Is emergency management education undoing an age-old tradition in the American Fire Service? Has the time arrived to educate emergency managers in college classrooms rather than in twenty years of tactical operations experience? Over one hundred forty-three (143) institutions of higher education are now offering certificate or degree programs in emergency management with no tactical operations experience required for admission. Resistance by veteran law enforcement officers and fire fighters may have to be overcome if we are to prepare emergency managers with required skill sets. Dr. Tom Phelan explores the skills being taught to emergency management students and addresses the concerns of experienced first responders in accepting their leadership. "Discusses the value of emergency management education in the post-9/11 world "Makes clear the need for educating emergency managers to prepare them for emergency manager leadership "Helps bridge the gap between emergency management and first responders "Should be required reading in every college emergency management curriculum "The book is clear, concise, and an "easy read" The number of people incarcerated in the U.S. now exceeds 2.3 million, due in part to the increasing criminalization of drug use: over 25% of people incarcerated in jails and prisons are there for drug offenses. Judging Addicts examines this increased criminalization of drugs and the medicalization of addiction in the U.S. by focusing on drug courts, where defendants are sent to drug treatment instead of prison. Rebecca Tiger explores how advocates of these courts make their case for what they call "enlightened coercion," detailing how they use medical theories of addiction to justify increased criminal justice oversight of defendants who, through this process, are defined as both "sick" and "bad." Tiger shows how these courts fuse punitive and therapeutic approaches to drug use in the name of a "progressive" and "enlightened" approach to addiction. She critiques the medicalization of drug users, showing how the disease designation can complement, rather than contradict, punitive approaches, demonstrating that these courts are neither unprecedented nor unique, and that they contain great potential to expand punitive control over drug users. Tiger argues that the medicalization of addiction has done little to stem the punishment of drug users because of a key conceptual overlap in the medical and punitive approaches—that habitual drug use is a problem that needs to be fixed through sobriety. Judging Addicts presses policymakers to implement humane responses to persistent substance use that remove its control entirely from the criminal justice system and ultimately explores the nature of crime and punishment in the U.S. today.

Although two federal panels have concluded that all students can learn mathematics and most can succeed through Algebra 2, the abstractness of algebra and missing precursor understandings may be overwhelming to many students ... and their teachers. Bridging the Gap Between Arithmetic & Algebra responds to this need for instruction and interventions that go beyond typical math lesson plans. Providing a review of evidence-based practices, the book is an essential reference for mathematics teachers and special education teachers when teaching mathematics to students who struggle with the critical concepts and skills necessary for success in algebra. Audiences: General education (mathematics) teachers, special education teachers, administrators, teacher educators.

The UN Environment Emissions Gap Report assesses the latest scientific studies on current and estimated future greenhouse gas emissions and compares these with the emission levels permissible for the world to progress on a least-cost pathway to achieve the goals of the Paris Agreement. This difference between where we are likely to be and where we need to be is known as the emissions gap . The report explores some of the most important options available for countries to bridge the gap.

BRIDGESMy heart consumes much of the space of it's total capacity with the thought of 'BRIDGES'. The cover of Bridging The Gap displays a picture of The Tower Bridge of London. I selected Tower Bridge because it most tells the story I have in my heart to tell. The heart of Bridging The Gap is not about the physicality of Tower Bridge or any other bridge in the world, but the thrust of the context is simply, 'How Do I Tell People That There Is An Answer for Now and Eternity' within the idea of building a bridge from wrong to right.It seems that there are innumerable, or uncountable bridges in the world. Every one of them has a built in importance factor: something that sets it apart from other bridges. My thoughts are that this is much like people, 'Everybody: Everybody, Is A Somebody.' There is no conceivable way that I can include in one book, this book, every bridge in the world to be a part of the story of the whole: although if it were possible, there would be enough relevance or significance to do so.Building the framework of a bridge of any capacity requires much planning and many resources. Building the framework of a bridge between ill-fated circumstances of people and other entities, to those of the circumstance of situations and life that will carry the day into the everlasting, can, be and 'probably' is a great deal tougher to accomplish.Bridging The Gap splashes my heart 'all over the map,' to say that there is and always has been a way for humankind to have the relationship with God, that many people do no think is possible: because they may think there is no God, or that if there is He is dead, or they do not believe that a mere mortal could have a relationship with someone so Big; after-all, He is God, and I am but a concoction of dirt and water (MUD, CLAY).It is possible! The person who believes that God exists, need only come to Him when He calls out for them to 'Follow.' '-without faith it is impossible to please him- he that cometh to God must believe that He is-and that he is a rewarder of them that diligently seek him. (Hebrews 11:6)

Taking an interdisciplinary approach, the authors invaluabley pinpoint both overarching problems and possibilities associated with the social dimension of European integration. Prominent researchers of economics, law and political science tackle this complex issue, providing new solutions within their respective fields of expertise.

