Historically, the Massachusetts island had served as port for whaling ships.

Eyewitnesses swore this wasn't a whale, but some new, fearsome creature. As eyewitness account piled up, newspaper stories of the sea monster spread quickly. Across the

71% of the Earth's surface is covered by water, and until the 20th century no one had plumbed its depths. Even today the bigger seas and oceans

File Type PDF

Book Of Sea

remain a

largely

unexplored

frontier, with

new species

being

discovered

every year.

Thus it comes

as no surprise

that countless

legends have

arisen of

strange

lurking in the

depths. What

follows is

just a

these stories,

creatures by  
experienced  
witnesses in  
the 19th,

idea that  
there might be  
large species  
still swimming  
in the oceans

File Type PDF

Book Of Sea

Monsters

that haven't

been

classified by

marine

biologists

isn't as far-

fetched as it

might sound.

For example,

the megamouth

shark

(*Megachasma*

entirely  
unknown to  
science until  
a U.S. Naval  
vessel off the  
coast of  
Hawaii  
accidentally  
skewered one  
on its anchor.  
The megamouth

File Type PDF

shark is a  
deepwater  
shark that can  
reach up to 18  
feet in  
length, making  
it quite a  
large creature  
to go  
unnoticed for  
so long. In  
fact, since

File Type PDF

its accidental  
discovery,  
fewer than a  
hundred  
specimens have  
been spotted  
and the  
species had  
only been  
filmed three  
times. The  
Peruvian

(Mesoplodon

discovered the

same year and

not formally

described

until 1991.

Very little is

known about

this small

whale that has only been seen off the west coast of Central and South America. Even more poorly known is the Spade-toothed whale (*Mesoplodon traversii*),

which was

first

documented in

1872 thanks to

the discovery

of a partial

fact that an

known to exist  
and yet no one  
has ever seen  
one alive adds  
fuel to the

insists that  
there may be

waiting to be

Cryptozoology

is the science

that

investigates

these

creatures,

investigators  
generally call  
"cryptids".

The word is

cryptozoology

are quick to  
point out that  
they are not

they do not
