

Busted By The Feds A Manual

The never-before-told full story of the history-changing break-in at the FBI office in Media, Pennsylvania, by a group of unlikely activists—quiet, ordinary, hardworking Americans—that made clear the shocking truth and confirmed what some had long suspected, that J. Edgar Hoover had created and was operating, in violation of the U.S. Constitution, his own shadow Bureau of Investigation. It begins in 1971 in an America being split apart by the Vietnam War . . . A small group of activists—eight men and women—the Citizens Commission to Investigate the FBI, inspired by Daniel Berrigan’s rebellious Catholic peace movement, set out to use a more active, but nonviolent, method of civil disobedience to provide hard evidence once and for all that the government was operating outside the laws of the land. The would-be burglars—nonpro’s—were ordinary people leading lives of purpose: a professor of religion and former freedom rider; a day-care director; a physicist; a cab driver; an antiwar activist, a lock picker; a graduate student haunted by members of her family lost to the Holocaust and the passivity of German civilians under Nazi rule. Betty Medsger’s extraordinary book re-creates in resonant detail how this group of unknowing thieves, in their meticulous planning of the burglary, scouted out the low-security FBI building in a small town just west of Philadelphia, taking into consideration every possible factor, and how they planned the break-in for the night of the long-anticipated boxing match between Joe Frazier (war supporter and friend to President Nixon) and Muhammad Ali (convicted for refusing to serve in the military), knowing that all would be fixated on their televisions and radios. Medsger writes that the burglars removed all of the FBI files and, with the utmost deliberation, released them to various journalists and members of Congress, soon upending the public’s perception of the inviolate head of the Bureau and paving the way for the first overhaul of the FBI since Hoover became its director in 1924. And we see how the release of the FBI files to the press set the stage for the sensational release three months later, by Daniel Ellsberg, of the top-secret, seven-thousand-page Pentagon study on U.S. decision-making regarding the Vietnam War, which became known as the Pentagon Papers. At the heart of the heist—and the book—the contents of the FBI files revealing J. Edgar Hoover’s “secret counterintelligence program” COINTELPRO, set up in 1956 to investigate and disrupt dissident political groups in the United States in order “to enhance the paranoia endemic in these circles,” to make clear to all Americans that an FBI agent was “behind every mailbox,” a plan that would discredit, destabilize, and demoralize groups, many

of them legal civil rights organizations and antiwar groups that Hoover found offensive—as well as black power groups, student activists, antidraft protestors, conscientious objectors. The author, the first reporter to receive the FBI files, began to cover this story during the three years she worked for The Washington Post and continued her investigation long after she'd left the paper, figuring out who the burglars were, and convincing them, after decades of silence, to come forward and tell their extraordinary story. The Burglary is an important and riveting book, a portrait of the potential power of nonviolent resistance and the destructive power of excessive government secrecy and spying.

In 2014, France lost part of the control of its nuclear power plants to the United States. Frédéric Pierucci, former senior executive of one of Alstom's power company subsidiaries, found himself at the heart of this state scandal. His story goes to the very core of how he plotted the key features of the secret economic war that the United States is waging in Europe. And after being silenced for a long time, he has decided, with the help of journalist Matthieu Aron, to reveal all. In April 2013, Frédéric Pierucci was arrested in New York by the FBI and accused of bribery. The US authorities imprisoned him for more than two years - including fourteen months in a notorious maximum-security prison. In doing so, they forced Alstom to pay the biggest financial penalty ever imposed by the United States. In the end, Alstom also gave up areas of control to General Electric, its biggest American competitor. Frédéric's story unpacks how the United States is using corporate law as an economic weapon against its own allies. One after the other, some of the world's largest companies are being actively destabilised to the benefit of the US, in acts of economic sabotage that seem to be the beginning of what's to come...

The uproarious, bestselling true story of the world's most sought-after con man, immortalized by Leonardo DiCaprio in DreamWorks' feature film of the same name, from the author of Scam Me If You Can. Frank W. Abagnale, alias Frank Williams, Robert Conrad, Frank Adams, and Robert Monjo, was one of the most daring con men, forgers, imposters, and escape artists in history. In his brief but notorious criminal career,

*Abagnale donned a pilot's uniform and copiloted a Pan Am jet, masqueraded as the supervising resident of a hospital, practiced law without a license, passed himself off as a college sociology professor, and cashed over \$2.5 million in forged checks, all before he was twenty-one. Known by the police of twenty-six foreign countries and all fifty states as "The Skywayman," Abagnale lived a sumptuous life on the lam—until the law caught up with him. Now recognized as the nation's leading authority on financial foul play, Abagnale is a charming rogue whose hilarious, stranger-than-fiction international escapades, and ingenious escapes—including one from an airplane—make *Catch Me If You Can* an irresistible tale of deceit.*

Covers: gifts from outside sources, gifts between employees, conflicting financial interests, impartiality in performing official duties, seeking other employment, misuse of position, & outside activities. Also includes related statutory authorities.

