Osho with talks by the contemporary mystic during his stay in the United States. Osho says: "It is fortunate that man is born with a question mark, otherwise he would be just another species of animal." This volume is a radical questioning of traditional belief systems in religious, political, and social dimensions. Here Osho encourages readers to ask questions that are immediate and existentially significant — not borrowed or intellectual questions, but questions with an existential significance. Born With a Question Mark in Your Heart promotes personal

transformation through experience and spirituality without organized religion. Claudetta, an orphaned hermit crab, and Mama and Papa Turtle show others that love is stronger than any differences. "A work of epic vision" reflecting our fraught contemporary moment of racial and gendered hatred, mass migration, global war, and terror (New York Journal of Books). Waldman appropriates the idea of William Blake's unborn spirit of Thel to explore artists' and activists' roles during the Anthropocene. "Throughout, these long poems

alternate between verse and prose, Eastern and Western philosophy, spiritual channeling and focused critique” (Publishers Weekly).

“Juxtaposing lyric arcana, journalism, critical fragments, visions of mythic and mystic beings, narrative, polemics, and even ekphrasis, Waldman has created a work that is simultaneously jeremiad and psalm. It is, then, both fearful and celebratory, an epic of a ‘time before birth’” (Lyn Hejinian). Profoundly resonant, essential, and impassioned, Waldman’s latest work deserves to be read aloud to appreciate

surrounded her. She was a patient. You did not cross that line. I would not cross that line. I should have kept my eyes closed. Life was easier when you didn't see. But they were open now. They saw her. They saw everything. Suddenly invisible lines ceased to matter. For me, Time mattered. How far would you go to make sure the one you loved had enough of it? Would you challenge the clock? Help them prepare? Could you watch them suffer? Could you accept a life without them in it? Or, would you follow them into the darkness? I did. This is our story. hearts collide!!!! Ceana has spent her life dreaming of becoming an archaeologist and unlocking the mysteries of the past. judgement concerning the deeds done in our bodies is our motives. Our values determine our motives, and our motives are the real reason behind our thoughts, words, and deeds. This absorbing and poignant book is not merely the story of one writer's flawed heart. It is a history of cardiac medicine, a candid personal journey, and a profound reflection on mortality. Born in 1966 with a congenital heart defect known as the tetralogy of Fallot, Gabriel Brownstein entered the world just as doctors were learning to operate on conditions like his. He received a life-saving surgery at five years old, and since then has ridden wave after wave of medical innovation, a series of interventions that have kept his heart beating. The Open Heart Club is both a memoir of a life on the edge of medicine's reach and a

history of the remarkable people who have made such a life possible. It begins with the visionary anatomists of the seventeenth century, tells the stories of the doctors (all women) who invented pediatric cardiology, and includes the lives of patients and physicians struggling to understand the complexities of the human heart. The Open Heart Club is a riveting work of compassionate storytelling, a journey into the dark hinterlands between sickness and health lit by bright moments of humor and inspiration.
