

Business Studies November 2013 Question Paper

This book is one of the first of its kind to bring together a variety of perspectives on evaluation from a multidisciplinary international perspective. The book, with its content derived from leading experts in their chosen fields of practice, illustrates the potential of evaluation to demonstrate the impact and efficiency of social interventions. Examples are given of comparative effectiveness research, realist evaluation, and systematic reviews, as well as of holistic and authentic evaluation, the use of advisory groups, and qualitative needs assessment. The volume also presents some special evaluation tools used by national governments and which are used to influence a variety of professional practices. The key features of the book are:

- An international panel of experts sharing the expertise in evaluation.
- Multiple perspectives on evaluation theory, methodology and practices articulated through a range of interdisciplinary perspectives.
- A primary focus on client-, patient-, and, more generally, human-centredness.
- Practical examples of contrasting evaluation methods in use.
- Helpful tips and advice offered throughout.

The book is compiled from the work of the plenary speakers, plenary panel and selected workshop presentations at the 8th International Conference on Evaluation for Practice, Eval2012, held in Finland in 2012. The contributors come from Australia, Brazil, Finland, Ireland, Italy, Norway, the Republic of Korea, the UK, and the USA. In line with the traditions of the conference series, some contributions here are joint endeavours from academics and practitioners. Evaluation as a Tool for Research, Learning and Making Things Better is recommended for both academics and practitioners, and will be useful for individual researchers, researcher communities and students, who are interested in and conduct evaluation research in various contexts, including as part of service development programs, and for public and private organizations which pursue good service quality with an impact.

A university campus is a place with special resonance: conjuring images of cloistered quadrangles and wood-panelled libraries, often echoing centuries of scholarly tradition. And yet it is also a place of cutting-edge science, interactive learning, youth, vibrancy, and energy. It is this dual nature which makes the physical environment of a university so dynamic as well as a highly challenging landscape to design and manage successfully. Today, the scale of the pressures and the rate of change facing higher education institutions are greater than ever. Squeezed public spending, rising tuition fees and the growing education ambitions of developing nations are set against a backdrop of rapid technological progress and changing pedagogies. What are the repercussions for the physical realities of university planning and architecture? And how are university campuses adapting to contend with these pressures? University Trends introduces the most significant, widespread and thought-provoking trends in campus design today. Part 1 identifies current trends such as starchitecture, large-scale campus extensions, adaptive re-use, and international branch campuses. Part 2 profiles each trend via highly-illustrated, global case studies of well-publicised as well as lesser-known projects. The essential guide to current and future trends in campus design.

It is difficult to find an area of public policy more plagued by misunderstanding than energy policy. Even worse, every time the subject is raised, we are obligated to get mired in pointless arguments about the weather. This book helps set the record straight. Not convinced? Consider some of these inconvenient truths: The cost of green energy climate remediation is anywhere from 10 to 1,000 times greater than the damage from the climate change it attempts to alleviate. Obama's carbon tax would cost Americans \$1.2 trillion over just ten years, but would only reduce the midrange three-degree modeled twenty-second-century global temperature increase by 0.038 degrees Celsius. This is not another skeptical global warming polemic, but an economic evaluation of how and why green energy will fail. A thoroughly researched, heavily documented book by an expert in his field, it will demonstrate in meticulous detail how wasteful and economically inefficient Obama's green energy future will be compared to other worthy alternatives.

In his ground-breaking new textbook, Mick Fryer offers students of Business Ethics clear explanations of a range of theoretical perspectives, along with examples of how these perspectives might be used to illuminate the ethical challenges presented by business practice. The book includes: Realistic scenarios which gently introduce a theory and demonstrate how it can be applied to a real-life ethical dilemma that everyone can relate to, such as borrowing money from a friend Real organisational case studies in each chapter which illustrate how each theory can be applied to real business situations. Cases include Nike, Coca Cola, BMW, Shell, Starbucks and GSK 'Pause for Reflection' boxes and 'Discussion Questions' which encourage you to challenge the established notions of right and wrong, and empower you to develop your own moral code Video Activities in each chapter with accompanying QR codes which link to documentaries, films, debates and news items to get you thinking about real-life ethical dilemmas Visit the book's companion website for self-test questions, additional web links and more at: study.sagepub.com/fryer