*The inside story, told with “insight, perspective, and stellar reporting,” of how an unassuming civil servant created trillions of dollars from thin air, combatted a public health crisis, and saved the American economy from a second Great Depression (Alan S. Blinder, former Vice Chair of the Federal Reserve). By February 2020, the U.S. economic expansion had become the longest on record. Unemployment was plumbing half-century lows. Stock markets soared to new highs. One month later, the public health battle against a deadly virus had pushed the economy into the equivalent of a medically induced coma. America’s workplaces—offices, shops, malls, and factories—shuttered. Many of the nation’s largest employers and tens of thousands of small businesses faced ruin. Over 22 million American jobs were lost. The extreme uncertainty led to some of the largest daily drops ever in the stock market. Nick Timiraos, the Wall Street Journal’s chief economics correspondent, draws on extensive interviews to detail the tense meetings, late night phone calls, and crucial video conferences behind the largest, swiftest U.S. economic policy response since World War II. *Trillion Dollar Triage* goes inside the Federal Reserve, one of the country’s most important and least understood institutions, to chronicle how its plainspoken*

chairman, Jay Powell, unleashed an unprecedented monetary barrage to keep the economy on life support. With the bleeding stemmed, the Fed faced a new challenge: How to nurture a recovery without unleashing an inflation-fueling, bubble-blowing money bomb? *Trillion Dollar Triage* is the definitive, gripping history of a creative and unprecedented battle to shield the American economy from the twin threats of a public health disaster and economic crisis. Economic theory and policy will never be the same. A guide to cable modems includes tutorials, diagrams, source code examples, hardware schematics, and hacks to get the most out of this Internet connection.

THE DEFINITIVE EDITION • Discovered in the attic in which she spent the last years of her life, Anne Frank's remarkable diary has since become a world classic—a powerful reminder of the horrors of war and an eloquent testament to the human spirit. Updated for the 75th Anniversary of the Diary's first publication with a new introduction by Nobel Prize-winner Nadia Murad "The single most compelling personal account of the Holocaust ... remains astonishing and excruciating."—*The New York Times Book Review* In 1942, with Nazis occupying Holland, a thirteen-year-old Jewish girl and her family fled their home in Amsterdam and went into hiding. For the next two years, until their whereabouts were betrayed to the Gestapo, they and another family lived cloistered in the "Secret Annex" of an old office building. Cut off from the outside world, they faced hunger, boredom, the constant cruelties of living in confined quarters, and the ever-present threat of discovery and death. In her diary Anne Frank recorded vivid impressions of her experiences during this period. By turns thoughtful, moving, and amusing, her account offers a fascinating commentary on human courage and frailty and a compelling self-portrait of a sensitive and spirited young woman whose promise was tragically cut short.

THE #1 SUNDAY TIMES BESTSELLER *AS SEEN ON ITV'S THIS MORNING AND BBC MORNING LIVE** The groundbreaking bestseller from Tim Spector, author of *The Diet Myth* and creator of the COVID Symptom Study app. 'A hugely enjoyable and critical look at common food myths' Michael Mosley Is breakfast really the most important meal of the day? Is there any point in counting calories? Is there any evidence that coffee is bad for us? Through his pioneering research, Professor Tim Spector busts these and many other myths about food. *Spoon-Fed* explores the scandalous lack of good science behind many diet plans, official recommendations and

miracle cures, and encourages us to rethink our whole relationship with food - not just for our health as individuals, but for the future of the planet. With a new preface by the author 'Illuminating and so incredibly timely' Yotam Ottolenghi 'Will actually help you decide what to add to your next grocery shop' Bee Wilson, Guardian 'This book should be available on prescription' Felicity Cloake * Pre-order Tim Spector's new book Food for Life: The New Science of Eating Well - coming October 2022 - now *

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

A chilling exposé of corporate corruption and government cover-ups, this account of a nationwide child-trafficking and pedophilia ring in the United States tells a sordid tale of corruption in high places. The scandal originally surfaced during an investigation into Omaha, Nebraska's failed Franklin Federal Credit Union and took the author beyond the Midwest and ultimately to Washington, DC. Implicating businessmen, senators, major media corporations, the CIA, and even the venerable Boys Town organization, this extensively researched report includes firsthand interviews with key witnesses and explores a controversy that has received scant media attention.

