In this fast-paced suspense-thriller, a streetwise police chief, a struggling triage nurse and a lovesick government operative try to unravel a twisted mystery involving blackmail, murder and terrorism. A group of schemers and their homicidal cohorts converge in Philadelphia with different but intertwined agendas. Their plans all coincide with the opening of The Pharaoh's Consort exhibit at the Independence Museum of Art and Science. Investigating a break-in at the museum, the newly appointed police chief's interest turns to the mysterious people and occurrences swirling around the exhibit. The beautiful

curator sets her sights on the police chief, while celebrating the demise of her terrorist lover. An emergency room nurse is drawn into the schemers' world. Tempted by a dying patient's last meal, she becomes the target of a monstrous ex-soldier and a chemist with a penchant for poison. In the volatile mix, a bespectacled government operative suspects he might be working for the wrong side. The hard-boiled action moves from glittery high-society parties to the bleakest corners of the city and violently proves that some gatherings, no matter how enticing, should be avoided.

This book offers a transdisciplinary perspective on the question of how political legitimacy is constructed in the increasingly contested postnational setting of the European Union. Drawing on the example of the controversy about the EU constitution

and the use of 'EU constitution speak' in commentaries published by Polish and French broadsheets, it reveals the transformation that constructions of political authority and association undergo when they are being transposed from the discourse field of multilateral negotiation to that of national news media. Through an original combination of the linguistic theory of discourse developed in Critical Discourse Analysis, Bourdieu's field theory and notion of symbolic power, and political thought on polity-building, it develops a framework for the discourse study of legitimation and Europeanisation, and proposes applications beyond the case studies in the book. To students of European integration, it demonstrates the potential these concepts have for unravelling the implicit practices of postnational polity building. Discourse researchers, on the other

Numerical procedures based on the 2-D and 3-D full potential equations and the 2-D Navier-Stokes equations were developed to study the effects of leading and trailing edge flap motions on the aerodynamics of parallel airfoil-vortex interactions and on the aerodynamics and acoustics of the more general self-generated rotor blade vortex interactions (BVI). For subcritical interactions, the 2-D results indicate that the trailing edge flap

can be used to alleviate the impulsive loads experienced by the airfoil. For supercritical interactions, the results show the necessity of using a leading edge flap, rather than a trailing edge flap, to alleviate the interaction. Results for various time dependent flap motions and their effect on the predicted temporal sectional loads, differential pressures, and the free vortex trajectories are presented. For the OLS model rotor, contours of a BVI noise metric were used to quantify the effects of the trailing edge flap on the size and directivity of the high/low intensity noise region(s). Average reductions in the BVI noise levels on the order of 5 dB with moderate power penalties on the order of 18 pct. for a four bladed rotor and 58 pct. for a two bladed rotor were obtained. challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy, treating a couple that's lost

compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, Challenging Moments in Psychotherapy is essential reading for all clinicians, teachers, and supervisors of psychotherapy"--

What does it mean to bring Asia into conversation with current literature on everyday multiculturalism? This book focuses on the empirical, theoretical and methodological considerations of using an everyday multiculturalism approach to explore the ordinary ways people live together in difference in the Asian region while also drawing attention to increasing trans-Asian mobilities. The chapters in this collection encompass inter-disciplinary research undertaken in Australia, Hong Kong, Malaysia, Singapore and South

Korea that explores some core aspects of everyday multiculturalism as it plays out in and across Asia. These include an increase in intraregional movements and especially labour mobility, which demands regard for the experiences of migrants from Burma, China, Nepal, The Philippines and India; negotiations of cultural diversity in nations where a multi-ethnic citizenry is formally recognised through predominantly pluralist models, and/or where national belonging is highly racialized; and intercultural contestation against, in some cases, the backdrop of a newly emergent multicultural policy environment. The book challenges and reinvigorates discussions around the relative transferability of an everyday multiculturalism framework to Asia,

including concepts such as super-diversity, conviviality and everyday racism, and the importance of close attention to how people navigate differences and commonalities in local and trans-local contexts. This book will be of interest to academics and researchers studying migration, multiculturalism, ethnic and racial studies, and to advanced students of Sociology, Political Science and Public Policy. It was originally published as a special issue of Ethnic and Racial Studies. Addressing Challenging Moments in Psychotherapy Everyday Multiculturalism in/across Asia

This volume presents an essential but underestimated role that Dionysus played in Greek and Roman political thought. Written by an interdisciplinary team of scholars, the volume covers the period from archaic Greece to the late Roman Empire. The reader can observe how ideas and political themes rooted in Greek classical thought were continued, adapted and developed over the course of history. The authors (including four leading experts in the field: Cornelia Isler-Kerényi, Jean-Marie Pailler, Richard Seaford and Richard Stoneman) reconstruct the political significance of Dionysus by examining different types of evidence: historiography, poetry, coins, epigraphy, art and philosophy. They discuss the place of the god in Greek city-state

politics, explore the long tradition of imitating Dionysus that ancient leaders, from Alexander the Great to the Roman emperors, manifested in various ways, and shows how the political role of Dionysus was reflected in Orphism and Neoplatonist philosophy. Dionysus and Politics provides an excellent introduction to a fundamental feature of ancient political thought which until now has been largely neglected by mainstream academia. The book will be an invaluable resource to students and scholars interested in ancient politics and religion.
