Working-class stories are not always tales of the underprivileged and dispossessed. Common People is a collection of essays, poems and memoir written in celebration, not apology: these are narratives rich in barbed humour, reflecting the depth and texture of working-class life, the joy and sorrow, the solidarity and the differences, the everyday wisdom and poetry of the woman at the bus stop, the waiter, the hairdresser. Here, Kit de Waal brings together thirty-three established and emerging writers who invite you to experience the world through their eyes, their voices loud and clear as they reclaim and redefine what it means to be working class. Features original pieces from Damian Barr, Malorie Blackman, Lisa Blower, Jill Dawson, Louise Doughty, Stuart Maconie, Chris McCrudden, Lisa McInerney, Paul McVeigh, Daljit Nagra, Dave O'Brien, Cathy Rentzenbrink, Anita Sethi, Tony Walsh, Alex Wheatle and more.

First published in 1924, 'Which School?' brings together in one volume a wide range of information and advice, updated annually, on independent education for children up to the age of 18 years.

Packed with practical teaching strategies, Making Every Lesson Count bridges the gap between research findings and classroom practice. Shaun Allison and Andy Tharby examine the evidence behind what makes great teaching and explore how to implement this in the classroom to make a difference to learning. They distil teaching and learning down into six core principles - challenge, explanation, modelling, practice, feedback and questioning - and show how these can inspire an ethos of excellence and growth, not only in individual classrooms but across a whole school too. Combining robust evidence from a range of fields with the practical wisdom of experienced, effective classroom teachers, the book is a complete toolkit of strategies that teachers can use every lesson to make that lesson count. There are no gimmicky ideas here - just high impact, focused teaching that results in great learning, every lesson, every day. To demonstrate how attainable this is, the book contains a number of case studies from a number of professionals who are successfully embedding a culture of excellence and growth in their schools. Making Every Lesson Count offers an evidence-informed alternative to restrictive Ofsted-driven definitions of great teaching, empowering teachers to deliver great lessons and celebrate high-quality practice. Suitable for all teachers - including trainee teachers, NQTs, and experienced teachers - who want quick and easy ways to enhance their practice and make every lesson count.

This book outlines an approach to teaching and learning in physical education that prioritises meaningful experiences for pupils, using case studies to illustrate how practitioners have implemented this approach across international contexts. Prioritising the idea of meaningfulness positions movement as a primary way to enrich the quality of young people 's lives, shifting the focus of physical education programs to better suit the needs of contemporary young learners and resist the utilitarian health-oriented views of physical education that currently predominate in many schools and policy documents. The book draws on the philosophy of physical education to articulate the main rationale for prioritising meaningful experiences, before identifying potential and desired outcomes for participants. It highlights the distinct characteristics of meaningful physical education and its content, and outlines teaching and learning principles and strategies, supported by pedagogical cases that show what meaningful physical education can look like in school-based teaching and in higher education-based teacher education. With an emphasis on good pedagogical practice, this is essential reading for all pre-service and in-service physical education teachers or coaches working in youth sport.