A Report

A Manual for Defendants Facing Federal Prosecution : Including the Federal Sentencing Guidelines for All Federal Crimes

ShadowMan

"The pulse-pounding story of the first time in history that the FBI Behavioral Unit created a profile to catch a serial killer. On June 25, 1973, a seven-year-old girl went missing from the Montana campground where her family was vacationing. Somebody had slit open the back of her tent and snatched her from under their noses. None of them saw or heard anything. Susie Jaeger had vanished into thin air, plucked by a shadow. The largest manhunt in Montana's history ensued, led by the FBI. As days stretched into weeks, and weeks into months, Special Agent Pete Dunbar attended a workshop at FBI headquarters in Quantico led by two agents who had hatched a radical new idea: What if criminals left a psychological trail that would lead us to them? Patrick Mullany, a trained psychologist, and Howard Teten, a veteran criminologist, had created the Behavioral Science Unit to explore this new voodoo they called "criminal profiling." At Dunbar's request, Mullany and Teten built the FBI's first profile of an unknown subject: the UnSub who had snatched Susie Jaeger and, a few months later, a 19-year-old waitress. They deduced that he was a white twentysomething who'd grown up without a father; an intelligent, local loner who had served in the military. They predicted he would contact Susie's parents on the anniversary of her murder, and when caught would attempt suicide. When David Meirhofer was arrested fifteen months after Susie's abduction, and confessed to four murders, the profile fit him to a T"--

Reveals how the FBI has built a vast network of informants to infiltrate Muslim communities and fabricate terrorist plots in order to make the appearance that the bureau is winning the war on terror.

"The New York Times bestselling business journalist Christopher Leonard infiltrates one of America's most mysterious institutions--the Federal Reserve--to show how its policies over the past ten years have accelerated income inequality and put our country's economic stability at risk"--

The fiasco that sank millions of Americans, including one journalist, who thought he knew better. A veteran New York Times economics reporter, Ed Andrews was intimately aware of the dangers posed by easy mortgages from fast-buck lenders. Yet, at the promise of a second chance at love, he succumbed to the temptation of subprime lending and became part of the economic

catastrophe he was covering. In surprisingly short order, he amassed a staggering amount of debt and reached the edge of bankruptcy. In Busted, Andrew bluntly recounts his misadventures in mortgages and goes one step further to describe the brokers, lenders, Wall Street players, and Washington policymakers who helped bring that money to his door. The result is a penetrating and often acerbic look at the binge and bust that nearly bankrupted the United States. Enabled by know-nothing complacency in Washington, Wall Street wizards used "collateralized debt obligations," "conduits," and other inscrutable financial "innovations" to put American home financing into hyperdrive. Millions of Americans abandoned the safety of thirty-year, fixed-rate mortgages and loaded up on debt. While regulators insisted that the markets knew best, Wall Street firms fragmented and repackaged unsound loans into securities that the rating agencies stamped with triple-A seals of approval. Andrews describes a remarkably democratic debacle that made fools out of people up and down the financial food chain. From a confessional meeting with Alan Greenspan to a trek through the McMansion bubble of the OC, he maps the arc of the Frankenstein loans that brought the American economy to the brink. With on-the-ground reporting from the frothiest quarters of the crisis, Andrews locates what is likely to be the high-water mark in America's long-term embrace of higher borrowing, higher risk-taking, and the fervent belief in the possibility of easy profits.

Life in a Mining Community

The American Trap

A Story of Powerbrokers, Child Abuse & Betrayal

In 1998, William Queen was a veteran law enforcement agent with a lifelong love of motorcycles and a lack of patience with paperwork. When a "confidential informant" made contact with his boss at the Bureau of Alcohol, Tobacco and Firearms, offering to take an agent inside the San Fernando chapter of the Mongols (the scourge of Southern California, and one of the most dangerous gangs in America), Queen jumped at the chance, not realizing that he was kicking-starting the most extensive undercover operation inside an outlaw motorcycle gang in the history of American law enforcement. Nor did Queen suspect that he would penetrate the gang so successfully that he would become a fully "patched-in" member, eventually rising through their ranks to the office of treasurer, where he had unprecedented access to evidence of their criminal activity.