Evaluation as a Tool for Research, Learning and Making Things Better

Saudi Arabia in a Multipolar World

A Global Perspective

An Unworthy Future

The Business Briefings series offers authoritative introductory textbooks in core business topics. Covering the basics and providing springboards to further study, the books take a no-nonsense practical approach, and are ideal as accessible introductions or as revision guides. This book explains what is required for carrying out a successful research project. Clear and well-structured, it allows students to quickly grasp key concepts in research methodology, taking them through the various stages of developing a dissertation in a step-by-step guide. Key benefits:

- Provides a concise and cogent guide to a challenging subject area
- Provides a step-by-step guide to writing a dissertation

Professor Peter Stokes is Deputy Dean at Chester Business School, University of Chester, UK. Dr Tony Wall is a Senior Lecturer (Associate Professor) at Chester Business School, University of Chester, UK. 'This book is a masterpiece of clarity. It brings to life research methodology as exciting exploration. Its approach is engaging, stimulating and stretching. The book demystifies research methods and makes them accessible. It is an essential text for all those developing their research approach.' – Peter Shaw, University of Chester and Newcastle University, UK

'This is an excellent account of the use of a variety of research methods in academic studies as well as in practical business settings. Stokes and Wall have made accessible, informative and interesting what is often seen as a difficult part of producing a dissertation or building evidence to support a business case.' – Wes Harry, Cass Business School, City University London, UK

'Stokes and Wall adapt the best research methods expertise and craft it into an approachable, accessible text. Their blend of instruction, examples, and vignettes enables readers to develop a thorough understanding of the content.' – Mitchell J. Larson, Lancashire Business School, University of Central Lancashire, UK

This book disentangles the complex meanings of responsibility in nanotechnology development by focusing on its theoretical and empirical dimensions. The notion of responsibility is extremely diversified in the public discourse of nanoscale technologies. Addressed are major disciplinary perspectives working on nanotechnology, e.g. philosophy, sociology, and political science, as well as the major multidisciplinary areas relevant to the innovation process, e.g. technology assessment and ethics. Furthermore, the interplay between such expertises, disciplines, and research programmes in providing a multidisciplinary understanding of responsibility is emphasized.

This series called Persian Gulf focuses on India's bilateral relations with the region and discusses the political, strategic, economic, energy, cultural and social relations. Backed by statistical information, it provides a comprehensive account of various aspects of the bilateral relations and gives detailed analytical insights into recent developments. It also delves into the internal dynamics of the Persian Gulf states, particularly focusing on the economic and political developments during 2013. Persian Gulf 2014, second in the series, examines the bilateral developments during 2013.

Selected Themes in African Political Studies

The accelerating cross-border flow of products, services, capital, ideas, technology and people is driving businesses--large and small--to internationalise. International Business 2nd Australasian edition: the New Realities is a rigorous resource which prepares future managers to operate successfully in multinational settings. Case studies from a wide variety of markets relevant to Australasian business, including ASEAN countries as well as China, India, Japan, South Korea, Pakistan, Europe and the Middle East, provide a real-world perspective to theories and examine the latest trends in international business. The second edition of International Business features 10 new in-depth case studies specially created for this edition. For undergraduate students majoring in international business or post-graduate courses in international business.

Samson/Daft/Donnet's Management is a robust foundation text providing a balance of broad, theoretical content with an engaging, easy-to-understand writing style. It covers the four key management functions - planning, organising, leading and controlling - conveying to students the elements of a manager's working day. Along with current management theory and practice, the authors integrate coverage of innovation, entrepreneurship, agile workplaces, social media and new technology throughout. This sixth edition features a new author on the team and contains updates to content based on recent research. Real-life local and international examples showcase the ongoing changes in the management world. Focusing on a 'skills approach', they bring concepts to life for students, supporting motivation, confidence and mastery. Each part concludes with a contemporary continuing case study, focusing on car company Toyota as it faces managerial challenges and opportunities in the region.

