Long before they're able to talk, babies have a whole lot to say! Widen their world with this delightful modern classic—a must-have for growing families and a perfect baby shower or new-baby gift. With this adorable board book of essential signs, babies and toddlers can easily learn how to communicate their needs, wants, and feelings and even make basic observations with a simple gesture. Studies show that babies who use sign language feel less frustrated, throw fewer tantrums, and often learn to talk more easily. Just point to a sign in the book, say the word while making the sign, and the baby will soon be signing. Communicating a wet diaper or a hungry belly, asking for help or saying "all done" becomes as easy as waving hello or good-bye. And these are just a few of the thirteen signs inside this small and adorably illustrated board book, perfect for little hands and minds to grasp.

Blinded at the age of 3, Louis Braille developed a superb memory that enabled him to do well in school. But that wasn't enough--Louis wanted to read. Finding the alphabet impractical, he invented the raised dot alphabet, Braille, now used throughout the world.
