From the Newbery Award-winning author of Across Five Aprils and Up a Road Slowly comes a tale of a brave young man’s struggle to find his own strength during the Great Depression. “A powerfully moving story.”—Chicago Daily News In 1932, American’s dreams were simple: a job, food to eat, a place to sleep, and shoes without holes. But for millions of people these simple needs were nothing more than dreams. At fifteen years of age, Josh has to make his own way through a country of angry and frightened people. This is the story of a young man’s struggle to find a life for himself in the most turbulent of times.

The gripping history of Afro-Latino migrants who conspired to overthrow a colonial monarchy, end slavery, and secure full citizenship in their homelands In the late nineteenth century, a small group of Cubans and Puerto Ricans of African descent settled in the segregated tenements of New York City. At an immigrant educational society in Greenwich Village, these early Afro-Latino New Yorkers taught themselves to be poets, journalists, and revolutionaries. At the same time, these individuals—including Rafael Serra, a cigar maker, writer, and politician; Sotero Figueroa, a typesetter, editor, and publisher; and Gertrudis Heredia, one of the first women of African descent to study midwifery at the University of Havana—built a political network and articulated an ideal of revolutionary nationalism centered on the projects of racial and social justice. These efforts were critical to the poet and diplomat Jos é Mart í ’s writings about race and his bid for leadership among Cuban exiles, and to the later struggle to create space for black political participation in the Cuban Republic. In Racial Migrations, Jesse Hoffnung-Garskof presents a vivid portrait of these largely forgotten migrant revolutionaries, weaving together their experiences of migrating while black, their relationships with African American civil rights leaders, and their evolving participation in nationalist political movements. By placing Afro-Latino New Yorkers at the center of the story, Hoffnung-Garskof offers a new interpretation of the revolutionary politics of the Spanish Caribbean, including the idea that Cuba could become a nation without racial divisions. A model of transnational and comparative research, Racial Migrations reveals the complexities of race-making within migrant communities and the power of small groups of immigrants to transform their home societies.

I had to accept that I wasn’t just Arthur Leywin anymore, and that I could no longer be limited by the circumstances of my birth. If I was going to escape, if I was going to go toe-to-toe with the most powerful beings in this world, I needed to push myself to my utmost limit...and then I needed to push even further. After nearly dying as a victim of his own strength, Arthur Leywin wakes to find himself far from the continent where he was born for the second time. Alone, broken, and with no way to tell his family he’s alive, Arthur must rebuild his strength to survive. As he ascends through an ancient dungeon filled with hostile beasts and devious trials, he discovers an ancient, absolute power - a power that will either ruin him or take him to new heights. But the dungeon won’t give up its knowledge easily. Before he can plunder its depths, Arthur must learn to untangle the threads of fate. He must band together with the unlikeliest of allies if he hopes to escape with his life.

This two-volume set represents a second edition of the original Infectious Diseases and Pathology of Reptiles alongside a new book that covers noninfectious diseases of reptiles. Together, these meet the need for an entirely comprehensive, authoritative single-source reference. The volumes feature color photos of normal anatomy and histology, as well as gross, light, and electron microscopic images of infectious and noninfectious diseases of reptiles. The most detailed and highly illustrated reference on the market, this two-volume set includes definitive information on every aspect of the anatomy, pathophysiology, and differential diagnosis of infectious and noninfectious diseases affecting reptiles.

Michele Reid-Vazquez reveals the untold story of the strategies of negotiation used by free blacks in the aftermath of the “Year of the Lash”—a wave of repression in Cuba that had great implications for the Atlantic World in the next two decades. At dawn on June 29, 1844, a firing squad in Havana executed ten accused ringleaders of the Conspiracy of La Escalera, an alleged plot to abolish slavery and colonial rule in Cuba. The condemned men represented prominent members of Cuba’s free community of African descent, including the acclaimed poet Plácido (Gabriel de la Concepción Valdés). In an effort to foster a white majority and curtail black rebellion, Spanish colonial authorities also banished, imprisoned, and exiled hundreds of free blacks, dismantled the militia of color, and accelerated white immigration projects. Scholars have debated the existence of the Conspiracy of La Escalera for over a century, yet little is known about how those targeted by the violence responded. Drawing on archival material from Cuba, Mexico, Spain, and the United States, Reid-Vazquez provides a critical window into understanding how free people of color challenged colonial policies of terror and pursued justice on their own terms using formal and extralegal methods. Whether rooted in Cuba or cast into the Atlantic World, free men and women of African descent stretched and broke colonial expectations of their codes of conduct locally and in exile. Their actions underscored how black agency, albeit fragmented, worked to destabilize repression’s impact.

