Globalisation, Employment and Education in Sri Lanka

This revised set of resources for Cambridge IGCSE, IGCSE (9-1) and O Level Business Studies syllabuses (0450, 0986, 7115) is thoroughly updated for first examinations from 2020. This coursebook contains exam-style case studies and stimulus material from businesses around the world - ranging from a social enterprise in China to a fast food outlet in Zimbabwe. These give an international view of the real world applications of Business Studies theory. This book provides comprehensive exam support with questions to help students practise and build their confidence with the subject. The final chapter gives revision tips and advice on writing well-structured answers. The answers to the coursebook questions are in the teacher's resource. For free revision support, go to the Cambridge University Press website.

Since the late 1970s, Sri Lanka has undergone a socio-economic transformation, from protectionism towards economic liberalisation and increasing integration into the world economy. Through a systematic comparison of these periods of economic change (1956–1977, and 1977 to the present), Angela W. Little and Siri T. Hettige examine the impact of this transformation on education, youth employment and equality of opportunity in Sri Lanka. The book charts Sri Lanka's shift from a predominantly agricultural economy to one dominated by services and manufacturing, a reduction in unemployment, rising educational and occupational levels, expectations and achievements, and a reduction in poverty. In turn, it reveals a growing role for the private sector and foreign interests in post-secondary education and a modest growth in private education at the primary and secondary levels, as well as widening social disparities in access to qualifications, training and skills. The Sri Lankan experience of, and engagement with, globalisation has been tempered by a long-running ethnic conflict that hindered economic and social development and diverted considerable public funds into defence and war. Now that the war is 'won', the challenge is how to invest in human resource

development and the fulfilment of the expectations of youth from all ethnic and social groups. This challenge requires serious policy analysis, the generation of more state revenues, the reallocation of existing public resources, and a political commitment to the winning of a sustainable peace and stability. This book makes an important contribution to the broader international literature on the implications of globalisation for education policy and practice, and to the interaction of exogenous and endogenous forces for educational change. It deals with the tension between the high social demand for education and the growing demand for specialised skills in a changing economy. As such, it has a wide interdisciplinary appeal across education policy and politics, Asian education, South Asian society, youth policy, sociology of education, political economy of social change, and globalisation. Completely updated to match the latest syllabuses, this rigorous student book provides comprehensive coverage along with relevant and up-to-date global examples and case studies. Brian Titley's stretching approach is trusted by teachers around the world to build potential for the Cambridgeexams, and students future careers. To support achievement and assessment confidence, comprehensive exam practice is included. Includes access to online content with additional exam-questions, exercises, model answers, and revision tips.

A real revolution is taking place in the way in which we conceptualise and practise education and learning. This book sets out to explore the immense impact which digital technology is having on education around the world and the ways in which it is used by a wide range of individuals and communities. Contributors analyse changes in technology such as e-mail, the Internet, digital video and other media, but also the effect of this new technology on the way people live and learn around the world. Cultural changes taking place range from the blurring of boundaries between formal and informal learning to the development of new 'virtual communities' which revolve around particular social or cultural interests, and which serve as a crucial tool and source of identity for spatially displaced communities such as refugees. Digital technology is changing the way we all live, and this book is an authoritative study of these changes in all their diversity. Encyclopedia of Education

Reissuing works originally published between 1971 and 1994, this collection includes books which offer a broad spectrum of views on curriculum, both within individual schools and the wider issues around curriculum development, reform and implementation. Some cover the debate surrounding the establishment of the national curriculum in the UK while others are a more international in scope. Many of these books go beyond theory to discuss practical issues of real curriculum changes at primary or secondary level. The Set includes books on cross-curricular topics such as citizenship and environment, and also guidance, careers, life skills and pastoral care in schools. A fantastic collection of education history with much still relevant today.

This edited volume brings together diverse thinkers and practitioners from the field of teaching and teacher education as it pertains to educational development in South Asia. In this volume, authors draw from their research, practice, and field experiences, showcasing how teaching and teacher education are currently being carried out, understood, theorized, debated, and implemented for the education of children and teachers alike in South Asia. The volume also includes practitioner voices, which are often marginalized in academic discourse. This book acts as a key reference text for academics and practitioners interested in the intersection of education and development in the region, and in particular what it takes to pull off ambitious teaching and teacher education in South Asia.
