Prepare to achieve AWS Machine Learning Specialty certification with this complete, up-to-date guide and take the exam with confidence Key FeaturesGet to grips with core machine learning algorithms along with AWS implementationBuild model training and inference pipelines and deploy machine learning models to the Amazon Web Services (AWS) cloudLearn all about the AWS services available for machine learning in order to pass the MLS-C01 examBook Description The AWS Certified Machine Learning Specialty exam tests your competency to perform machine learning (ML) on AWS infrastructure. This book covers the entire exam syllabus using practical examples to help you with your real-world machine learning projects on AWS. Starting with an introduction to machine learning on AWS, you'll learn the fundamentals of machine learning and explore important AWS services for artificial intelligence (AI). You'll then see how to prepare data for machine learning and discover a wide variety of techniques for data manipulation and transformation for different types of variables. The book also shows you how to handle missing data and outliers and takes you through various machine learning tasks such as classification, regression, clustering, forecasting, anomaly detection, text mining, and image processing, along with the specific ML algorithms you need to know to pass the exam. Finally, you'll explore model evaluation, optimization, and deployment and get to grips with deploying models in a production environment and monitoring them. By the end of this book, you'll have gained knowledge of the key challenges in machine learning and the solutions that AWS has released for each of them, along with the tools, methods, and techniques commonly used in each domain of AWS ML. What you will learnUnderstand all four domains covered in the exam, along with types of questions, exam duration, and scoringBecome well-versed with machine learning terminologies, methodologies, frameworks, and the different AWS services for machine learningGet to grips with data preparation and using AWS services for batch and real-time data processingExplore the built-in machine learning algorithms in AWS and build and deploy your own modelsEvaluate machine learning models and tune hyperparametersDeploy machine learning models with the AWS infrastructureWho this book is for This AWS book is for professionals and students who want to prepare for and pass the AWS Certified Machine Learning Specialty exam or gain deeper knowledge of machine learning with a special focus on AWS. Beginner-level knowledge of machine learning and AWS services is necessary before getting started with this book.

A brand new collection of state-of-the-art guides to business innovation and transformation 4 authoritative books help you infuse innovation throughout everything your business does: not just once, but constantly! This extraordinary collection shows how to make breakthrough, high-profit innovation happen – again and again. Start with the recently updated edition of Making Innovation Work: a formal innovation process proven to help ordinary managers drive top and bottom line growth from innovation. This guidebook draws on unsurpassed innovation consulting experience, and the most thorough review of innovation research ever performed. It shows what works, what doesn't, and how to use management tools and metrics to dramatically increase the payoff of innovation investments. You'll learn to define the right strategy for effective innovation; structure organizations, management systems, and incentives for innovation, and much more. Next, Innovation: Fast Track to Success helps you get six key things right about innovation: planning, pipeline, process, platform, people, and performance. You'll learn how to deeply integrate innovation throughout team structure, so you can move from buzzwords to achievement. Then, in Disrupt: Think the Unthinkable to Spark Transformation in Your Business, frog design's Luke Williams shows how to start generating (and executing on) a steady stream of disruptive strategies and unexpected solutions. Williams combines the fluid creativity of "disruptive thinking" with the analytical rigor that's indispensable to business success. The result: a simple yet complete five-stage process for imagining a powerful market disruption, and transforming it into reality that can catch an entire industry by surprise. Finally, in the highly-anticipated Second Edition of Creating Breakthrough Products: Revealing the Secrets that Drive Global Innovation, Jonathan Cagan and Craig Vogel offer an indispensable roadmap for uncovering new opportunities, identifying what customers really value today, and building products and services that redefine (or create entirely new) markets. This edition contains brand-new chapters on service design and global innovation, new insights and best practices, and new case studies ranging from Navistar's latest long-haul truck to P&G's reinvention of Herbal Essence. With even more visual maps and illustrations, it's even more intuitive, accessible, and valuable! From world-renowned business innovation and transformation experts Tony Davila, Marc Epstein, Robert Shelton, Andy Bruce, David Birchall, Luke Williams, Jonathan Cagan, and Craig Vogel

How do we ensure that implementations of Business Objects products are done in a way that ensures safety? For your Business Objects project, identify and describe the business environment. is there more than one layer to the business environment? Record-keeping requirements flow from the records needed as inputs, outputs, controls and for transformation of a Business Objects process. ask yourself: are the records needed as inputs to the Business Objects process available? How do you determine the key elements that affect Business Objects workforce satisfaction? how are these elements determined for different workforce groups and segments? Do you monitor the effectiveness of your Business Objects activities? Defining, designing, creating, and implementing a process to solve a business challenge or meet a business objective is the most valuable role... In EVERY company, organization and department. Unless you are talking a one-time, single-use project within a business, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?' For more than twenty years, The Art of Service's Self-Assessments empower people who can do just that - whether their title is marketer, entrepreneur, manager, salesperson, consultant, business process manager, executive assistant, IT Manager, CxO etc... - they are the people who rule the future. They are people who watch the process as it happens, and ask the right questions to make the process work better. This book is for managers, advisors, consultants, specialists, professionals and anyone interested in Business Objects assessment. Featuring 603 new and updated case-based questions, organized

into seven core areas of process design, this Self-Assessment will help you identify areas in which Business Objects improvements can be made. In using the questions you will be better able to: - diagnose Business Objects projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices - implement evidence-based best practice strategies aligned with overall goals - integrate recent advances in Business Objects and process design strategies into practice according to best practice guidelines Using a Self-Assessment tool known as the Business Objects Scorecard, you will develop a clear picture of which Business Objects areas need attention. Included with your purchase of the book is the Business Objects Self-Assessment downloadable resource, containing all 603 questions and Self-Assessment areas of this book. This enables ease of (re-)use and enables you to import the questions in your preferred Management or Survey Tool. Access instructions can be found in the book. You are free to use the Self-Assessment contents in your presentations and materials for customers without asking us - we are here to help. This Self-Assessment has been approved by The Art of Service as part of a lifelong learning and Self-Assessment program and as a component of maintenance of certification. Optional other Self-Assessments are available. For more information, visit http://theartofservice.com