Bringing Spanish to Life provides an innovative and refreshing cross-curricular approach to teaching languages in primary schools, combining art, design and foreign languages with various aspects of the National Primary Curriculum such as Literacy, Numeracy and PE. This unique practical resource comprises an engaging storyline about a day in the life of two Spanish children and gives an opportunity for learners to re-enact their day, using finger puppets, handmade crafts and exciting games to practise new language. Each of the 14 sections begins with a short accessible dialogue in Spanish and is followed by suggestions for using the new vocabulary in pairs, small groups or as a whole class. The main story is accompanied by fun craft activities linked to the story (one for each section, ie 14 in total) for children to create in class using the templates and instructions provided. A wide range of further activities follows, consisting of lively games, songs and opportunities to communicate simple ideas. Language extensions are suggested, focussing on imaginative writing and reading ideas linked to the theme of each section. Written to support the new foreign languages programme of study, the book also includes:
* Cross-curricular links to numerous subjects including Literacy, Numeracy, PE and ICT
* Classroom games and activities
* Photocopiable resources and templates for fun classroom activities and projects
* Language extension activities. Bringing Spanish to Life can be read on three levels to suit a variety of classroom situations. First, the story can be told ‘straight’ with the whole class participating in the dialogues. Second, the story can be combined with the craft activities after each main section. 14 doing and making activities match the storyline and provide a colourful, eye catching display and learning focus in the classroom or for Open Days or Assemblies. Teachers can use as many or as few as they wish. The resultant crafts can be used for very effective classroom displays/open days/assemblies etc. Finally, the language extension activities can be used alongside the art/craft/design activities as desired. The aim of these activities is to extend the target language in a relevant context through a variety of methods such as songs, playlets, simple communicative exchanges, games with numbers etc.

This book offers a diversification model of transplanted languages that facilitates the exploration of external factors and internal changes. The general context is the New World and the variety that unfolded in the Central Highlands and the Gulf of Mexico, herein identified as Mexican Colonial Spanish (MCS). Linguistic corpora provide the evidence of (re)transmission, diffusion, metalinguistic awareness, and select focused variants. The tridimensional approach highlights language data from authentic colonial documents which are connected to socio-historical reliefs at particular periods or junctions, which explain language variation and the dynamic outcome leading to change. From the Second Letter of Hernán Cortés (Seville 1522) to the decades preceding Mexican Independence (1800-1821) this book examines the variants transplanted from the peninsular tree into Mesoamerican lands: leveling of sibilants of late medieval Spanish, direct object (masc. sing.] pronouns LO and LE, pronouns of address (vos, tu, vuestra merced plus plurals), imperfect subjunctive endings in -SE and -RA), and Amerindian loans. Qualitative and quantitative analyses of variants derived from the peninsular tree show a gradual process of attrition and recovery due to their saliency in the new soil, where they were identified with ways of speaking and behaving like Spanish speakers from the metropolis. The variants analyzed in MCS may appear in other regions of the Spanish-speaking New World, where change may have proceeded at varying or similar rates. Additional variants are classified as optimal residual (e.g. dizque) and popular residual (e.g. vide). Both types are derived from the medieval peninsular tree, but the former are vital across regions and social strata while the latter may be restricted to isolated and / or marginal speech communities. Each of the ten chapters probes into the pertinent variants of MCS and the stage of development by century. Qualitative and quantitative analyses reveal the trails followed by each select variant from the years of the Second Letter (1520-1522) of Hernán Cortés to the end of the colonial period. The tridimensional historical sociolinguistic model offers explanations that shed light on the multiple causes of change and the outcome that eventually differentiated peninsular Spanish tree from New World Spanish. Focused-attrition variants were selected because in the process of transplantation, speakers assigned them a social meaning that eventually differentiated the European from the Latin American variety. The core chapters include narratives of both major historical events (e.g. the conquest of Mexico) and tales related to major language change and identity change (e.g. the socio-political and cultural struggles of Spanish speakers born in the New World). The core chapters also describe the strategies used by prevailing Spanish speakers to gain new speakers among the indigenous and Afro-Hispanic populations such as the appropriation of public posts where the need arose to file documents in both Spanish and Nahuatl, forced and free labor in agriculture, construction, and the textile industry. The examples of optimal and popular residual variants illustrate the trends unfolded during three centuries of colonial life. Many of them have passed the test of time and have survived in the present Mexican territory; others are also vital in the U.S. Southwestern states that once belonged to Mexico. The reader may also identify those that are used beyond the area of Mexican influence. Residual variants of New World Spanish not only corroborate the homogeneity of Spanish in the colonies of the Western Hemisphere but the speech patterns that were unwrapped by the speakers since the beginning of colonial times: popular and cultured Spanish point to diglossia in monolingual and multilingual communities. After one hundred years of study in linguistics, this book contributes to the advancement of newer conceptualization of diachrony, which is concerned with the development and evolution through history. The additional sociolinguistic dimension offers views of social significant and its thrilling links to social movements that provoked a radical change of identity. The amplitude of the diversification model is convenient to test it in varied contexts where transplantation occurred.

