

Call For Papers Kuli

The book is divided into four chapters, and each chapter serves a different purpose. Deals with a different pain. Heals a different heartache. Milk and Honey takes readers through a journey of the most bitter moments in life and finds sweetness in them because there is sweetness everywhere if you are just willing to look.

Since the early twentieth century, the Baha'í religion has worked to establish racially and ethnically diverse communities. During Jim Crow, it was a leader in breaking norms of racial segregation. Each chapter of this book presents an aspect of Baha'i history that intersects with African American history in novel and socially significant ways.

The Tradesman

In 1903, a young woman sailed from India to Guiana as a "coolie"—the British name for indentured laborers who replaced the newly emancipated slaves on sugar plantations all around the world. Pregnant and traveling alone, this woman, like so many coolies, disappeared into history. In *Coolie Woman*—shortlisted for the 2014 Orwell Prize—her great-granddaughter Gaiutra Bahadur embarks on a journey into the past to find her. Traversing three continents and trawling through countless colonial archives, Bahadur excavates not only her great-grandmother's story but also the repressed history of some quarter of a million other coolie women, shining a light on their complex lives. Shunned by society, and sometimes in mortal danger, many coolie women were either runaways, widows, or outcasts. Many of them left husbands and families behind to migrate alone in epic sea

voyages—traumatic “middle passages”—only to face a life of hard labor, dismal living conditions, and, especially, sexual exploitation. As Bahadur explains, however, it is precisely their sexuality that makes coolie women stand out as figures in history. Greatly outnumbered by men, they were able to use sex with their overseers to gain various advantages, an act that often incited fatal retaliations from coolie men and sometimes larger uprisings of laborers against their overlords. Complex and unpredictable, sex was nevertheless a powerful tool. Examining this and many other facets of these remarkable women’s lives, *Coolie Woman* is a meditation on survival, a gripping story of a double diaspora—from India to the West Indies in one century, Guyana to the United States in the next—that is at once a search for one’s roots and an exploration of gender and power, peril and opportunity.

Papers in Austronesian Linguistics

"Many of the papers in this volume present new and innovative research into the processes of maritime colonisation, processes that affect archaeological contexts from islands to continents. Others shift focus from process to the archaeology of maritime places from the Bering to the Torres Straits, providing highly detailed discussions of how living by and with the sea is woven into all elements of human life from subsistence to trade and to ritual. Of equal importance are more abstract discussions of islands as natural places refashioned by human occupation, either through the introduction of new organisms or new systems of production and consumption. These transformation stories gain further texture (and variety) through close examinations of some of the more significant consequences of colonisation and migration, particularly the creation of new cultural identities. A final set of papers explores the ways in which the techniques of archaeological sciences have provided insights into the fauna of the islands and the human history of such places."--Provided by publisher.
