

Buddhist Temple Where We Worship

Even though Keith Richardson and his wife, Francesca, own a shop that specializes in angels, and Keith has written the definitive books on America's best-known angel artist, Andy Lakey, Richardson was beyond surprised and to say the least skeptical when, during a guided meditation, a fully formed spirit guide appeared to him and began to speak. The story unfolds. The spirit guide called himself Chang (a Chinese title for "Emperor," as it turns out.) Chang is currently spirit guide to seventeen people, several of whom make an appearance in this book--most notably, James Van Praagh. As Richardson is guided by Chang, he learns many important life lessons and receives information about the past lives he and his wife share along with several of their current acquaintances. Richardson's quest eventually brings him to the Qing Tombs outside Beijing where Chang offers him a life-changing message that leads him and Francesca to recognize the meaning of true love and forgiveness. This moving and inspiring story has chapters on reincarnation and how it works, plus information on karma and universal laws, i.e. abundance, forgiveness, attraction. A fast and fascinating read! This is a book in the tradition of best-selling New Age titles such as *The Celestine Prophecy* or *Mutant Message Down Under*, or Shirley MacLaine's groundbreaking *Out on a Limb*. * A true story of love and reincarnation, forgiveness and karma, with wide mass appeal.

The Temple Art of East Java, a study of the temples created in East Java between the tenth and sixteenth centuries, fills an important scholarly lacuna. The arts of Central Java, home of the great Buddhist monument, Borobudur, and Hindu Prambanan, have been given thorough scholarly attention. The architectural and sculptural treasures of the East Javanese kingdoms of Kadiri, Singasari, and Majapahit, are little known in comparison, yet beautiful and significant in Indonesian history. The author presents the major sites of these three historical periods, and discusses their architecture and sculpture. The many narrative reliefs illustrating sacred and secular literature have been painstakingly identified. The reader is thus able to follow their stories and understand where, why, and how they fit into the visual program planned for each temple and their relation to historical events and the wayang theater. These descriptions are augmented by extensive site summaries. Superb color photography supports the text throughout and is a major contribution in itself. The book contains a wealth of information that is not available all together in any other publication. Not only are the descriptions of the monuments valuable but the author identifies numerous sculptures in collections around the world that were once associated with the East Javanese temples discussed. The attempted reconstruction of sculptural programs at the sites is extremely important. To understand an ancient Javanese stone sculpture, knowledge of its original cultural context is required rather than its current location on a stand in some museum. Today, with the number of fakes appearing on the art market, such associations are invaluable for dating and

authenticating stone sculpture said to come from unidentified East Javanese sites. The Temple Art of East Java is a welcome and significant addition not only to Javanese studies but also to architecture, art history, comparative religion, Buddhist, Hindu, and Southeast Asian studies generally.

Ethnographies of Islam in China

Alan Trevithick spent three years researching primary documents in New Delhi, Sarnath, Colombo, and London, in order to present this history (1874-1949) of the Mahabodhi Temple at Bodh Gaya. This is the first such account, and it details for the first time the administrative, legal and legislative activities which shaped the temple`s current status as one of the world`s most popular pilgrimage sites. Also included is an innovative biographical essay on Anagarika Dharmapala, the Sinhalese activist who first came to India in the late 19th century as a guest of the Theosophical society: his subsequent actions substantially affected the development of Bodh Gaya as a site of international importance.

Silk Road: The Study of Drama Culture is the translated edition of the Chinese academic book of the same title written by Professor LI Qiang from Shaanxi Normal University, China. The book breaks through the concept of regarding Han Drama as the center, yet elaborates the Silk Road drama as an inclusive culture and a prevailing literary art form in human civilization. Relying on his extensive experience and broad vision, the author conducts the thorough study by means of literature, artifacts and academic fieldwork. The book studies the drama culture of all ethnic groups from Asia, Europe and Africa and touches upon the cultural exchanges between China and its neighboring countries, between the East and the West. The carefully presented details in this book are aimed to explore all the related fields such as dramaturgy, philology, phonology,

religion, history, geography, archeology, ethnology, and folklore between the East and the West from the perspective of cultural anthropology. The explanations in the book contribute to an in-depth study on the origins of the Silk Road and the drama culture along the Silk Road.

This exciting new book is a detailed examination of pilgrimages in Japan, including the meanings of travel, transformation, and the discovery of identity through encounters with the sacred, in a variety of interesting dimensions in both historical and contemporary Japanese culture, linked by the unifying theme of a spiritual quest. Several fascinating new approaches to traditional forms of pilgrimage are put forward by a wide range of specialists in anthropology, religion and cultural studies, who set Japanese pilgrimage in a wider comparative perspective. They apply models of pilgrimage to quests for vocational fulfilment, examining cases as diverse as the civil service, painting and poetry, and present ethnographies of contemporary reconstructions of old spiritual quests, as conflicting (and sometimes global) demands impinge on the time and space of would-be pilgrims.