The questions surrounding how the Irish economy was brought to the brink - who was to blame, and who should pay for these mistakes - have been rightly debated at length. But beyond this very legitimate exercise, there are deeper questions that need to be answered. These questions relate to why we made the decisions we did, not just in the last ten years, but over the last eighty. How did certain industries become more prominent at the expense of others, banking as opposed to fisheries, international markets as opposed to indigenous industry and job creation? Are our problems structural in nature, and most importantly, what do we need to know to make sure that this crisis does not happen again? These are the questions set by this book. It will look at the development of the Irish economy over the past eight decades, and will argue that the 2008 financial crisis, up to and including the IMF bailout of 2010 and the subsequent change of government, cannot be explained simply by the moral failings of those in banking or property development alone. The problems are deeper, more intricate, and more dangerous if we remain unaware of them, but also potentially avoidable in the future if we break the cycle.

Offering the first empirically driven assessment of the development, marketisation, regulation and use of online gambling organisations and their products, this book explores the relationship between online gambling and crime. It draws upon quantitative and qualitative Fine data, including textual and visual analyses of e-gambling advertising and the records of player-protection and standards organisations, together with a virtual ethnography of online gambling subcultures, to examine the ways in which gambling and crime have been approached in practice by gamers, regulatory agencies and online gambling organisations. Building upon contemporary criminological theory, it develops an understanding of online gambling as an arena in which risks and rewards are carefully constructed and through which players navigate, employing their own agency to engage with the very real possibility of victimisation. With attention to the manner in which online gambling can be a source of criminal activity, not only on the part of players, but also criminal entrepreneurs and legitimate gambling businesses, Online Gambling and Crime discusses developments in criminal law and regulatory frameworks, evaluating past and present policy on online gambling. A rich examination of the prevalence, incidence and experience of a range of criminal activities linked to gambling on the Internet, this book will appeal to scholars and policy makers in the fields of sociology and criminology, law, the study of culture and subculture, risk, health studies and social policy.

These are turbulent times for American foreign policy. Nowhere are the challenges facing the United States more evident than in U.S. policy toward Russia. Drawing on scholars across several disciplines and perspectives, CSIS conducted a year-long study that sought to achieve two goals. First, to provide policymakers with a clearer understanding of Russia's strategic motivations and objectives, along with the tools it uses to advance its goals. Second, to lay out a comprehensive strategy to secure U.S. and transatlantic interests in the face of the complex Russia challenge set.

Strategy is vital to effective and efficient public service delivery as well as successful governance and leadership. This new text provides a concise yet systematic overview of the achievements, downfalls and complexities of public strategy in today's globalized and often market-driven world. It describes the place of strategy in civic societies whose citizens are more interconnected and vocal than ever. It shows that successful strategic planning goes well beyond problem-solving to developing adaptable plans that can evolve as requirements and circumstances change. And it explains why muddling through simply won't work. Emphasizing the importance of applying a variety of techniques to the process of strategy-creation, Rethinking Public Strategy reassesses the key factors that can deliver significant improvements in public services and build public value. It looks at why public strategy is distinctive, as well as the principles it has in common with the corporate domain. This text includes numerous case studies from around the globe - from South Africa to Singapore, the USA to Germany, and from China to the Czech Republic - that ground the exposition in real experience. Based on state-of-the-art research by two expert practitioners in the field, it offers an essential guide to the art of strategy in the contemporary public sector, and encourages readers to evaluate critically the various approaches to strategy.