"In Muslims in Spain, 1492-1814: Living and Negotiating in the Land of the Infidel, Eloy Martín-Corrales surveys Hispano-Muslim relations from the late fifteenth to the eighteenth centuries, a period of chronic hostilities. Nonetheless there were thousands of Muslims in Spain during this time: ambassadors, exiles, merchants, converts, and travelers. Their negotiating strategies and the necessary support they found on both shores of the Mediterranean prove that relations between Spaniards and Muslims were based on reasons of state and a pragmatism that generated intense ties, both political and economic. These increased enormously after the peace treaties that Spain signed with Muslim countries between 1767 and 1791"--

☒ World War I was a global cataclysm that toppled centuries-old dynasties and launched "the American century." Yet at the outset few Americans saw any reason to get involved in yet another conflict among the crowned heads of Europe. Despite its declared neutrality, the U.S. government gradually became more sympathetic with the Allies, until President Woodrow Wilson asked Congress to declare war on Germany to "make the world safe for democracy." Key to this shift in policy and public opinion was the belief that the English-speaking peoples were inherently superior and fit for world leadership. Just before the war, British and American elites set aside former disputes and recognized their potential for dominating the international stage. By casting Germans as "barbarians" and spreading stories of atrocities, the Wilson administration persuaded the public—including millions of German Americans—that siding with the Allies was a just cause.

What did great adventurers eat during their expeditions to the far corners of the world? How did they view the role of food in their survival and wellbeing? What about hikers and backpackers today who set out to enjoy nature, pushing their own boundaries of comfort for adventure. How does food impact their experience? And what do have in common with pilgrims and soldiers? Food is a significant element of our relationship with nature. Whether a historical expedition or a weekend camping trip, a journey made on foot requires sustenance. Without mastering our relationship with food we would have not been to the South Pole or summited Mt. Everest or expanded to the west of America. However, in the reporting of these expeditions so far food has rarely taken a central role. It is possible to take a different stance and look at our time on trails with food as the leading character. Here, Demet Güzey offers a fun and interesting read on the social and cultural history, developments and challenges in food on the trail and in the wild. She explores personal accounts, news articles and anecdotes to highlight how food has accompanied us in mountaineering, desert travel, and pilgrimage, in the army or on the street. From tinned foods to foraging in the wild, worm-infested hardtack to palate-dulling army rations, loss of appetite in high altitude to starvation in the trenches, no stone is left unturned in this tour of how we manage food on foot, and how disasters happen when we do not manage it so well. Readers will delight in both the stories of many of the famous explorations and the more current journeys.
