IELTS Academic Module : how to Maximize Your Score

IELTS 14 Academic Student's Book with Answers without Audio

Includes chapters on key aspects of second language assessment such as test construct, diagnosis, exam design, and the growing range of public policy, social and ethical issues. Each of the contributors is an expert in their area; some are established names while others are talented newcomers to the field. The chapters present new research or perspectives on traditional concerns such as test quality; fairness and bias; the testing of different language skills; the needs of different groups of examinees, including English language learners who need to take content tests in English; and the use of language assessments for gate-keeping purposes. The volume demonstrates how language assessment is informed by and engages with neighbouring areas of applied linguistics such as technology and language corpora. The book represents the best of current practice in second language assessment and, as a one volume reference, will be invaluable to students and researchers looking for material that extends their understanding of the field. Cambridge IELTS 10 provides students with an excellent opportunity to familiarise themselves with IELTS and to practise examination techniques using authentic test material prepared by Cambridge English Language Assessment. It contains four complete tests for Academic module candidates, plus extra Reading and Writing modules for General Training module candidates. An introduction to these different modules is included in each book, together with with an explanation of the scoring system used by Cambridge English Language Assessment. A comprehensive section of answers and tapescripts makes the material ideal for students working partly or entirely on their own.

This edited volume investigates the nature and possible applications of an expanded and reconceptualized theoretical construct of speaking as a dynamic socially-constructed endeavour. It addresses both theoretical perspectives and methodological procedures to define and circumscribe the assessment of contextualized speaking. The chapters focus on the complexity brought about by actual interactional competence in speaking tasks and discuss how testing and assessment models and practices can incorporate recent research findings on the inherently dynamic and situated nature of language use. The volume presents research on language assessment in a variety of languages other than English, including French, Chinese and Japanese. It also examines the role that embodied action (gaze, gesture, orientation to materials and texts in the environment) plays in assessment practices, an area that has heretofore remained under-explored. Chapter 6 is free to download as an open access publication. You can access it here: <https://zenodo.org/record/5163340#.YQvJ0lhKjcs>

Formulaic Language

This book is the second of the two-volume collection of papers on formulaic language. The collection is among the first in the field. The authors of the papers in this volume represent a diverse group of international scholars in linguistics and psychology. The language data analyzed come from a variety of languages, including Arabic, Japanese, Polish, and Spanish, and include analyses of styles and genres within these languages. While the first volume focuses on the very definition of linguistic formulae and on their grammatical, semantic, stylistic, and historical aspects, the second volume explores how formulae are acquired and lost by speakers of a language, in what way they are psychologically real, and what their functions in discourse are. Since most of the papers are readily accessible to readers with only basic familiarity with linguistics, the book may be used in courses on discourse structure, pragmatics, semantics, language acquisition, and syntax, as well as being a resource in linguistic research.

In March 1988, during the Iran-Iraq war, thousands were killed in a chemical attack on a town in Iraqi Kurdistan. Both sides accused the other. Gradually it emerged that Saddam Hussein, with the tacit support of his western allies, was responsible. This book tells the story of the gassing of Halabja, and how Iraq amassed chemical weapons to target Iranian soldiers and Kurdish villagers as America looked the other way. Today, as the Middle East sinks further into turmoil, these policies are coming back to haunt the West.

This volume reports research that informs the development of reading and listening assessment in IELTS. This volume brings together a set of eight IELTS-related research studies - four on reading and four on listening - conducted between 2005 and 2010. Findings from these studies provide valuable evidence on the validity, reliability, impact and practicality of the IELTS test; they are also instrumental in highlighting aspects needing attention, and thus directly inform the continuing evolution of the IELTS reading and listening tests. The volume reviews and comments on the specific contribution of each study to the ongoing process of IELTS reading and listening test design and development.

This volume provides an up-to-date and comprehensive coverage of second language learning. The focus throughout the book is primarily on language learning, but each chapter also discusses the implications for teaching and assessment, thus informing both understanding and practice. The book contains nine sections, which aim to organise and reflect different dimensions of the diverse and complex scope of learning English as a second or additional language. Four themes which permeate the chapters are: learning and learners; learning and language; learning and language development; learning and learning context. The 36 chapters are up-to-date and authoritative, written by experts in the field. The content is accessibly written, with questions for discussion and follow-up reading suggestions provided.

Publisher description

*Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.*

This book adopts a multi-method and multi-phase approach to investigate the washback effects of Test for English Majors (TEM) on program administrators, teachers and students, shedding new light on TEM reform and the reform of English teaching and learning in China. TEM, a nationwide test used to measure the language proficiency of undergraduate English majors in China, is a major standardized test taken by nearly 400,000 students every year. The book's key features include: an in-depth discussion of the nature of washback and a framework for investigating it; a multi-method and multi-phase approach, employing both the quantitative method of questionnaire surveys and the qualitative methods of interviews and classroom observations; large-scale questionnaire surveys conducted among experts, program administrators, teachers and students, and involving over 30,000 participants; detailed assessments of TEM's washback effects on stakeholders' perceptions, classroom teaching practice, students learning activities, etc.; and essential insights into testing and teaching reforms.

Test developers need to provide a clear explication of the language ability constructs that underpin the tests they offer in the public domain; such an explication is essential for supporting claims about the validity --- or usefulness --- of tests and test scores. This edited volume develops a theoretical framework for validating tests of second language speaking ability. The framework is then applied through an examination of the tasks in Cambridge ESOL speaking tests from a number of different validity perspectives that reflect the socio-cognitive nature of any assessment event. The chapter authors show how an understanding and analysis of the framework and its components can assist test developers to operationalise their tests more effectively, especially in relation to the key criteria that differentiate one proficiency level from another. The volume is a rich source of information on all aspects of examining speaking ability. As such, it will be of considerable interest to examination boards who wish to validate their own speaking tests in a systematic and coherent manner, as well as to academic researchers and graduate students in the field of language assessment more generally. This is a companion volume to the previously published titles Examining Writing and Examining Reading.
