"This is a brilliant and hardheaded book. It will frighten those who prefer not to dwell on the unthinkable and infuriate those who have taken refuge in stereotypes and moral attitudinizing."—Gordon A. Craig, *New York Times Book Review*
Originally published more than fifty years ago, this landmark book explores the ways in which military capabilities—real or imagined—are used, skillfully or clumsily, as bargaining power. Anne-Marie Slaughter's new introduction to the work shows how Schelling's framework—conceived of in a time of superpowers and mutually assured destruction—still applies to our multipolar world, where wars are fought as much online as on the ground.

A trusted economic commentator provides a penetrating account of the threats to China's continued economic rise Under President Xi Jinping, China has become a large and confident power both at home and abroad, but the country also faces serious challenges. In this critical take on China's future, economist George Magnus explores four key traps that China must confront and overcome in order to thrive: debt, middle income, the Remninhai, and an aging population. Looking at the political direction President Xi Jinping is taking, Magnus argues that Xi's authoritarian and repressive philoosphy is ultimately not compatible with the country's economic aspirations. Thorough and well researched, the book also investigates the potential for conflicts over trade, China's evolving relationship with Trump, and the country's attempt to win influence and control in Eurasia through the Belt and Road initiative.

International Classic Best Seller By The Author Of Kidnapped And Treasure Island Millions of copies sold world wide “One of the best.of the Victorian era!” Robert Louis Stevenson’s most popular book The Strange Case of Dr. Jekyll and Mr. Hyde by Robert Louis Stevenson is a fascinating tale of split personalities. Dr. Jekyll is a “large, well-made, smooth-faced man of fifty with something of a stylish cast”, who occasionally feels he is battling between the good and evil within himself, thus leading to the struggle between his dual personalities of Henry Jekyll and Edward Hyde. He has spent a great part of his life trying to repress evil urges that were not fitting for a man of his stature. He creates a serum, or potion, in an attempt to mask this hidden evil within his personality. However, in doing so, Jekyll transforms into the smaller, younger, cruel, remorseless, evil Hyde. Jekyll has many friends and has an amiable personality, but as Hyde, he becomes mysterious and violent. As time goes by, Hyde grows in power. After taking the potion repetitively, he no longer relies upon it to unleash his inner demon i.e., his alter ego. Eventually, Hyde grows so strong that Jekyll becomes reliant on the potion to remain conscious. A series of unsolved crimes ensues, and no one suspects the reserved, successful doctor of being the perpetrator. As the story unfolds, Dr. Jekyll has increasing difficulty hiding his double life and it appears that he enjoys his excursions into crime and cruelty. The tale comes to a dramatic climax as he seeks a final resolution to his dilemma. This classic tale is commonly credited as an influence in modern fiction, movie and television characters such as Dexter, The Hulk, Batman and other superheroes that struggle with shadow aspects of their personalities. *DIV This landmark book looks at what it means to be a multiracial couple in the United States today. According to Our Hearts begins with a look back at a 1925 case in which a two-month marriage ends with a man suing his wife for misrepresentation of her race, and shows how our society has yet to come to terms with interracial marriage. Angela Onwuachi-Willig examines the issue by drawing from a variety of sources, including her own experiences. She argues that housing law, family law, and employment law fail, in important ways, to protect multiracial couples. In a society in which marriage is used to give, withhold, and take away status—in the workplace and elsewhere—she says interracial couples are at a disadvantage, which is only exacerbated by current law. *div**

In this masterly, deeply personal, and provocative book, the internationally renowned Mexican writer Carlos Fuentes, whose work has been called "a combination of Poe, Baudelaire, and Isak Dinesen" (Newsweek), steps back to survey the wellsprings of art and ideology, the events that have shaped our time, and his extraordinary life and fiercest passions. Arranged alphabetically from "Amore" to "Zurich," This I Believe takes us on a marvelous inner journey with a great writer. Fuentes ranges wide, from contradictions inherent in Latin American culture and politics to his long friendship with director Luis Buñuel. Along the way, we find reflection on the mixed curse and blessing of globalization; memories of a sexual initiation in Zurich; a fond tracing of a family tree heavy with poets, dreamers, and diplomats; evocations of the streets, cafés, and bedrooms of Washington, Paris, Santiago de Chile, Cambridge, Oaxaca, and New York; and a celebration of literary heroes including Balzac, Cervantes, Faulkner, Kafka, and Shakespeare. Throughout, Fuentes captivates with the power of his intellect and his prose. Here, too, are vivid, often heartbreaking glimpses into his personal life. "Silvia" is a powerful love letter to his beloved wife. In "Children," Fuentes recalls the births of his daughters and the tragic death of his son; in "Cinema," he relives the magic of films such as Citizen Kane and The Wizard of Oz. Further extending his reach, he examines the collision between history and contemporary life in "Civil Society," "Left," and "Revolution." And he poignantly addresses the experiences we all hold in common as he grapples with beauty, death, freedom, God, and sex. By turns provocative and intimate, partisan and universal, this book is a brilliant summation of an international literary career. Revisiting the influences, commitments, readings, and insights of a lifetime, Fuentes has fashioned a magnificently coherent statement of his view of the world, reminding us once again why reading Fuentes is "like standing beneath the dome of the Sistine Chapel. . . . The breadth and enormity of this accomplishment is breathtaking" (The Denver Post).