After Queen spent twenty-eight months as “Billy St. John,” the bearded, beer-swilling, Harley-riding gang-banger, the truth of his identity became blurry, even to himself. During his initial “prospecting” phase, Queen was at the mercy of crank-fueled criminal psychopaths who sought to have him test his mettle and prove his fealty by any means necessary, from selling (and doing) drugs, to arms trafficking, stealing motorcycles, driving getaway cars, and, in one shocking instance, stitching up the face of a Mongol “ol’ lady” after a particularly brutal beating at the hands of her boyfriend. Yet despite the constant criminality of the gang, for whom planning cop killings and gang rapes were business as usual, Queen also came to see the genuine camaraderie they shared. When his lengthy undercover work totally isolated Queen from family, his friends, and ATF colleagues, the Mongols felt like the only family he had left. “I had no doubt these guys genuinely loved Billy St. John and would have laid down their lives for him. But they wouldn’t hesitate to murder Billy Queen.” From Queen’s first sleight of hand with a line of methamphetamine in front of him and a knife at his throat, to the fearsome face-off with their decades-old enemy, the Hell’s Angels (a brawl that left three bikers dead), to the heartbreaking scene of a father ostracized at Parents’ Night because his deranged-outlaw appearance precluded any interaction with regular citizens, Under and Alone is a breathless, adrenaline-charged read that puts you on the street with some of the most dangerous men in America and with the law enforcement agents who risk everything to bring them in.

I hadn’t planned on writing a book when I quit the Hells Angels. After forty years in the Hells Angels, George Christie was ready to retire. As president of the high-profile Ventura charter of the club, he had been the yin to Sonny Barger’s yang. Barger was the reckless figurehead and de facto world leader of the Hells Angels. Christie was the negotiator, the spokesman, the thinker, the guy who smoothed things out. He was the one who carried the Olympic torch and counted movie stars, artists, rock musicians, and police chief captains among his friends. But leaving the Hells Angels isn’t easy, and within two weeks of retirement, he was told he was “out bad”—blackballed by his fellow Angels, prohibited from wearing the club patch, and even told he should remove his Death Head tattoo. Now Christie sets out to tell his story. Exile on Front Street is the tale of how a former Marine gave up a comfortable job with the Department of Defense and swore allegiance to the Hells Angels. In this revealing, hard-hitting memoir, he recounts his life as an outlaw biker with the world’s most infamous motorcycle club.

The FBI veteran behind the Russia investigation draws on decades of experience hunting foreign agents in the United States to lay bare the threat posed by President Trump.

A cybersecurity expert and former FBI “ghost” tells the thrilling story of how he helped take down notorious FBI mole Robert Hanssen, the first Russian cyber spy. Eric O’Neill was only twenty-six when he was tapped for the case of a lifetime: a one-on-one undercover investigation of the FBI’s top target, a man suspected of spying for the Russians for nearly two decades, giving up nuclear secrets, compromising intelligence, and betraying US assets. With zero training in face-to-face investigation, Eric found himself in a windowless, high-

security office in the newly formed Information Assurance Section, tasked officially with helping the FBI secure its outdated computer system against hackers and spies--and unofficially with collecting evidence against his new boss, Robert Hanssen, an exacting and rage-prone veteran agent with a disturbing fondness for handguns. In the months that follow, Eric's self-esteem and young marriage unravel under the pressure of life in Room 9930, and he questions the very purpose of his mission. But as Hanssen outmaneuvers an intelligence community struggling to keep up with the new reality of cybersecurity, he also teaches Eric the game of spycraft. Eric will just have to learn to outplay his teacher if he wants to win. A tension-packed stew of power, paranoia, and psychological manipulation, Gray Day is also a cautionary tale of how the United States allowed Russia to become dominant in cyberespionage--and how we might begin to catch up.

Exile on Front Street

How the Federal Reserve Broke the American Economy

Franklin Scandal

This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

Ex-professional football player Art Schlichter discusses his success in high school, college, and the NFL before succumbing to gambling addiction and serving time in prison for ten years.

This paper provides an overview of the federal sentencing system. For historical context, it first briefly discusses the

evolution of federal sentencing during the past four decades, including the landmark passage of the Sentencing Reform Act of 1984 (SRA),¹ in which Congress established a new federal sentencing system based primarily on sentencing guidelines, as well as key Supreme Court decisions concerning the guidelines. It then describes the nature of federal sentences today and the process by which such sentences are imposed. The final parts of this paper address appellate review of sentences; the revocation of offenders' terms of probation and supervised release; the process whereby the United States Sentencing Commission (the Commission) amends the guidelines; and the Commission's collection and analysis of sentencing data.

Busted by the feds includes all of the federal sentencing guidelines in a streamlined, easy to use format, with which a defendant can quickly calculate the sentencing consequences of the charges he faces, and which an attorney will probably want to make a permanent presence in his briefcase.

