**#1 NEW YORK TIMES BESTSELLER** • The game-changing author of *Tribe of Mentors* teaches you how to reach your peak physical potential with minimum effort. “A practical crash course in how to reinvent yourself.”—Kevin Kelly, *Wired* Is it possible to reach your genetic potential in 6 months? Sleep 2 hours per day and perform better than on 8 hours? Lose more fat than a marathoner by bingeing? Indeed, and much more. The *4-Hour Body* is the result of an obsessive quest, spanning more than a decade, to hack the human body using data science. It contains the collective wisdom of hundreds of elite athletes, dozens of MDs, and thousands of hours of jaw-dropping personal experimentation. From Olympic training centers to black-market laboratories, from Silicon Valley to South Africa, Tim Ferriss fixated on one life-changing question: For all things physical, what are the tiniest changes that produce the biggest results? Thousands of tests later, this book contains the answers for both men and women. It’s the wisdom Tim used to gain 34 pounds of muscle in 28 days, without steroids, and in four hours of total gym time. From the gym to the bedroom, it’s all here, and it all works. You will learn (in less than 30 minutes each):

- How to lose those last 5-10 pounds (or 100+ pounds) with odd combinations of food and safe chemical cocktails
- How to prevent fat gain while bingeing over the weekend or the holidays
- How to sleep 2 hours per day and feel fully rested
- How to produce 15-minute female orgasms
- How to triple testosterone and double sperm count
- How to go from running 5 kilometers to 50 kilometers in 12 weeks
- How to reverse “permanent” injuries
- How to pay for a beach vacation with one hospital visit

And that's just the tip of the iceberg. There are more than 50 topics covered, all with real-world experiments, many including more than 200 test subjects. You don't need better genetics or more exercise. You need immediate results that compel you to continue. That’s exactly what *The 4-Hour Body* delivers.

This book examines a variety of critical issues pertaining to the psychology of men and masculinity and presents successful, evidence-based strategies for treatment. Part 1 focuses on treating men in couples counseling, group work, and career counseling, as well as counseling men about their health. Part 2 explores the intersections of identity for sexual minority men, older men, and fathers, and discusses spiritual work with men in life transitions. Part 3 addresses the concerns of men in the military, prevention of sexual violence, and treating men with addictions and trauma-related issues. Part 4 provides the specific clinical frames of female counselors using relational-cultural theory with men, and examines using motivational and masculine-sensitive therapy with men. Examples and vignettes throughout the text provide clinical relevance, and reflective questions in each chapter encourage readers to explore their own biases and ideas about working with men. \*Requests for digital versions from the ACA can be found on [wiley.com](http://wiley.com). \*To request print copies, please visit the ACA website here. \*Reproduction requests for material from books published by ACA should be directed to [permissions@counseling.org](mailto:permissions@counseling.org).

We instinctively know that exercise, eating the right things, and taking vitamins sustains our health, maintains our youth, and offers a sense of wellbeing. Traditional fitness publications do a great job telling you what to do, but lack any explanation as to the why and how. They offer a map to youth by micromanaging your diet, exercise and or supplements. You blindly follow their lead in expectation of finding your fountain of youth through their training. Every body is different, which is why one map may work for one person, but not another; maybe it failed you, so you try another. What you may not realize is that although they offer step by step instruction to find the fountain, they are not teaching you how to read the map. Although the map is the same, the directions are different for each of us to find the fountain of youth. The difference between the layperson and expert is their ability to read the map as a whole; that map is our anatomy. That cartography lesson is learned by teaching you how exercise, diet and supplements work rather than being told what in the same to follow. At the end of the lesson, you may now understand that your journey may require parts of many methods, rather than the single direction of one. The author shares his own journey as he teaches you how to read the map, so you understand how one has successfully read the map to discover his fountain of youth.

Diet books have become a genre unto themselves as people anxious to shed those extra pounds seek that one perfect plan. Oh sure, they've found such a plan before....in fact, several times before, as they shed unwanted weight....only to gain it back within a few months. It's frustrating following a diet only to end up failing in the end--losing that same twenty pounds over and over again. But now Drs. Scott Uloth and Joe Klemczewski put an end to yo-yo dieting by giving their readers what they need most: control! The Diet Docs' plan brings complex metabolic physiology within the grasp of the average reader. A plan... With over ten years of clinical success Field tested on everyone from housewives to professional athletes That's "attainable and sustainable" Easily implemented with no complicated formula to decrypt Combining the latest scientific information and how to apply it That encourages the reader to become their own nutritionist The last diet book anyone will need....written by a family physician and a professional bodybuilder and nutritionist to the world's top bodybuilders and women's figure competitors.

This text aims to be useful to those looking for an approachable, beginner's guide to lifting weights. The book is issued in the illustrated format, where photographs and line illustrations are given as much attention as the easy-to-read text. The guide includes multiple exercises for all the major muscle groups, photographs depicting the beginning, midpoint and ending positions for each exercise and photographs depicting the most common mistakes in executing various exercises, allowing readers to learn from others' mistakes.