Examine strategic management with the market-leading text that sets the standard for the most intellectually rich, yet thoroughly practical, analysis of strategic management today. Written by highly respected experts Hitt, Ireland, and Hoskisson, STRATEGIC MANAGEMENT: COMPETITIVENESS AND GLOBALIZATION, CONCEPTS AND CASES, Eleventh Edition, combines the latest cutting-edge research and strategic management trends with ideas from some of today's most prominent scholars. This is the only text that integrates the classic industrial organization model with a resource-based view of the firm to give you a complete understanding of how today's businesses use strategic management to establish a sustained competitive advantage. A strong global focus and examples from more than 600 emerging and leading companies place ideas into context within an inviting, practical presentation. A wealth of learning features and more than 30 all-new compelling cases examine a broad range of critical issues confronting managers today. Engaging video cases, CengageNOW online learning tools, and a complete electronic business library help keep your study current and relevant. STRATEGIC MANAGEMENT: COMPETITIVENESS AND GLOBALIZATION provides the solid understanding you need to effectively apply strategic management tools and techniques for increased performance and tomorrow's competitive advantage. Informal Workers and Collective Action features nine cases of collective action to improve the status and working conditions of informal workers. Adrienne E. Eaton, Susan J. Schurman, and Martha A. Chen set the stage by defining informal work and describing the types of organizations that represent the interests of informal workers and the lessons that may be learned from the examples presented in the book. Cases from a diverse set of countries—Brazil, Cambodia, Colombia, the Dominican Republic, Georgia, Liberia, South Africa, Tunisia, and Uruguay—focus on two broad types of informal workers: "waged" workers, including port workers, beer promoters, hospitality and retail workers, domestic workers, low-skilled public sector workers, and construction workers; and self-employed workers, including street vendors, waste recyclers, and minibus drivers.These cases demonstrate that workers and labor organizations around the world are rediscovering the lessons of early labor organizers on how to aggregate individuals' sense of injustice into forms of collective action that achieve a level of power that can yield important changes in their work and lives. Informal Workers and Collective Action makes a strong argument that informal workers, their organizations, and their campaigns represent the leading edge of the most significant change in the global labor movement in more than a century.Contributors Gocha Aleksandria, Georgian Trade Union Confederation Martha A. Chen, Harvard University and WIEGO Sonia Maria Dias, WIEGO and Federal University of Minas Gerais, Brazil Adrienne E. There is a lack of knowledge on how corporations in Asia develop strategies, organize their work processes and deal with competition. Western managers and business students need to know more about Asian corporations and their management styles. Learning about Asia, however, has always been a challenging task. The main challenge is the complexity encountered when dealing with Asian management issues, which differ not only for different countries, but also for different types of businesses, not to mention national management preferences and styles. This book tries to fill this gap, by presenting case studies of various Asian countries including China, Japan, India, Korea and The Philippines. The case studies are as diverse as management activities in Asia can be and include a variety of different companies in several Asian countries. This book attempts to present an overview on the variety and complexity of management and business processes in Asian countries. It intends to support business people and students of international management to get a deeper understanding of Asian management practices by presenting practical examples of Asian firms and their strategies.

This volume explores the domestic and transnational considerations associated with Indonesia's ascent, referring to its rise in terms of hard and soft power and its likely trajectory in the future. The range of contributors analyse economic resources, religious harmony, security, regional relations, leadership and foreign policy.

Against the background of a long and continuing record of political instability in Africa, this edited collection presents a multi-disciplinary approach to selected issues in African political studies. The contributions explore a range of political and conflict situations, discuss efforts to develop indigenous conflict resolution mechanisms and consider some of the key political and economic issues facing the continent. The specific country studies illuminate the diversity of the African continent and indicate the ways in which the political and socio-economic contexts of African states bear directly upon the ability of states to solve political and economic challenges. The volume seeks to present and promote novel analytical frameworks, conceptual approaches and empirical accounts of relevance to scholars working on Africa and to practitioners and policy makers in politics, governance and peace initiatives in Africa.

Media Activism in the Digital Age captures an exciting moment in the evolution of media activism studies and offers an invaluable guide to this vibrant and evolving field of research. Victor Pickard and Guobin Yang have assembled essays by leading scholars and activists to provide case studies of feminist, technological, and political interventions during different historical periods and at local, national, and global levels. Looking at the underlying theories, histories, politics, ideologies, tactics, strategies, and aesthetics, the book takes an expansive view of media activism. It explores how varieties of activism are mediated through communication technologies, how activists deploy strategies for changing the structures of media systems, and how governments and corporations seek to police media activism. From memes to zines, hacktivism to activism, this volume considers activist practices involving both older kinds of media and newer digital, social, and network-based forms. Media Activism in the Digital Age provides a useful cross-section of this growing field for both students and researchers.