Spoon-Fed

John Williams moved from South Carolina with dreams of escaping the racism that existed in the South, but what he quickly found out was that racism still existed in the North, and the opportunity well had also dried up. With his back against the wall and no money in his pockets, John concocted a scheme to rob a local hustler--that went horribly wrong. Blood was on his hands...and a price was on his head.

The definitive, shocking account of the FIFA scandal—the biggest corruption case of recent years—involving dozens of countries and implicating nearly every aspect of the world's most popular sport, soccer, including the World Cup is “an engrossing and jaw-dropping tale of international intrigue...A riveting book” (The New York Times). The FIFA case began small, boosted by an IRS agent's review of an American soccer official's tax returns. But that humble investigation eventually led to a huge worldwide corruption scandal that crossed continents and reached the highest levels of the soccer's world governing body in Switzerland. “The meeting of American investigative reporting and real-life cop show” (The Financial Times), Ken Bensinger's Red Card explores the case, and the personalities behind it, in vivid detail. There's Chuck Blazer, a high-living soccer dad who ascended to the highest ranks of the sport while creaming millions from its coffers; Jack Warner, a Trinidadian soccer official whose lust for power was matched only by his boundless greed; and the sport's most powerful man, FIFA president Sepp Blatter, who held on to his position at any cost even as soccer rotted from the inside out. Remarkably, this corruption existed for decades before American law

enforcement officials began to secretly dig, finally revealing that nearly every aspect of the planet's favorite sport was corrupted by bribes, kickbacks, fraud, and money laundering. Not even the World Cup, the most-watched sporting event in history, was safe from the thick web of corruption, as powerful FIFA officials extracted their bribes at every turn. "A gripping white-collar crime thriller that, in its scope and human drama, ranks with some of the best investigative business books of the past thirty years" (The Wall Street Journal), *Red Card* goes beyond the headlines to bring the real story to light.

In the vein of Erin Brockovich, *The Departed*, and T. J. English's *Savage City* comes *Busted*, the shocking true story of the biggest police corruption scandal in Philadelphia history, a tale of drugs, power, and abuse involving a rogue narcotics squad, a confidential informant, and two veteran journalists whose reporting drove a full-scale FBI probe, rocked the City of Brotherly Love, and earned a Pulitzer Prize. In 2003, Benny Martinez became a Confidential Informant for a member of the Philadelphia Police Department's narcotics squad, helping arrest nearly 200 drug and gun dealers over seven years. But that success masked a dark and dangerous reality: the cops were as corrupt as the criminals they targeted. In addition to fabricating busts, the squad systematically looted mom-and-pop stores, terrorizing hardworking immigrant owners. One squad member also sexually assaulted three women during raids. Frightened for his life, Martinez turned to Philadelphia Daily News reporters Wendy Ruderman and Barbara Laker. *Busted* chronicles how these two journalists—both middle-class working mothers—formed an unlikely bond with a convicted street dealer to uncover the secrets of ruthless kingpins and dirty cops. Professionals in an industry shrinking from severe financial cutbacks, Ruderman and Laker had few resources—besides their own grit and tenacity—to break a dangerous, complex story that would expose the rotten underbelly of a modern American city and earn them a Pulitzer Prize. A page-turning thriller based on superb reportage, illustrated with eight pages of photos, *Busted* is modern true crime at its finest.

The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of

private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News. His film In Debt We Trust warned of the economic meltdown in 2006. He has since written three books on the subject including Plunder: Investigating Our Economic Calamity (Cosimo Books, 2008), and The Crime Of Our Time: Why Wall Street Is Not Too Big to Jail (Disinfo Books, 2011), a companion to his latest film Plunder The Crime Of Our Time. He can be reached online at www.newsdissector.com.

Describes daily life in a rural mining community in North America.

The Dow Corning case raised serious questions about the safety of silicone breast implants and about larger issues of medical device testing and patient education. Safety of Silicone Breast Implants presents a well-documented, thoughtful exploration of the safety of these devices, drawing conclusions from the available research base and suggesting further questions to be answered. This book also examines the sensitive issues surrounding women's decisions about implants. In reaching conclusions, the committee reviews: The history of the silicone breast implant and the development of its chemistry. The wide variety of U.S.-made implants and their regulation by the Food and Drug Administration. Frequency and consequences of local complications from implants. The evidence for and against links between implants and autoimmune disorders, connective tissue disease, neurological problems, silicone in breast milk, or a proposed new syndrome. Evidence that implants may be associated with lower frequencies of breast cancer. Safety of Silicone Breast Implants provides a comprehensive, well-organized review of the science behind one of the most significant medical controversies of our time.
