Resiliency-focused approaches to managing trauma. This is a book to help clients to transform what happened to them to make them better instead of bitter. The first book on trauma to combine the theory and practice of positive psychology and solution-focused brief therapy with traditional approaches, this book veers away from a focus on pathology (what is wrong with clients and how to repair the worst) to a focus on what is right with them (and how to create the best)—that is, from post traumatic stress to post traumatic success. The three R's of post traumatic success are: Recovery, Resilience and enRichment (post traumatic growth) - concepts depicted by the bamboo plant on the book's cover. Trauma professionals will learn what it takes to help more survivors benefit more substantively from therapy and how to support their clients in developing longer-term resilience. By practicing the skills in this book, they can increase their clients' self-efficacy and self-esteem, and make psychotherapy shorter in time, more cost effective and more lighthearted for their clients and themselves. Written for all professionals and students working with trauma survivors (both adults and children) and their families and friends, it equips readers with practical direction for adopting a more positive approach and expanding their range of available techniques. Over a hundred exercises, thirty-three cases, and forty stories are presented to illustrate and help incorporate this new approach into practice. It's about time to turn the tide on treating trauma by shifting the focus from reducing distress and merely surviving to building success and positively thriving. Derived from The ASAM Principles of Addiction Medicine, 5th Edition - widely hailed as the definitive comprehensive clinical reference in the field - this companion resource presents the collective wisdom of hundreds of esteemed authorities on the art and science of addiction medicine. Yet, it does so in a succinct format that will appeal to specialists seeking a more streamlined, quick-access reference source. Find the authoritative answers you need on everything from the pharmacology of addiction through diagnosis, assessment, and early intervention; various forms of addiction management...treatment of individual patient populations; management of intoxication and withdrawal; pharmacologic and behavioral interventions; recovery programs; medical disorders and complications...co-occurring addiction and psychiatric disorders; pain and addiction; children and adolescents; and ethical, legal, and liability issues. Contribute to public health in the area of addiction thanks to a special introductory chapter entitled "A Public Health Approach to Prevention: The Health Professional's Role." Easily switch back and forth between the ASAM Essentials and the parent text thanks to a parallel chapter organization. Zero in on the most important, practical information thanks to highly focused, efficient coverage. Maximize your understanding and retention of vital concepts with the aid of key points summaries, review questions, and suggested readings in each chapter. This theory-focused casebook provides the reader with an overview of multiple counseling theories and utilizes specific cases representing a variety of clients to demonstrate the integration of theory in clinical counseling and social work practice. Through the use of dynamic cases, the reader is shown how theory informs day-to-day practice. Each theoretical case study includes a section on cultural considerations and discussion questions: Object Relations Theory: The Case of Elyse Self Psychology Theory: The Case of Evan Person-Centered Therapy: The Case of Tommy Solution-Focused Brief Therapy: The Case of Jim Relational Cultural Theory: The Case of Monica Systems Theory: The Case of Esperanza Experiential Therapy: The Case of Sam Discovering Theory in Clinical Practice: A Casebook for Clinical Counseling and Social Work Practice is an essential text for instructors to teach the development of a theoretical foundation that easily integrates into core topics of relevance for graduate students in social work, counseling, psychology, marriage and family therapy, and human behavior who intend to work with a diverse set of client populations. The book also will be a great asset to early-career practitioners and clinical supervision participants who are continuing to build a professional working template of skills in both theory and practice as they conceptualize patient problems and develop treatment plans.

Lessons from the personal experience and reflections of a therapist. The difficulty and cost of training psychotherapists properly is well known. It is far easier to provide a series of classes while ignoring the more challenging personal components of training. Despite the fact that the therapist's self-insight, emotional maturity, and calm centeredness are critical for successful psychotherapy, rote knowledge and technical skills are the focus of most training programs. As a result, the therapist's personal growth is either marginalized or ignored. The Making of a Therapist counters this trend by offering graduate students and beginning therapists a personal account of this important inner journey. Cozolino provides a unique look inside the mind and heart of an experienced therapist. Readers will find an exciting and privileged window into the experience of the therapist who, like themselves, is just starting out. In addition, The Making of a Therapist contains the practical advice, common-sense wisdom, and self-disclosure that practicing professionals have found to be the most helpful during their own training. The first part of the book, 'Getting Through Your First Sessions,' takes readers through the often-perilous days and weeks of conducting initial sessions with real clients.

Cozolino addresses such basic concerns as: Do I need to be completely healthy myself before I can help others? What do I do if someone comes to me with an issue or problem I can't handle? What should I do if I have trouble listening to my clients? What if a client scares me? The second section of the book, 'Getting to Know Your Clients,' delves into the routine of therapy and the subsequent stages in which you continue to work with clients and help them. In this context, Cozolino presents the notion of the 'good enough' therapist, one who can surrender to his or her own imperfections while still guiding the therapeutic relationship to a positive outcome. The final section, 'Getting to Know Yourself,' goes to the core of the therapist's relation to him- or herself, addressing such issues as: How to turn your weaknesses into strengths, and how to deal with the complicated issues of pathological caretaking, countertransference, and self-care. Both an excellent introduction to the field as well as a valuable refresher for the experienced clinician, The Making of a Therapist offers readers the tools and insight that make the journey of becoming a therapist a rich and rewarding experience.
