Updated annually, this study is the only comprehensive study of salary data for 45 water and wastewater jobs from 1,046 utilities. Data is summarized by type of utility ownership, utility size, location, and average gallons managed. This study allows utilities to compare positions in their facility to others of similar size and geographic location.

For many years, cross-connections and backflow have been well understood. Programs to prevent unhealthy situations from happening have been in place for many years. However, a general and extensive study on their impacts, types of programs, incidents, and financial repercussions has not been conducted. Many computer models for steady state or quasi-steady state simulation exist, but applications for transient state simulation, especially demonstrating backflow incidents, have rarely been done. The first objective of this project was to assess the impacts, financial and otherwise, of cross-connections and cross-connection control in North American water supplies and to North American water purveyors. The project team also planned to create and use a computer model to simulate and demonstrate hydraulic changes in the transient state. Of the over 700 utilities surveyed, 91% were found to have a cross-connection control program. Survey data indicated 65% of cross-connections were indirect and 35% were direct. Sudden changes of water demands in piping networks can cause sub-atmospheric pressures within the systems resulting in backflow incidents. Systems with larger variances in ground elevations have the greater possibility of creating sub-atmospheric pressures as water demands in the systems change. This book I would hope would open the minds of alot of people who refuse to accept the greatness of the afro- american, and all those who climb from the bottom, and want to be recognize for their glory and not their short comings. In the mist of this day i want people to know they can achieve anything they set out to achieve, and don't let no one tell you different. When putting these poems together my theme was for us to rise as people and stop killing one another and start helping one another, for now is the time to rise, for tomorrow may overcome your true radiance!
