Discover BIM: A better way to build better buildings Building Information Modeling (BIM) offers a novel approach to design, construction, and facility management in which a digital representation of the building product and process is used to facilitate the exchange and interoperability of information in digital format. BIM is beginning to change the way buildings look, the way they function, and the ways in which they are designed and built. The BIM Handbook, Third Edition provides an in-depth understanding of BIM technologies, the business and organizational issues associated with its implementation, and the profound advantages that effective use of BIM can provide to all members of a project team. Updates to this edition include: Information on the ways in which professionals should

The creator of the viral hit "Empathy Cards" teams up with a compassion expert to produce a visually stunning and groundbreaking illustrated guide to help you increase your emotional intelligence and learn how to offer comfort and support when someone you know is in pain. When someone you know is hurting, you want to let her know that you care. But many people don't know what words to use—or are afraid of saying or doing the wrong thing. This thoughtful, instructive guide, from empathy expert Dr. Kelsey Crowe and greeting card maverick Emily McDowell, blends well-researched, actionable advice with the no-nonsense humor and the signature illustration style of McDowell's immensely popular Empathy Cards, to help you feel confident in connecting with anyone experiencing grief, loss, illness, or any other difficult situation. Written in a how-to, relatable, we've-all-been-that-deer-in-the-headlights kind of way, *There Is No Good Card for This* isn't a spiritual treatise on how to make you a better person or a scientific

The Planning Guide to Piping Design

*Peter Smith has joined forces with skilled consultants to take his piping series to the next level. The Planning Guide to Piping Design covers the entire process of planning a plant model project from conceptual to mechanical completion, and explains where the piping lead falls in the process along with his roles and responsibilities. Piping Engineering Leads (or PEL's) used to only receive on-the-job training to learn the operation of producing a process plant. Over time, more schools and programs have developed a more advanced curriculum for piping engineers and designers. However, younger generations of engineers and designers are growing up with a much more technological view of piping design and are in need of a handbook that will explain the proven methods of planning and monitoring the piping design in step-by-step processes. This handbook will provide mentors in the process piping industries the bridge needed for the upcoming engineer and designer to grasp the requirements of piping supervision in the modern age. However, the guide may also be used to assist those seeking general knowledge of pavement management concepts. Since pavement management is not a subject normally included in a civil engineering college curriculum, it is hoped that the structure of the guide will support this use as well. Pavement management is used to assess and justify funding needs for pavement preservation and rehabilitation, and to help set attainable pavement-related performance goals.