For thirty years, the British economy has repeated the same old experiment of subjecting everything to competition and market because that is what works in the imagination of central government. This book demonstrates the repeated failure of that experiment by detailed examination of three sectors: broadband, food supply and retail banking. The book argues for a new experiment in social licensing whereby the right to trade in foundational activities would be dependent on the discharge of social obligations in the form of sourcing, training and living wages. Written by a team of researchers and policy advocates based at the Centre for Research on Socio Cultural Change, this book combines rigour and readability, and will be relevant to practitioners, policy makers, academics and engaged citizens.

Dance has been connected to the practices and ideologies that have shaped notions of a Nordic region for more than a century and it is ingrained into the culture and society of the region. This book investigates different dance phenomena that have either engaged with or dismantled notions of Nordicness. Looking to the motion of dancers and dance forms between different locations, organizations and networks of individuals, its authors discuss social dancing, as well as historical processes associated with collaborations in folk dance and theatre dance. They consider how similarities and differences between the Nordic countries may be discerned, for instance in patterns of reception at the arrival of dance forms from outside the Nordic countries - and vice versa, how dance from the Nordic countries is received in other parts of the world, as seen for example in the Nordic Cool Festival at the Kennedy Centre in 2013. The book opens a rare window into Nordic culture seen through the prism of dance. While it grants the reader new insights into the critical role of dance in the formation and imagining of a region, it also raises questions about the interplay between dance practices and politics.

The rapid expansion of the payday loan sector has been accompanied by a significant increase in the number of people experiencing serious debt problems which suggests people should think carefully before taking out such loans. Furthermore the number of payday loan adverts seen by 4-15 year olds has increased from 3 million in 2008 to 596 million in 2012. The Committee's recommendations include: all payday loan companies should be required to resubmit their affordability tests to the FCA for approval before they can continue in the sector and the FCA should make clear that if real-time data sharing has not been established by July 2014 it will mandate its use as a condition of trading in the sector; a limit should be set of one roll-over per payday loan; Payday lenders should be required to give 3 working days notice before using a continuous payment authority [CPA] and each notice should set out the right of a customer to cancel the CPA; the FCA should discuss with the Information Commissioners Office how texts on payday loans could be disaggregated to identify the extent of bad practice and if this evidence base demonstrates inappropriate targeting or marketing, the FCA should move to ban all brokering of payday loans through email, texts and other personal mobile devices; when payday loans come under the authority of the FCA, they will be subject to a levy which should be ring fenced by the Money Advice Service solely for the funding of front-line debt advice services

The existence and persistence of regional disparities between European regions require context-tailored policies to promote structural change. This book explores the congruence between place-based development and regional competitiveness in the EU context. Drawing on a range of social science disciplines, this book unpicks the complexity of regional transformation processes, aiming to enhance the applicability and transferability of theoretical approaches to innovation and place-based regional development in diverse European territorial settings. The contributors have a particular focus on less-favoured regions and on the application of Smart Specialisation – a strategic approach to innovation-based regional development – to the issues at hand. The book comes at a critical moment, meeting the growing demand of academics, practitioners and policymakers with an interest in promoting regional economic growth and well-being.

The Kingdom of Saudi Arabia has established itself as the twelfth-largest economy in the world, the largest West Asian economic power, world's largest oil producer, and a strong and capable force in international politics, particularly in the Sunni Islamic world. However, at present it is at crossroads. Should it continue as a 'kingdom' or usher in the process of inclusive political representation? This volume answers such questions and explores how the state is coping with domestic, regional and global developments to remain relevant in the changing times. It provides a holistic overview of a slew of economic, political, cultural, military and security policy measures that have been initiated by the government. The work also offers a detailed analysis of Saudi Arabia's relations with three significant powers – USA, China and India – and how they are evolving under new geopolitical and geostrategic dynamics. This book will interest strategists, policymakers, researchers and students of international relations, geopolitics, political science and political economy as well as the informed reader.

