This third edition of this text presents the major grammatical contrasts between English and Spanish in a simple and direct manner that is ideal for teachers of either language. This book addresses difficult grammatical topics for the English speaker, such as the question of aspect (preterit/imperfect) and the Spanish rorindicative/subjunctive; the English modal auxiliary system; and other challenging topics for the Spanish speaker. This reworked and expanded edition presents a complete inventory of all the major inter-lingual contrasts, emphasizing those contrasts that pose difficulties for teachers and students alike. The text features numerous exercises and, new with this edition, an extensive glossary of grammatical terms. Spanish is the main, usually the sole official language of twenty-one countries,} and it is set fair to overtake English by the year 2000 in numbers 2 of native speakers. This vast geographical and political diversity ensures that Spanish is

a good deal less unified than French, German or even English, the latter more or less internationally standardized according to either American or British norms. Until the 1960s, the criteria of internationally correct Spanish were dictated by the Real Academia Espanola, but the prestige of this institution has now sunk so low that its most solemn decrees are hardly taken seriously - witness the fate of the spelling reforms listed in the Nuevas normas de prosodia y ortograjia, which were supposed to come into force in all Spanish-speaking countries in 1959 and, nearly forty years later, are still selectively ignored by publishers and literate persons everywhere. The fact is that in Spanish 'correctness' is nowadays decided, as it is in all living languages, by the consensus of native speakers; but consensus about linguistic usage is obviously difficult to achieve between more than twenty independent, widely scattered and sometimes mutually hostile countries. Peninsular Spanish is itself in flux.

Offers some theoretical innovations in teaching foreign languages and reports how they have been applied to curriculum development and experimental courses at the upper secondary and college levels. Approaches language learning as comprising several dimensions, including grammatical competence, change in attitudes, learning about another culture, and reflecting on one's own. **Gattegno wrote this book as a scientist interested in learning processes, as a student interested in the mastery of foreign languages, and as a teacher interested in providing his students with ideal learning conditions. These perspectives combined with years of research, travel, and fieldwork create a full insight into the problem of learning a foreign language. He argues that learning a language should not be about recitation and memorization, but about the natural learning processes we have used since birth. "In fact," he writes, "We can no more say that we remember our language than that we remember how to**