Illustrating the importance of cohesion, this book is vital for those interested in comparative European studies, from backgrounds in public and social policy, law and economics.

*The Second Edition of Bridging the Achievement Gap: What Successful Educators and Parents Do includes 11 examples ofK-12 high performing public schools which serve mostly African American students. The book argues that school district leaders with low performing schools should consider what these high performing schools do in their planning to reverse the on-going trend of relatively low academic performance of African American students. Included in the "Solution Chapter" is the rationale for state legislation to provide funding for students who are low performing, but may not qualify for current funding for low income students. Also included in that chapter is the actual legislative language currently under consideration by the California State Legislature. The book contains other supporting research on this topic.*

While professional literature on the subject has grown a great deal in the past 30 years, it tends to be exclusively research-based and lacking expert clinical commentary on treatment. This volume focuses on just such commentary, with chapters authored by both expert clinicians and researchers. Core issues such as assessment and diagnosis, the correlation between EDs and weight and nutrition, and medical/psychiatric management are discussed, as are the underrepresented issues of treatment differences based on gender and culture, the applications of neuroscience, EDNOS, comorbid psychiatric disorders and the impact of psychiatric medications. This volume uniquely bridges the gap between theoretical findings and actual practice, borrowing a bench-to-bedside approach from medical research. Since the mid 1980s, software agents and multi-agent systems have grown into a very active area of research and also commercial development activity. One of the limiting factors in industry take-up of agent-technology, however, is the lack of adequate software engineering support. The Agent-Oriented Software Engineering Workshop, AOSE, focuses on the synergies and cross fertilization between software engineering and agent research. This volume presents both thoroughly revised selected papers from the AOSE 2010 workshop held at AAMAS 2010 in Toronto, Canada in May 2010 as well as invited articles by leading researchers in the field. The papers cover a broad range of topics related to software engineering and agent-based systems, with particular attention to the integration of concepts and techniques from multi-agent systems with conventional engineering approaches on the one hand, and to the integration of agent-oriented software engineering and methodologies with conventional engineering processes on the other hand.

Brenda Smith's Bridging the Gap was the first college reading text to focus on reading for college, and through its eleven editions has been the most popular textbook choice of developmental reading educators.

The concept of resilience has arisen as a “new way of thinking”, becoming a response to both the causes and effects of ongoing global challenges. As it strongly stresses cities’ transformative potential, resilience’s final purpose is to prevent and manage unforeseen events and improve communities’ environmental and social quality. Although the resilience theory has been investigated in depth, several methodological challenges remain, mainly related to the concept’s practical sphere. As a matter of fact, resilience is commonly criticised for being too ambiguous and empty of meaning. At the same time, turning resilience into practice is not easy to do. This will arguably be one of the most impactful global issues for future research on resilience. The Special Issue “Bridging the Gap: The Measure of Urban Resilience” falls under this heading, and it seeks to synthesise state-of-the-art knowledge of theories and practices on measuring resilience. The Special Issue collected 11 papers that address the following questions: “What are the theoretical perspectives of measuring urban resilience? What are the existing methods for measuring urban resilience? What are the main features that a technique for measuring urban resilience needs to have? What is the role of measuring urban resilience in operationalising cities’ ability to adapt, recover and benefit from shocks?”

Legislative member organizations (LMOs)—such as caucuses in the U.S. Congress and intergroups in the European Parliament—exist in lawmaking bodies around the world. Unlike parties and committees, LMOs play no obvious, predefined role in the legislative process. They provide legislators with opportunities to establish social networks with colleagues who share common interests. In turn, such networks offer valuable opportunities for the efficient exchange of policy-relevant—and sometimes otherwise unattainable—information between legislative offices. Building on classic insights from the study of social networks, the authors provide a comparative overview of LMOs across advanced, liberal democracies. In two nuanced case studies of LMOs in the European Parliament and the U.S. Congress, the authors rely on a mix of social network analysis, sophisticated statistical methods, and careful qualitative analysis of a large number of in-depth interviews.