Provides routines for fifteen, thirty, forty-five, and sixty minute cardiovascular and weight training workouts, including information on seasonal and office workouts.

Bicycling Maximum Overload for Cyclists is a radical strength-based training program aimed at increasing cycling speed, athletic longevity, and overall health in half the training time. Rather than improving endurance by riding longer distances, you 'll learn how to do it by reducing your riding time and adding heavy strength and power training.

Traditionally cyclists and endurance athletes have avoided strength and power training, believing that the extra muscle weight will slow them down, but authors Jacques DeVore and Roy M. Wallack show that exactly the opposite is true. The Maximum Overload program uses weightlifting to create sustainable power and improved speed while drastically reducing training time and eliminating the dreaded deterioration that often occurs during the second half of a ride. A 40-minute Maximum Overload workout, done once or twice a week, can replace a long day in the saddle and lead to even better results. This comprehensive program includes unique takes on diet, interval training, hard and easy training, and sustainable power. Backed by the most trusted authority in the sport, Bicycling Maximum Overload for Cyclists is a book that no cyclist should be without.

Demonstrates how to perform a total body workout with the use of dumbbells, covering such techniques as lunges, squats, dead lifts, curls, and presses, in a volume that features step-by-step instructions and photographs.

*Do you ever feel like a hamster, spinning on a wheel in an endless loop and getting nowhere when it comes to your health and fitness? Are you working out regularly and cutting calories but seeing no real improvements? Does it feel like you will never lose those last 10 or 20 pounds? Or do you feel as if you simply don't have the time required to lose the fat and get into shape? Imagine if you could have the blueprint for the most efficient form of exercise to keep your body healthy and fit and an eating plan to satisfy hunger, taste, and health. Well, now you can. The best part? It will only require 15 minutes of exercise, twice a week, paired with a controlled-carb diet, and on the average, you will lose 10 pounds of fat within five weeks. It's hard to believe, but it works—and 15 Minutes to Fitness:Dr. Ben's SMaRT plan for total Fitness will not only show you how to do it but also explain why it works. If this sounds like just another "new exercise secret," please be assured that it is most certainly not. The foundation of this program is based on years of study, observation, and practice, and it has delivered real, measurable results in the overwhelming majority of those who have tried it. Dr. Vincent "Ben" Bocchicchio has spent the last 40 years in the fitness and health field, and as he approaches 70, people are still shocked to hear that he only spends 14 minutes twice a week on working out. But it's true. With only 7 percent body fat, he is often asked what the secret is and if there's a "magic bullet." The answer would be that the magic bullet is knowledge. And now with this book you will understand why genetically our bodies require simple and limited exercise exposure and how you can follow this optimal pattern yourself. The fact is that as humans we are hard-wired to exercise our bodies in very specific ways to reap the highest level of health benefits. I will provide the simple scientific argument for why my combination of high intensity exercise and controlled carbohydrate eating is the most effective means for burning fat, so that you can better understand exactly why this works. Exercise and diet are the two most powerful tools available for attaining high levels of health and function, and 15 Minutes to Fitness will show you just how little it actually takes to achieve a maximum response.*

It requires is just one, 20-minute resistance training workout a week using negative (or eccentric) training, the little-known weightlifting technique used by bodybuilders to trigger fast muscle growth and burn more fat. Legendary fitness researcher Ellington Darden, PhD, put 115 overweight men and women on this workout program and achieved remarkable results, which are illustrated in the book through 20 inspiring before and after photographs. Many test subjects lost significant weight while gaining muscle. Some lost 30, 40, even more than 50 pounds in as many days and transformed their bodies and their health. Negative training is just one of 10 "FAT BOMBS" demonstrated in the book.

These action steps combine to produce fast body transformations. Other FAT BOMBS include: A unique meal plan in which the bulk of calories come from carbohydrates (50% carbs; 25% protein; 25% fat), offering readers an appealing new way to lose weight without sacrifice Drinking a gallon of cold water a day to stay full and hydrated, and to boost calorie burn through thermogenesis Evening after-dinner walks to accelerate body heat, triggering increased fat loss

From bad weather to business travel to traffic safety, there are dozens of reasons why cyclists and triathletes take their rides inside. Although indoor cycling workouts offer the ultimate control over workout conditions, most inside riders don't get the most out of their trainers or spin bikes. RIDE INSIDE offers cyclists and triathletes a smart guide to getting more fitness from every indoor cycling workout. From the world's most experienced personal cycling coach, Joe Friel, RIDE INSIDE reveals all the unique aspects of indoor riding: · Mental aspects like motivation, focus, and enjoyment · Changes in upper body stability, posture, and pedaling technique on a stationary bike · Respiration, hydration, and cooling · Inherent changes in power output · Lower leg tension and eccentric loading from flywheel momentum · Lower effort from lack of terrain changes, headwinds, and crosswinds · Road-like feel · Different shifting patterns All these differences of indoor riding add up to a big impact when the rubber hits the road. Drawing from the foundations of Friel's classic training guides, The Cyclist's Training Bible and The Triathlete's Training Bible, RIDE INSIDE shows how to apply smart and proven training concepts to indoor cycling. Riders will get expert guidance on the best ways to set up a trainer or smart trainer, how to modify outdoor workouts for indoor cycling, how to better monitor power and RPE, and how to use social online training platforms like Zwift to make training

better and not worse. Most critically, RIDE INSIDE shows cyclists and triathletes how to do indoor cycling workouts that actually meet their training goals instead of compromising.

