Seminar paper from the year 2013 in the subject Business economics - Miscellaneous, grade: A, University of South Australia, language: English, abstract: McDonald created a global advisory council which is entrusted with the duty of providing recommendations on nutrition. McDonald's has spearheaded a program to introduce healthy food for some customers. Customers can select hamburgers or salads depending upon their needs and requirements. Additionally, apples can be selected for children when parents purchase Happy Meals. McDonald's products are filled with nutritional information which offers better choices and autonomy to customers. McDonald's aggressive business strategy is based upon the premise that its restaurants should be located at strategic locations. Burger King's management is dynamic because it always seeks to utilize the power of new media as a means of ensuring that organizational targets are attained in an effectual manner. Burger King has strived to harness the power of social media to launch new products, track customer feedback, and respond to complaints. Burger King is also successful because of its innovative products like its Whopper. French Toast Sticks, Caesar salads, veggie burgers, and others are examples of innovative products that are offered to customer segments. Burger King has always had a limited menu but it has focused on niche markets. The development of a comprehensive supply chain

management system means that KFC can control the power of its suppliers. It trains suppliers so that the adequate standards of hygiene and safety can be maintained. Additionally, it has a monitoring and auditing mechanism to ensure that suppliers comply with the organizational standards and requirements. KFC's training program for its workforce is based upon imparting technical, managerial, and communication skills. FOUNDATIONS OF BUSINESS, 4E gives readers the comprehensive preparation they'll need to succeed in today's competitive business world. By providing a brief survey of business, including management and organization, marketing, social media and e-business, information systems, accounting, and finance, this text introduces the reader to core business practices. In addition, the authors address other important concepts such as ethics and social responsibility, forms of ownership, small business concerns and entrepreneurship, and international business. This edition is filled with cutting-edge content, including up-to-date information on the economic crisis, social networking, competition in the global marketplace, and the green movement, as well as suggestions on how to manage a business in the midst of economic ups and downs. An abundance of study aids also is available within the text and on the student companion website to help you achieve success in the course and in today's competitive business world. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

In *Strategic Management: Theory and Practice, Fourth Edition*, John A. Parnell leads readers through detailed, accessible coverage of the strategic management field. Concise and easy to understand chapters address concepts sequentially, from external and internal analysis to strategy formulation, strategy execution, and strategic control. Rather than relegating case analysis to a chapter at the end of the book, Parnell aligns each chapter's key concepts with 25 case analysis steps. Current examples and high interest real-time cases, largely drawn from *The Wall Street Journal* and *Financial Times*, illustrate the key role of strategic management in the United States and around the world.

Document from the year 2015 in the subject Business economics - Operations Research, , language: English, abstract: This report is based on an evaluation and selection of differentiation as a strategy that McDonald's should pursue in order to realise growth and competitive advantage in the fast food industry. As the business environment changes, businesses are forced to change their strategies in an attempt to adapt to the changing environment neither as a means of survival, or in order to prosper. In such a case, determining the strategic position of a firm is crucial. Johnson, Scholes and Whittington define strategy as "the direction and scope of an organisation over the long term, which achieves advantage in a changing environment through its configuration of resources and competences with the aim of fulfilling stakeholder expectations". The three key generic strategies that a business can use are: differentiation, focus, and cost leadership.

McDonald's is a leading multinational player in the fast foods industry that is famous for providing basic fast-food items at low cost. The firm has been very successful in implementing this strategy by taking advantage of its high bargaining power to acquire raw materials cheaply thus passing the benefits of costs savings to the end-consumer. While this strategy worked during the introductory phase of the company's business operations, McDonald's has now been forced to pursue a growth strategy by ensuring quality and product differentiation.

The twentieth century witnessed an era of unprecedented, large-scale, anthropogenic changes to the natural environment. Understanding how environmental factors directly and indirectly affect the emergence and spread of infectious disease has assumed global importance for life on this planet. While the causal links between environmental change and disease emergence are complex, progress in understanding these links, as well as how their impacts may vary across space and time, will require transdisciplinary, transnational, collaborative research. This research may draw upon the