The present edition demonstrates once again why this volume has come to be so prized. It takes the long view - charting recent developments in health policy, and putting them side-by-side with descriptions and analysis of existing programs in the US and abroad." Sherry Glied, PhD Dean and Professor of Public Service, NYU Wagner From the Foreword Named a 2013 Doody's Medical Reviews Essential Purchase! This fully updated and revised 11th edition of a highly esteemed survey and analysis of health care delivery in the U.S. keeps pace with the rapid changes that are reshaping our system. Fundamentally, this new edition presents the realities that impact our nation's achievement of the so-called Triple Aim: better health and better care at a lower cost. It addresses challenges and responses to the Accountable Care Act, the implementation of Obamacare, and many new models of care designed to replace outmoded systems. Contributions by leading scholars, practitioners, and educators within population health and medical care present the most up-to-date evidence-based information on health disparities, vulnerable populations, and immigrant health; nursing workforce challenges; new information technology; preventative medicine; emerging approaches to control health care costs, and much more. Designed for graduate and advanced undergraduate students of health care management and administration and public health, the text addresses all of the complex core issues surrounding our health care system in a strikingly readable and accessible format. Contributors provide an in-depth and objective appraisal of why and how we organize health care the way we do, the enormous impact of health-related behaviors on the structure, function, and cost of the health care delivery system, and other emerging and recurrent issues in health policy, health care management, and public health. The 11th edition features the writings of such luminaries as Michael Gusmano, Carolyn Clancy, Joanne Spetz, Nirav Shah, Sherry Glied, Michael Sparer, and Christy LeMak, among others. Chapters include key words, learning objectives and competencies, discussion questions, case studies, and additional resources. Included For instructors is a Manual, Power Point Slides, Syllabus, Test Bank, Image Bank, Supplemental e-chapter on the ACA, and a transition guide bridging the 10th and 11th editions. Why, in an era when climate change is front of mind for so many people, have we failed to make progress? This question has been the source of heated debate across the political spectrum. In Picking Up the Slack, Andrew Green draws together different perspectives on the challenge facing Canada to offer an accessible account of the ideas and institutions that have impeded climate change action. Picking Up the Slack embraces the complexity of the problem, showing that its sources lie deep in Canada's institutional arrangements – pointing to the role played by federal-provincial power sharing arrangements, the heavy reliance on discretion in Canadian law, the role of the courts, and the impact of social norms. Working from a broad perspective that incorporates the insights of economics, law, political science, and philosophy, Green unpacks the features of Canadian policy making that determine the successes and failures of climate policies. His message is ultimately optimistic: Picking Up the Slack sheds light on how we can bring about meaningful movement towards a fair and positive future.*

*This popular book helps students make the transition from their undergraduate experience to law school learning. Unlike other "introduction to law school" texts, Bridging the Gap offers a different approach because it: explains the "why" of law, providing students with the context necessary to understand why law school is taught in a certain manner; explains the "how" of the law, setting out a step-by-step process that will help students adapt to the law school setting; explains the "what" of the law, giving students the opportunity to practice the problem-solving process by providing numerous exercises in a variety of subject matter areas. Rather than giving only general advice, or black letter law and some practice problems for a specific subject, Bridging the Gap provides the context, the process, and the problems.*

*Written by two former law school professors who used these techniques with thousands of students, Bridging the Gap is a guide to what really works in law school.*

Hacking Leadership is Mike Myatt's latest leadership book written for leaders at every level. Leadership isn't broken, but how it's currently being practiced certainly is. Everyone has blind spots. The purpose of Hacking Leadership is to equip leaders at every level with an actionable framework to identify blind spots and close leadership gaps. The bulk of the book is based on actionable, topical leadership and management hacks to bridge eleven gaps every business needs to cross in order to create a culture of leadership: leadership, purpose, future, mediocrity, culture, talent, knowledge, innovation, expectation, complexity, and failure. Each chapter: Gives readers specific techniques to identify, understand, and most importantly, implement individual, team and organizational leadership hacks. Addresses blind spots and leverage points most leaders and managers haven't thought about, which left unaddressed, will adversely impact growth, development, and performance. All leaders have blind-spots (gaps), which often go undetected for years or decades, and sadly, even when identified the methods for dealing with them are outdated and ineffective - they need to be hacked. Showcases case studies from the author's consulting practice, serving as a confidant with more than 150 public company CEOs. Some of those corporate clients include: AT&T, Bank of America, Deloitte, EMC, Humana, IBM, JP Morgan Chase, Merrill Lynch, PepsiCo, and other leading global brands. Hacking Leadership offers a fresh perspective that makes it easy for leaders to create a roadmap to identify, refine, develop, and achieve their leadership potential--and to create a more effective business that is financially solvent and professionally desirable.