Examine the issues impacting today's current, fast-shifting business environment and the effective management solutions with Daft/Marcic's market-leading UNDERSTANDING MANAGEMENT, 12E. Even before recent upheavals, managers and organizations were buffeted by competitive, social, technological and economic change. Today's managers face more demands than ever before in the scramble to cope with the turbulence of recent events, ethical turmoil, mobile commerce, economic instability, globalization, cybersecurity threats, increasing government regulation and global supply chains. This edition helps you, as a current or future manager, find leading-edge solutions to problems plaguing organizations -- whether everyday challenges or once-in-a-lifetime crises. Content extends beyond techniques traditionally taught to encompass a full breadth of management skills and new competencies you can use to face today's challenges and become a leader prepared to seize opportunity and lead change. This edited collection includes eleven major case studies and one general review of rhetorical contest in Australian politics. The volume showcases the variety of methods available for studying political speech, including historical, theoretical, institutional, and linguistic analyses, and demonstrates the centrality of language use to democratic politics. The chapters reveal errors in rhetorical strategy, the multiple and unstable standards for public speech in Australia, and the links between rhetoric and action. The length of Australian political speech is traversed, from pre-Federation to the Gillard minority government (2010-13), and the topics similarly range from Alfred Deakin's nation building to Kevin Rudd's Apology to the Stolen Generations. This fresh collection is intended to stimulate and advance the study of political rhetoric in Australia.

SMALL BUSINESS MANAGEMENT, 18e, provides the practical concepts, entrepreneurial insights, and comprehensive resources you'll find essential both now and throughout your management future. This market-leading text places you in the role of decision-maker, allowing you to immediately apply what you've learned to current challenges in today's small businesses. #1 Wall Street Journal Best Seller USA Today Best Seller Amazon Best Book of the Year TED Talk sensation - over 3 million views! The counterintuitive approach to achieving your true potential, heralded by the Harvard Business Review as a groundbreaking idea of the year. The path to personal and professional fulfillment is rarely straight. Ask anyone who has achieved his or her biggest goals or whose relationships thrive and you'll hear stories of many unexpected detours along the way. What separates those who master these challenges and those who get derailed? The answer is agility—emotional agility. Emotional agility is a revolutionary, science-based approach that allows us to navigate life's twists and turns with self-acceptance, clear-sightedness, and an open mind. Renowned psychologist Susan David developed this concept after studying emotions, happiness, and achievement for more than twenty years. She found that no matter how intelligent or creative people are, or what type of personality they have, it is how they navigate their inner world—their thoughts, feelings, and self-talk—that ultimately determines how successful they will become. The way we respond to these internal experiences drives our actions, careers, relationships, happiness, health—everything that matters in our lives. As humans, we are all prone to common hooks—things like self-doubt, shame, sadness, fear, or anger—that can too easily steer us in the wrong direction. Emotionally agile people are not immune to stresses and setbacks. The key difference is that they know how to adapt, aligning their actions with their values and making small but powerful changes that lead to a lifetime of growth. Emotional agility is not about ignoring difficult emotions and thoughts; it's about holding them loosely, facing them courageously and compassionately, and then moving past them to bring the best of yourself forward. Drawing on her deep research, decades of international consulting, and her own experience overcoming adversity after losing her father at a young age, David shows how anyone can thrive in an uncertain world by becoming more emotionally agile. To guide us, she shares four key concepts that allow us to acknowledge uncomfortable experiences while simultaneously detaching from them, thereby allowing us to embrace our core values and adjust our actions so they can move us where we truly want to go. Written with authority, wit, and empathy, Emotional Agility serves as a road map for real behavioral change—a new way of acting that will help you reach your full potential, whoever you are and whatever you face.

Oswaal Karnataka PUE Sample Question Papers, I PUC, Class 11 (Set of 4 Books) Accountancy, Business Studies, Economics, English (For 2022 Exam)

The Butterfly Defect addresses the widening gap between the new systemic risks generated by globalization and their effective management. It shows how the dynamics of turbo-charged globalization has the potential and power to destabilize our societies. Drawing on the latest insights from a wide variety of disciplines, Ian Goldin and Mike Mariathan provide practical guidance for how governments, businesses, and individuals can better manage globalization and risk. Goldin and Mariathan demonstrate that systemic risk issues are now endemic everywhere—in supply chains, pandemics, infrastructure, ecology and climate change, economics, and politics. Unless we address these concerns, they will lead to greater protectionism, xenophobia, nationalism, and, inevitably, deglobalization, rising inequality, conflict, and slower growth. The Butterfly Defect shows that mitigating uncertainty and risk in an interconnected world is an essential task for our future.