The worst advice an older person ever gets is, Take it easy. Easy makes you soft, and soft makes you dead. The Barbell Prescription maps an escape from the usual fate of older adults: a logical, programmed approach to the hard work necessary to win at the extreme sport of Aging Well. Unlike all other books on the subject of exercise for seniors, The Barbell Prescription challenges the motivated Athlete of Aging with a no-nonsense training approach to strength and health - and demonstrates that everybody can become significantly stronger using the most effective tools ever developed for the job.**

**The former Biggest Loser star and celebrity trainer presents a high intensity workout and eating plan that delivers big results in just 20 minutes a day. From his days as a trainer on The Biggest Loser, Bret Hoebel knows that when people log hours on a treadmill, they'll lose weight. But he also knows that most of his clients don't have the schedule or the desire to spend that much time at the gym. And the truth is—the number of minutes you spend working out isn't the key to weight loss: intensity is. Time and again, Brett meets clients who've been making the same mistakes—not only are they focused on the clock, but they're also concentrating on fat burn and pounds lost as markers of success. And with a fat-first focus on losing weight, plateaus come quickly and often. But it's not about fat, it's about muscle. In The 20-Minute Body, Brett explains why the key to long-term weight loss**

is building muscle. The more lean muscle your body has, the more calories your body will burn at rest. Metabolic muscle is the secret to fast metabolism. And all you need is 20 minutes a day to create it. Additionally, when you focus on inches, not pounds, you'll find that you fit into your clothes better and love the shape of your body. Weight is misleading—muscle weighs more than fat, but it takes up far less room. So throw away the scale and invest in a tape measure to track your success. The 20-Minute Body will help you lose 20 inches—from around your stomach, hips, thighs, and arms—in just 20 days. All it takes is 20 minutes of exercise, paired with 20-minute meals that are focused on nutrient quality, not calorie counts. Brett offers readers sample meal plans and recipes for meals, snacks, and desserts the whole family will love—all of which can be thrown together in 20 minutes or less.

Renowned fitness and health researcher Ellington Darden teaches you how to burn fat and keep it off using the science of thermodynamics. Exercise researcher and author Ellington Darden has studied exercise and fat loss for more than 40 years. His most recent program combines his previous findings on fat loss and muscle gain with new research on the principles of thermodynamics and heat transfer for a 6- or 12-week plan that will eliminate belly bloat, destroy flab, and stoke metabolism. Integrating his many years of research, the program has had more than 1,137 participants who shed an average of 29.5 pounds of fat and lost 6 inches off their waist or belly. The program consists of four main components—a descending-calorie eating plan; strength-training workouts; superhydration of the body; and rest, inactivity, and rejuvenating sleep. Men's Health Killing Fat takes you, step-by-step, through Darden's super-effective strategy. Interspersed with success stories and before-and-after photos of previous participants, Killing Fat will teach you a revolutionary new way to lose weight and keep it off.

Imagine watching pounds of fat melt away without ever feeling like you're on a diet. Imagine adding lean muscle to all the right places by doing just a few workouts per week that make you strong. And imagine realizing that your health and fitness goals—even the ones you've all but given up on—are finally within your reach. Muscle for Life will show you how. From the bestselling fitness author of Bigger Leaner Stronger and The Shredded Chef, Muscle for Life reveals a science-based blueprint for eating and exercising that anyone can follow at any age and fitness level. Based on time-proven principles produced by decades of hands-on experience and thousands of hours of scientific research, Muscle for Life will give you a plan for transforming your body faster than you ever thought possible, including: -Conquering the “mental game” of fitness. Learn to hack your habits, willpower, and mindset so your fitness regimen feels like it's on autopilot. -Harnessing the science of “flexible dieting.” A whole new paradigm for eating that empowers you to forever break free of fad dieting, crash dieting, and yo-yo dieting. -Unlocking the power of strength training. The “secret” to optimizing your body composition, which is far more important for your health and image than your body weight. Whether you're a beginner looking for a lifestyle change, a lifelong athlete looking to reach the next level, or somewhere in between, Muscle for Life will show you how to look, feel, and perform your best. And frankly, it may be the last fitness book you'll ever need to read.

You've been lifting for a few years. When you take your shirt off, do you look like a professional athlete? Do you even look like you work out? Many fitness “experts” defend weights and cardio like they are infallible, but where are the results? Why does almost nobody look even marginally athletic? Fitness may be the most failed human endeavor, and you are about to see how exercise science has missed some obvious principles that when enacted will turn you into the superhuman you always wanted to be. In Weight Lifting is a Waste of Time, Dr. John Jaquish and Henry Alkire explore the science that supports this argument and lay out a superior strength training approach that has been seen to put 20 pounds of muscle on drug-free, experienced lifters (i.e., not beginners) in six months.
