A first of its kind, the Paramedic Flipped Classroom combines curated content from a variety of market-leading Public Safety Group resources with student-directed activities, including problem-solving exercises, peer-to-peer activities, and student coaching to deliver truly effective and memorable learning experiences. The flipped classroom model dedicates class time to resolving misconceptions through collaborative problem-solving activities, elevating knowledge into application-level tasks and skills practice, and increasing engagement and confidence. Based on concepts of active learning, student engagement, and hybrid course design, the Paramedic Flipped Classroom serves as a course roadmap to provide a cooperative and successful learning experience. Students interact with primary source content outside of the classroom to develop foundational knowledge. The Paramedic Flipped Classroom delivers primary source content in a variety of engaging formats, including Nancy Caroline's Emergency Care in the Streets, Eighth Edition in paperback and eBook formats, Interactive Lectures, and content from the Virtual Ride-Alongs. Sample activities include: Build It: Students use different objects and materials to build models relating to the lesson topic. Problem-Based Learning (PBL) Cases: Students review patient cases that require critical thinking to arrive at the correct diagnosis and patient intervention. Challenge Scenario: Students act out a complex scenario that contains multiple issues and requires strong problem-solving skills. Simulated patient experiences: Students appreciate what it's like to experience various conditions, such as schizophrenia, sensory or communication deficits, geriatric mobility difficulties, and more. Wrecking Ball: Students create models of wrecking balls to demonstrate the principles of kinesthetics and determine how those principles apply to vehicle crashes and other mechanisms of injury. Simon Says: Students take turns being Simon, using medical terms to direct their classmates' movements. Paramedic Flipped Classroom helps instructors shift away from the role of lecturer, allowing traditional instructor-centered classrooms to transform into student-centered learning environments where instructors can have an even greater impact on student outcomes.

She also wrote the first paramedic textbook: Emergency Care in the Streets. The impact that Dr. Caroline had on EMS and health care spanned across the U.S. and abroad.