expertise, tools, and approaches from a variety of disciplines. Such research may inform improvements in global readiness and capacity for surveillance, detection, and response to emerging microbial threats to plant, animal, and human health. The Influence of Global Environmental Change on Infectious Disease Dynamics is the summary of a workshop hosted by the Institute of Medicine Forum on Microbial Threats in September 2013 to explore the scientific and policy implications of the impacts of global environmental change on infectious disease emergence, establishment, and spread. This report examines the observed and potential influence of environmental factors, acting both individually and in synergy, on infectious disease dynamics. The report considers a range of approaches to improve global readiness and capacity for surveillance, detection, and response to emerging microbial threats to plant, animal, and human health in the face of ongoing global environmental change. Almost every company creates a marketing plan each year, and many spend hundreds of employee hours researching, preparing and presenting their tomes to senior executives. But most marketing plans are a waste of time; they are too long, too complicated and too dense. They end up sitting on a shelf, unread and unrealized. Breakthrough Marketing Plans is an essential tool for people who create marketing plans and people who review them. The book provides simple, clear frameworks that are easy to apply, and highlights why marketing plans matter, where they go wrong and how to create a powerful plan that will help build a strong, profitable business. Technology Ventures is the first textbook to thoroughly examine a global phenomenon known as technology entrepreneurship. Now in its second edition, this book integrates the most valuable entrepreneurship and technology management theories from some of the world's leading scholars and educators with current examples of new technologies and an extensive suite of media resources. Dorf and Byers comprehensive collection of action-oriented concepts and applications provides both students and professionals with the tools necessary for success in starting and growing a technology enterprise. Technology Ventures details the critical differences between scientific ideas and true

business opportunities.

Document from the year 2013 in the subject Business economics - Company formation, Business Plans, grade: 1,5, Novancia Business School Paris, language: English, abstract: What the German playwright and poet already understood in the 18th century has by now gained center stage. In our modern, globalized world, the ability to speak foreign languages has become a person's main asset, opening the door to different cultures, human enrichment and international success. When italki's co-founder, the American entrepreneur Kevin Chen, went to Shanghai to learn Mandarin Chinese, he got the vision to make learning languages a social experience. Today, the Company founded together with current Chief Executive Officer (CEO) Yongyue Jiang is one of the leading social networking sites in this field (cf. italki.com, Inc., 2012). In the following, this paper is going to analyze italki's business model using the Business Model Canvas, a strategic and entrepreneurial management tool developed by Osterwalder & Pigneur (2010). This will also provide a basis to develop ideas related to a possible business model evolution in the near future. To start, a short overview of the Company and its main features is given.

A collection of essay and cases on customer-centered marketing by educators and practitioners in the field. "As long as there have been buyers, makers and sellers, there have been marketing challenges and opportunities. Historically ... the seller had immediate and personal contact with the buyer in the market [or] the bazaar ... While the system was personal, it wasn't very efficient ... As the marketplace evolved, it became more complex, [and] the makers and sellers invented what we now call "marketing" to

solve the lack of maker/buyer closeness. In its simplest form, marketing is ... a number of activities makers/sellers use in an attempt to close the gap between themselves and the buyer. For example, the maker/seller now uses tools such as customer research, logistics, and distribution, marketing communication, and the like." From Part I, Reading 1.

book shows how to: · Draw up an outline e-marketing plan · Evaluate and apply e-marketing principles & models · Integrate online and offline communications · Implement customer-driven e-marketing · Reduce costly trial and error · Measure and enhance your e-marketing · Drive your e-business forward As the core text for the CIM's new professional E-marketing Award, it provides comprehensive, critical coverage of the key areas of e-marketing planning for marketing professionals. Established marketing concepts such as customer relationship management, the marketing mix and the widely adopted SOSTAC® planning system, are re-examined in the new media context - and new approaches are defined, including business models, traffic building and web site design.

This open access book focuses on both the theory and practice associated with the tools and approaches for decisionmaking in the face of deep uncertainty. It explores approaches and tools supporting the design of strategic plans under deep uncertainty, and their testing in the real world, including barriers and enablers for their use in practice. The book broadens traditional approaches and tools to include the analysis of actors and networks related to the problem at hand. It also shows how lessons learned in the application process can be used to improve the approaches and tools used in the design process. The book offers guidance in identifying and applying

appropriate approaches and tools to design plans, as well as advice on implementing these plans in the real world. For decisionmakers and practitioners, the book includes realistic examples and practical guidelines that should help them understand what decisionmaking under deep uncertainty is and how it may be of assistance to them. Decision Making under Deep Uncertainty: From Theory to Practice is divided into four parts. Part I presents five approaches for designing strategic plans under deep uncertainty: Robust Decision Making, Dynamic Adaptive Planning, Dynamic Adaptive Policy Pathways, Info-Gap Decision Theory, and Engineering Options Analysis. Each approach is worked out in terms of its theoretical foundations, methodological steps to follow when using the approach, latest methodological insights, and challenges for improvement. In Part II, applications of each of these approaches are presented. Based on recent case studies, the practical implications of applying each approach are discussed in depth. Part III focuses on using the approaches and tools in real-world contexts, based on insights from real-world cases. Part IV contains conclusions and a synthesis of the lessons that can be drawn for designing, applying, and implementing strategic plans under deep uncertainty, as well as recommendations for future work. The publication of this book has been funded by the Radboud University, the RAND Corporation, Delft University of Technology, and Deltares.
