A bread manifesto and signature recipes from Poilâne, the internationally famous bakery that "revolutionized" bread in America --Alice Waters

Everything about Sarah Bernhardt is fascinating, from her obscure birth to her glorious career--redefining the very nature of her art--to her amazing (and highly public) romantic life, to her indomitable spirit. Well into her seventies, after the amputation of her leg, she was performing under bombardment for soldiers during World War I and toured America for the ninth time. Though the Bernhardt literature is vast, this is the first English-language biography to appear in decades, tracking the trajectory through which an illegitimate--and scandalous--daughter of a Jewish courtesan transformed herself into the most famous actress who ever lived, and into a national icon, a symbol of France.--From publisher description.

Award-winning journalist Simran Sethi explores the history and cultural importance of our most beloved tastes, paying homage to the ingredients that give us daily pleasure, while providing a thoughtful wake-up call to the homogenization that is threatening the diversity of our food supply. Food is one of the greatest pleasures of human life. Our response to sweet, salty, bitter, or sour is deeply personal, combining our individual biological characteristics, personal preferences, and emotional connections. Bread, Wine, Chocolate illuminates not only what it means to recognize the importance of the foods we love, but also what it means to lose them. Award-winning journalist Simran Sethi reveals how the foods we enjoy are endangered by genetic erosion—a slow and steady loss of diversity in what we grow and eat. In America today, food often looks and tastes the same, whether at a San Francisco farmers market or at a Midwestern potluck. Shockingly, 95% of the world’s calories now come from only thirty species. Though supermarkets seem to be stocked with endless options, the differences between products are superficial, primarily in flavor and brand. Sethi draws on interviews with scientists, farmers, chefs, vintners, beer brewers, coffee roasters and others with firsthand knowledge of our food to reveal the multiple and interconnected reasons for this loss, and its consequences for our health, traditions, and culture. She travels to Ethiopian coffee forests, British yeast culture labs, and Ecuadoran cocoa plantations collecting fascinating stories that will inspire readers to eat more consciously and purposefully, better understand familiar and new foods, and learn what it takes to save the tastes that connect us with the world around us.

Técnicas rompedoras utilizadas por los mejores chefs del mundo "El libro más importante en las artes culinarias desde Escoffier." --Tim Zagat Una revolución está en marcha en el arte de la cocina. Al igual que el impresionismo francés rompió con siglos de tradición artística, en los últimos años la cocina modernista ha franqueado los límites de las artes culinarias. Tomando prestadas técnicas de laboratorio, los chefs de santuarios gastronómicos mundialmente reconocidos, como elBulli, The Fat Duck, Alinea y wd~50, han abierto sus cocinas a la ciencia y a la innovación tecnológica incorporando estos campos de conocimiento al genio creativo de la elaboración de alimentos. En Modernist Cuisine: El arte y la ciencia de la cocina, Nathan Myhrvold, Chris Young y Maxime Bilet --científicos, creadores y reconocidos cocineros-- revelan a lo largo de estos seis volúmenes, de 2.440 páginas en total, unas técnicas culinarias que se inspiran en la ciencia y van de lo insospechado a lo sublime. Las 20 personas que componen el equipo de The Cooking Lab han conseguido nuevos y asombrosos sabores y texturas con utensilios como el baño María, los homogeneizadores y las centrifugas e ingredientes como los hidrocoloides, los emulsionantes y las enzimas. Modernist Cuisine es una obra destinada a reinventar la cocina. ¿Cómo se hace una tortilla ligera y tierna por fuera pero sabrosa y cremosa por dentro? ¿O patatas fritas esponjosas por dentro y crujientes por fuera? Imagínese poder envolver un mejillón con una esfera de gelatina de su propio jugo, dulce y salado a la vez. O preparar una mantequilla solo a base de pistachos, fina y homogénea. Modernist Cuisine explica todas estas técnicas y le guía paso a paso con ilustraciones. La ciencia y la tecnología de la gastronomía cobran vida en miles de fotografías y diagramas originales. Las técnicas fotográficas más novedosas e impresionantes permiten al lector introducirse en los alimentos para ver toda la cocina en acción, desde las fibras microscópicas de un trozo de carne hasta la sección transversal de una barbacoa Weber. La experiencia de comer y cocinar bajo una perspectiva completamente nueva. Una muestra de lo que va a descubrir: Por qué sumergir los alimentos en agua helada no detiene el proceso de cocción Cuando cocer en agua es más rápido que al vapor Por qué subir la parrilla no reduce el calor Por qué el horneado es principalmente un proceso de secado Por qué los alimentos fritos se doran mejor y saben más si el aceite se ha utilizado previamente Cómo pueden las modernas técnicas de cocina conseguir resultados perfectos sin el tiempo exacto o la buena suerte que requieren los métodos tradicionales Incluye aspectos cruciales como: Los sorprendentes principios científicos que encierran los métodos tradicionales de preparación de los alimentos, como asar, ahumar y saltear La guía más completa publicada hasta la fecha sobre la cocina al vacío, con las mejores opciones para baños María, materiales de envasado y equipos de sellado, estrategias de cocción y consejos para solucionar problemas Más de 250 páginas sobre carnes, pescados y marisco y 130 páginas sobre frutas, verduras y cereales, incluidas cientos de recetas paramétricas y técnicas paso a paso Extensos capítulos que explican cómo obtener conseguir resultados increíbles utilizando modernos espesantes, geles, emulsiones y espumas, incluidas recetas de muestra y muchas fórmulas Más de 300 páginas de nuevas recetas con presentaciones listas para servirse en restaurantes de alta cocina, además de recetas adaptadas de grandes chefs como Grant Achatz, Ferran Adrià, Heston Blumenthal, David Chang, Wylie Dufresne y David Kinch, entre otros Volumen 1: Historia y fundamentos Volumen 2: Técnicas y equipamiento Volumen 3: Animales y plantas Volumen 4: Ingredientes y preparaciones Volumen 5: Recetas listas para servir Volumen 6: Manual de cocina, impreso en papel resistente al agua, con recetas de ejemplo y exhaustivas tablas de referencia
