James W. Martin is a Florida Bar Board Certified Real Estate Lawyer and Adjunct Professor of Law at Stetson University College of Law who, for over forty years, has practiced Florida real estate, wills, trusts, probate, corporations, nonprofits, and business law. The author has seen too many corporations improperly formed and maintained. Some failed to issue stock; others failed to hold annual meetings and file annual reports; and others failed to maintain corporate records. Failure to comply with the basics of corporate law have resulted in real estate title problems, litigation, and potential personal liability. This book provides a step-by-step process with forms and checklists for forming and maintaining Florida business corporations to avoid these problems. It is primarily directed to lawyers because Florida corporations are legal entities created under the Florida Business Corporation Act, so having a law degree really should be a prerequisite to forming and maintaining corporations. However, the author realizes that we live in an age where nonlawyers freely access these materials on the Internet, so he has written this book in plain language that does not require a law degree to understand. But his message for nonlawyers reading this book is to be sure to engage a Florida-licensed lawyer on their behalf to review any document before it is signed or filed.

The ABA Journal serves the legal profession. Qualified recipients are lawyers and judges, law students, law librarians and associate members of the American Bar Association.

Comparative Company Law provides a systematic and coherent exposition of company law across jurisdictions, augmented by extracts taken from key judgments, legislation, and scholarly works. It provides an overview of the legal framework of company law in the US, the UK, Germany, and France, as well as the legislative measures adopted by the EU and the relevant case law of the Court of Justice. The comparative analysis of legal frameworks is firmly grounded in legal history and legal and economic theory and bolstered by numerous extracts (including extracts in translation) that offer the reader an invaluable insight into how the law operates in context. The book is an essential guide to how company law cuts across borders, and how different jurisdictions shape the corporate lifespan from its

formation by way of incorporation to its demise (corporate insolvency) and eventual dissolution. In addition, it offers an introduction to the nature of the corporation, the framework of EU company law, incorporation and corporate representation, agency problems in the firm, rights of stakeholders and shareholders, neutrality and defensive measures in corporate control transactions, legal capital, piercing the corporate veil, and corporate insolvency and restructuring law.

Across an amazing sweep of the critical areas of business regulation - from contract, intellectual property and corporations law, to trade, telecommunications, labour standards, drugs, food, transport and environment - this book confronts the question of how the regulation of business has shifted from national to global institutions. Based on interviews with 500 international leaders in business and government, this book examines the role played by global institutions such as the WTO, the OECD, IMF, Moody's and the World Bank, as well as various NGOs and significant individuals. The authors argue that effective and decent global regulation depends on the determination of individuals to engage with powerful agendas and decision-making bodies that would otherwise be dominated by concentrated economic interests. This book will become a standard reference for readers in business, law, politics and international relations.

What are the challenges to the prevention of transnational bribery by multinational corporations in international business transactions? This book examines two particular constraints operating on the regulation of transnational corruption in general and bribery in particular. Firstly, it explores the limits of international cooperation in the regulation of transnational corruption and highlights the disparities between the capacities of individual states to pursue adequate regulation. It also considers the role and progress of international bodies such as the OEDC and the response of selected domestic legal systems in tackling the problem. Secondly, the book examines the liability regime for corporations and again, highlights an unexpected shortcoming of multilateral policy in the administration and enforcement of international agreements. The book will be of value both to students and researchers with an interest in the regulation of transnational corruption as well as policy-makers and practitioners working in this area.
