provides engineering and physics students and other users with an operational knowledge and firm grasp of electromagnetic fundamentals aimed toward practical engineering applications, by teaching them "hands on" electromagnetics through a unique and comprehensive collection of MATLAB computer exercises and projects. Essentially, the book unifies two themes: it presents and explains electromagnetics using MATLAB on one side, and develops and discusses MATLAB for electromagnetics on the other. MATLAB codes described (and listed) in TUTORIALS or proposed in other exercises provide prolonged benefits of learning. By running codes; generating results, figures, and diagrams;

"This practical and helpful volume details how clinicians can work through various and common challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-

These include patient hostility, the abrupt termination of therapy, treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. A SECRET SORROW

An oracular Surrealism: the debut presentation of Leonora Carrington's recently discovered tarot deck The British-born artist Leonora Carrington is one of the more fascinating figures to emerge from the Surrealist movement. As both a writer and painter, she was championed early by Andr é Breton and joined the exiled Surrealists in New York, before settling in Mexico in 1943. The magical themes of

Carrington's otherworldly paintings are well known, but the recent discovery of a suite of tarot designs she created for the Major Arcana was a revelation for scholars and fans of Carrington alike. Drawing inspiration from the Tarot of Marseille and the popular Waite-Smith deck, Carrington brings her own approach and style to this timeless subject, creating a series of iconic images. Executed on thick board, brightly colored and squarish in format, Carrington's Major Arcana shines with gold and silver leaf, exploring tarot themes through what Gabriel Weisz Carrington describes as a "surrealist object." This tantalizing discovery, made by the curator Tere Arcq and scholar Susan Aberth, has placed greater emphasis upon the role of the tarot in Carrington's creative life and has led to fresh research in this area. Tarot of Leonora Carrington is the first book dedicated to this important aspect of the artist's work. It includes a full-size facsimile of her newly discovered Major Arcana; an introduction from her son, Gabriel Weisz Carrington; and a richly illustrated essay from Tere Arcq and Susan Aberth that offers new insights--exploring the significance of tarot imagery within Carrington's wider work, her many inspirations and mysterious occult sources. Leonora Carrington (1917-2011) was born in Lancashire, England. In 1936, she saw Max Ernst's work at the International Surrealist Exhibition in London, and met the artist the following year. They became a couple almost immediately. When the outbreak of World War II separated them, Carrington fled to Spain, then Lisbon, where she married Renato Leduc, a Mexican diplomat, and

This book offers a transdisciplinary perspective on the question of how political legitimacy is constructed in the increasingly contested postnational setting of the European Union. Drawing on the example of the controversy about the EU constitution and the use of 'EU constitution speak' in commentaries published by Polish and French broadsheets, it reveals the transformation that constructions of political authority and association undergo when they are being transposed from the discourse field of multilateral negotiation to that of national news media. Through an original combination of the linguistic theory of discourse developed in

Critical Discourse Analysis, Bourdieu's field theory and notion of symbolic power, and political thought on polity-building, it develops a framework for the discourse study of legitimation and Europeanisation, and proposes applications beyond the case studies in the book. To students of European integration, it demonstrates the potential these concepts have for unravelling the implicit practices of postnational polity building. Discourse researchers, on the other hand, will discover how detailed text analyses gain significance in debates related to the macro level of political organisation when guided by sociological and political theory.
