? The only way to know what will happen in future is to let it unfold.*

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear in the precursors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Cliff Richard has been Britain's longest surviving and most consistent hit music maker. Starting his career as a rock 'n' roll threat to decent, upstanding citizens, he is now a friend to Royalty and prime ministers, a Knight, and a holder of the OBE. This book tells his story chronologically, through the voices of his friends, family, and colleagues including songwriters, film directors, managers, and agents—like listening in on a dinner party attended by most of the key people in his career. The stories reveal Cliff as seen by those closest to him and, in contrast to the many official publications, this book does not just include the flattering stories. The author's probing questions have elicited extraordinary memories and observations, previously unheard by the public. Heavily illustrated with rare and interesting photographs of Cliff at work and play, this unique oral history will stand as a lasting testament to one of the most glorious careers in British show business.

The sequel to the acclaimed novel Shinju again features detective Sano Ichiro as he trails a serial killer stalking feudal Japan. In 1689, an all-powerful shogun controls the state, surrounded by bitter machinations and political intrigues. When an ancient tradition suddenly and brutally reappears, Sano risks everything to bring the killer to justice. "Bundori is terrific. . . . So good you won't want to put it down, even to get off a plane. . . . [Laura Joh] Rowland hits her stride as a writer who can deal equally well with the pacing of plot and the nuances of character development. . . . Rowland clearly knows how to build suspense and action, a talent that she demonstrates with great skill."—New Orleans Times-Picayune "Bundori is one of those mysteries in which the itch to find out whodunit recedes before the pleasure of prowling through a different world."—Washington Post Book World "Sano may carry a sword and wear a kimono, but you'll immediately recognize him as an ancestor of Philip Marlowe or Sam Spade."—Denver Post "A colorful pictorial story that conveys . . . excitement and . . . danger."—The New York Times Book Review

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

A guide to coping with the medical, self-care, and emotional issues of spinal bifida, with an emphasis on becoming as independent as possible. A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

*In the backwoods of Mississippi, a land of honeysuckle and grapevine, Jewel and her husband, Leston, are truly blessed; they have five fine children. When Brenda Kay is born in 1943, Jewel gives thanks for a healthy baby, last-born and most welcome. Jewel is the story of how quickly a life can change; how, like lightning, an unforeseen event can set us on a course without reason or compass. In this story of a woman's devotion to the child who is both her burden and God's singular way of smiling on her, Bret Lott has created a mother-daughter relationship of matchless intensity and beauty, and one of the finest, most indomitable heroines in contemporary American fiction.*

*Based on Mr Hudson's identity, the book is featuring destinations for gays, but not necessarily gay destinations. It is about travelling in style for everyone who is looking for something differnt and special - no matter if men or women, travelling solo or as a couple. Mr Hudson Explores shows that every part of a trip is an incredible experience. The core content of the book will consist of 20 cities in the Northern Hemisphere and showcases the very best the destination has to offer. Each guide will give a general introduction to the city and, if applicable, its relevance for the gay community. It showcases various locations on culture and art, the most inspiring museum to visit, traditional and upcoming food places, best shopping experiences, music and nightlife: Where to go out, which bars do have the best drinks, and clubs you can have the most fun at the city's best parties and concerts. Depending on the location, day trips and activities can be included. Luxury accommodations and places to stay complete the range. The book will not just give descriptions of the places but also background information, telling the story of the owner, history or anecdotes.*

*Learn all about dogs in a child-friendly format that combines engaging photography with clear text in bite-sized chunks that will encourage and inform even reluctant readers. DK's Pocket Genius books feature distinct spread styles that add interest and variety to the books, from catalogs and thematic spreads to exciting full-page splash images. The convenient and economical format is ideal for children to use at home or school. Punchy bullet-point facts provide at-a-glance information, while size, shape, or locator icons are immediately recognizable references that children can easily understand. Additional genius gem facts provide extra wows. Fact files round off the book with fascinating facts such as record breakers and timelines, as well as a glossary.*

Energy, Entropy, Atoms, and Quantum Mechanics form the very foundation of our universe. But how do they govern the world we live in? What was the difficult path to their discovery? Who were the key players that struggled to shape our current understanding? "The Cosmic Machine" takes you from the earliest scientific inquiries in human history on an exciting journey in search of the answers to these questions. In telling this fascinating story of science, the author Scott Bembenek masterfully guides you through the wonderment of how scientific discoveries (and the key players of those discoveries) shaped the world as we know it today. With its unique blend of science, history, and biographies, "The Cosmic Machine" provides an easily accessible account without sacrificing the actual science itself. Not only will this book engage, enlighten, and entertain you, it will inspire your passion and curiosity for the world around us.

Fourteen-year-old Roonie loves hip-hop almost as much as she loves her grandmother. She cannot wait to compete in her school's dance competition. But as her grandmother's health deteriorates, Roonie becomes more and more reluctant to visit her in the care home. These feelings of guilt and frustration cause Roonie to mess things up with her hip-hop dance partner and best friend, Kira. But while doing some volunteer hours in the hospital geriatric ward, Roonie meets an active senior recovering from a bad fall. Their shared love of dance and the woman's zest for life help Roonie face her fears, make amends with Kira and reconnect with Gram before it's too late.

Suggs is one of pop music's most enduring and likeable figures. Written with the assured style and wit of a natural raconteur, this hugely entertaining and insightful autobiography takes you from his colorful early life on a North London council estate, through the heady early days of Punk and 2-Tone, to the eighties, where Madness became the biggest selling singles band of the decade. Along the way he tells you what it's like to grow up in sixties Soho, go globetrotting with your best mates, to make a dead pigeon fly and cause an earthquake in Finsbury Park.