*Immigrants often face considerable challenges when it comes to preserving their cultural and religious teachings. D. Mitra Barua argues that the Sri Lankan Buddhist community in Toronto has maintained its coherence and integrity not despite but because of the need for cultural adaptations. Drawing on survey data, over fifty in-depth interviews with temple monks, educators, parents, and children, and fieldwork conducted in Toronto and Colombo, Sri Lanka, **Seeding Buddhism with Multiculturalism** examines how a religious tradition is transmitted from one generation to the next in a new cultural setting, and what happens during that process of transmission. Barua demonstrates that Buddhists have passed on Buddhist beliefs, attitudes, and practices to their Canadian-born youth, who in turn have constructed their own distinct Buddhist identity, influenced by the individualistic, egalitarian, and secular cultural ambience in Toronto. Through creative fieldwork and translocal analysis – taking into account migrants' geographical, cultural, and familial ties to multiple locales – this book further explains that pre-migration experiences often shape and determine the success or failure of intergenerational transmission. An ethnographic religious study with an uncommon depth of perspective, **Seeding Buddhism with***

Multiculturalism shows that first- and second-generation Sri Lankan Buddhists in Toronto are successfully practising Theravada Buddhism within a Canadian context.

Buddhism is not a way of harmony and cosmic unity, as Westerners tend to think. Although Buddhism is a rapidly rising religion in the West, few Westerners know what Buddhism is like from the inside. Steve, who made the journey from Buddhism to Christ, explains the Buddhist mind-set and worldview, and makes useful points of comparison.

Jacob Kinnard offers an in-depth examination of the complex dynamics of religiously charged places. Focusing on several important shared and contested pilgrimage places-Ground Zero and Devils Tower in the United States, Ayodhya and Bodhgaya in India, Karbala in Iraq-he poses a number of crucial questions. What and who has made these sites important, and why? How are they shared, and how and why are they contested? What is at stake in their contestation? How are the particular identities of place and space established? How are individual and collective identity intertwined with space and place? Challenging long-accepted, clean divisions of the religious world, Kinnard explores specific instances of the vibrant messiness of religious practice, the multivocality of religious objects, the fluid and hybrid dynamics of religious places, and the shifting and tangled identities of religious actors. He contends that sacred space is a constructed idea: places are not sacred in and of themselves, but are sacred because we make them sacred. As such, they are in perpetual motion, transforming themselves from moment to moment and generation to generation. Places in Motion moves comfortably across and between a variety of historical and cultural settings as well as academic disciplines, providing a deft and sensitive approach to the topic of sacred places, with awareness of political, economic, and social realities as these exist in relation to questions of identity. It is a lively and much needed critical advance in analytical reflections on sacred space and pilgrimage.

In light of the recently uncovered archaeological data and ancient historical records, this book offers an overview of the 14 centuries-long Toraijin story, from c. 800~600 BC to AD 600, exploring the fundamental role these immigrants, mainly from the Korean Peninsula, played in the history of the Japanese archipelago during this formative period.

Kwon explores how Korea's two major religious groups, Buddhists and Protestants, have emigrated and how their religious beliefs affect their adjustments after immigration. Kwon bases his study on a survey of 114 Korean congregations, participatory observation of a Buddhist temple and a Protestant church, and in-depth interviews with 109 devout immigrants. He finds that non-religious variables-urban background, educational level, and social class-have a greater effect on

adjustment to the host society than religion does. Religious congregations promote members' social capital for adjustment, but at the same religious participation serves as a barrier to assimilation.

Buddhists: Understanding Buddhism through the Lives of Practitioners provides a series of case studies of Asian and modern Western Buddhists, spanning history, gender, and class, whose lives are representative of the ways in which Buddhists throughout time have embodied the tradition. Portrays the foundational principles of Buddhist belief through the lives of believers, illustrating how the religion is put into practice in everyday life. Takes as its foundation the inherent diversity within Buddhist society, rather than focusing on the spiritual and philosophical elite within Buddhism. Reveals how individuals have negotiated the choices, tensions, and rewards of living in a Buddhist society. Features carefully chosen case studies which cover a range of Asian and modern Western Buddhists. Explores a broad range of possible Buddhist orientations in contemporary and historical contexts.

As an incredibly diverse religious system, Buddhism is constantly changing. The Oxford Handbook of Contemporary Buddhism offers a comprehensive collection of work by leading scholars in the field that tracks these changes up to the present day. Taken together, the book provides a blueprint to understanding Buddhism's past and uses it to explore the ways in which Buddhism has transformed in the twentieth and twenty-first centuries. The volume contains 41 essays, divided into two sections. The essays in the first section examine the historical development of Buddhist traditions throughout the world. These chapters cover familiar settings like India, Japan, and Tibet as well as the less well-known countries of Vietnam, Bhutan, and the regions of Latin America, Africa, and Oceania. Focusing on changes within countries and transnationally, this section also contains chapters that focus explicitly on globalization, such as Buddhist international organizations and diasporic communities. The second section tracks the relationship between Buddhist traditions and particular themes. These chapters review Buddhist interactions with contemporary topics such as violence and peacebuilding, and ecology, as well as Buddhist influences in areas such as medicine and science. Offering coverage

that is both expansive and detailed, *The Oxford Handbook of Contemporary Buddhism* delves into some of the most debated and contested areas within Buddhist Studies today.