Shortlisted for the 2020 International Booker Prize Now in paperback, Fernanda Melchor’ s Hurricane Season is “ a bilious, profane, blood-spattered tempest of rage ” (The Wall Street Journal), that casts “ a powerful spell ” (NPR): “ a narrative that not only decries an atrocity but embodies the beauty and vitality it perverts ” (The New York Times) The Witch is dead. And the discovery of her corpse has the whole village investigating the murder. As the novel unfolds in a dazzling linguistic torrent, with each unrelieved narrator lingering on new details, new acts of depravity or brutality, Melchor extracts some tiny shred of humanity from these characters—inners whom most people would write off as irredeemable—forming a lasting portrait of a damned Mexican village. Like Roberto Bolano’ s 2666 or Faulkner’ s novels, Hurricane Season takes place in a world saturated with mythology and violence—real violence, the kind that seeps into the soil, poisoning everything around: it’ s a world that becomes more and more terrifying the deeper you explore it.

This book offers a highly revealing and troubling view of today’s high school students and the ways they pursue high grades and success. Denise Popen, veteran teacher and curriculum expert, follows five motivated and successful students through a school year, closely shadowing them and engaging them in lengthy reflections on their school experiences. What emerges is a double-sided picture of school success. On the one hand, these students work hard in school, participate in extracurricular activities, serve their communities, earn awards and honours, and appear to uphold school values. But on the other hand, they feel that in order to get ahead they must compromise their values and manipulate the system by scheming, lying, and cheating. In short, they do school, that is, they are not really engaged with learning nor can they commit to such values as integrity and community. The words and actions of these five students - two boys and three girls from diverse ethnic and socioeconomic backgrounds - underscore the frustrations of being caught in a grade trap that pins future success to high grades and test scores. Their stories raise critical questions that are too important for parents, educators, and community leaders to ignore: Are schools cultivating an environment that promotes intellectual curiosity, cooperation, and integrity? Or are they fostering anxiety, deception, and hostility? Do today’s schools inadvertently impede the very values they claim to embrace? Is the success that current assessment practices measure the kind of success we want for our children?

From the man who became Pope Francis, Jorge Mario Bergoglio shares his thoughts on religion, reason, and the challenges the world faces in the 21st century with Abraham Skorka, a rabbi and biophysicist. For years Cardinal Jorge Mario Bergoglio, archbishop of Argentina, and Rabbi Abraham Skorka were tenacious promoters of interreligious dialogues on faith and reason. They both sought to build bridges among Catholicism, Judaism, and the world at large. On Heaven and Earth, originally published in Argentina in 2010, brings together a series of these conversations where both men talked about various theological and worldly issues, including God, fundamentalism, atheism, abortion, homosexuality, euthanasia, same-sex marriage, and globalization. From these personal and accessible talks comes a first-hand view of the man who would become pope to 1.2 billion Catholics around the world in March 2013.

For students who leave studying to the last minute "Basic Training" covers the basics in just four weeks. Other outstanding features include: Sample tests that closely simulate real exams Review material based on the contents of the most recent tests Icons highlighting important facts, vocabulary, and frequently-asked questions Boxed quotes offering advice from students who have aced the exams and from AP teachers and college professors Websites and links to valuable online test resources, along with author e-mail addresses for students with follow-up questions Authors who are either AP course instructors or exam developers Leonard Bernstein stood at the epicenter of twentieth-century American musical life. Our lives are saturated by color. We live in a world of vivid colors, and color marks our psychological and social existence. But for all color's inescapability, we don't know much about it. Now authors David Scott Kastan and Stephen Farthing offer a fresh and imaginative exploration of one of the most intriguing and least understood aspects of everyday experience. Kastan and Farthing, a scholar and a painter, respectively, investigate color from numerous perspectives: literary, historical, cultural, anthropological, philosophical, art historical, political, and scientific. In ten lively and wide-ranging chapters, each devoted to a different color, they examine the various ways colors have shaped and continue to shape our social and moral imaginations. Each individual color becomes the focal point for a consideration of one of the extraordinary ways in which color appears and matters in our lives. Beautifully produced in full color, this book is a remarkably smart, entertaining, and fascinating guide to this elusive topic.