This book examines the worship of devas and demons in Sri Lanka, illustrating how diverse influences interacted to create the Sinhala Buddhist cosmology. The work explains the processes by which apotheosis plays an important role in revitalizing that cosmology. The author offers an examination of holy sites associated with the worship of Hūniyam. These sacred spaces each have a unique background historically, and the ritualists associated with these sites have divergent understandings concerning Hūniyam. Building upon the examination of the temples, the book delves into the iconography of Hūniyam, illustrating his transformation from demon to deity in the manner that he is depicted in imagery associated with his worship. The book moves to a discussion of Ariṭṭa Kivenḍu Perumā, a South Indian adventurer, demonstrating the likelihood that he is the historical figure later apotheosized as Hūniyam. Sri Lankan society felt his impact so strongly, that in death he became a demon in the Sinhala Buddhist cosmology. Finally, the book demonstrates that the same apotheosis processes are at work today. This book will be of interest to researchers and students engaged in the study of religion, anthropology, folklore, and history, specifically in the South Asian context.

Thirty years ago, Hu Shih's views of Chinese society and history were representative of Sinology in general: China itself had no native religion, just local customs; its only real religion was an import, Buddhism. These views have now been completely overturned, with massive implications for our understanding not only of China but also of humanity as a whole: it is no longer possible to imagine that at least one major traditional society constructed and construed itself without reference to a non-mundane world that permeated every facet of society, and it therefore becomes indispensable for students of China to take the history of Chinese religion into account and for students of religion to take into account the Chinese experience of and Chinese categories for dealing with religious phenomena. The present volumes contain a selection of twenty-one essays presented in a conference convened jointly by the Ecole française d'Extrême-Orient and the Centre for the Study of Religion and Chinese Society of the Chinese University of Hong Kong, on "Religion and Chinese Society: The Transformation of a Field and Its Implications for the Study of

Chinese Culture" held on May 29-June 2, 2000. The collection aims at providing as wide a coverage as possible of recent research in the history of Chinese religion and seeks to draw some tentative conclusions about the implications for the study of Chinese religion and society in general.

This interdisciplinary study is the first book to provide a complete survey of Śrī Nālandā Mahāvihāra from the perspective of its educational curricula as well as its religious influence. It provides detailed descriptions of the origin, growth, management, and academic and cultural life of Nālandā, with particular attention to its pedagogy, curriculum, teachers, and students. It also presents an alternative interpretation of nationalist and popular notions about Śrī Nālandā as an international university and proves that it was, at its core, a Buddhist monastery and an institution of Buddhist learning focused on the study and promotion of Buddhism.

Upon entering a Japanese Buddhist temple in Hawai'i, most people—whether first-time visitors or lifelong members—are overwhelmed by the elaborate and complex display of golden ornaments, intricately carved altar tables and incense burners, and images of venerable masters and bodhisattvas. These objects, as well as the architectural elements of the temple itself, have meanings that are often hidden in ancient symbolisms. This book, written by two local authorities on Japanese art and religion, provides a thorough yet accessible overview of Buddhism in Hawai'i followed by a temple-by-temple guide to the remaining structures across the state. Introductory chapters cover the basic history, teachings, and practices of various denominations and the meanings of objects commonly found in temples. Taken together, they form a short primer on Buddhism in Japan and Hawai'i. The heart of the book is a narrative description of the ninety temples still extant in Hawai'i. Augmented by over 350 color photographs, each entry begins with historical background information and continues with descriptions of architecture, sanctuaries,

statuary and ritual implements, columbariums, and grounds. Appended at the end is a chart listing each temple's denomination, membership number, and architectural type. While many Buddhist temples in Hawai'i are active social and religious centers, a good number are in serious decline. In addition to being an introduction to Buddhism and a guide book, Japanese Buddhist Temples in Hawai'i is an indispensable historical record of what exists today and what may be gone tomorrow. It will appeal to temple members, pilgrims, residents and tourists interested in local cultural and historic sites, and historians of Buddhism in Hawai'i.

Combining evocative historical description and cogent analysis, Song Full of Tears is a chronicle of nine hundred years of life in southeast China. It reveals the workings of Chinese society in times of environmental and military crises, how the Chinese reacted to changes, threats, and opportunities, and how they dealt with one another and the world of nature and the environment. Until the 18th century, Xiang Lake, in the province of Zhejiang, was the stage for morality battles between loyalty and betrayal, chastity and impurity, civic virtue and private greed. After the 18th century, concerns about ecology, public rights, and technology emerged as elements in the struggle, and in the 20th century, the fate of the lake became linked to national political developments and then to technological and ecological realities. Song Full of Tears shows how Chinese views of life, society, and nature both changed and remained constant through the centuries. The paperback will include a new epilogue by the author.
