century, lasting a year, encompassing a dozen major battles and many smaller actions and sieges, with half a million men under arms by its end. Yet it remains strangely obscure

and overlooked by the Anglophone world, perhaps because of the inaccessibility of Hungarian-language sources for most English readers, combined with the limited

number of German-language sources due to Austria's embarrassment about the whole episode. The first half of this war was the Winter Campaign of 1848-1849, in which

invading Austrian armies drove deep into Hungary, only to be hurled back again almost to the Austrian border. The Austrian commander was sacked, and the Kaiser had

to ask the Tsar for his aid in the Summer Campaign. 250,000 Russians helped the Austrians finally to defeat the Hungarian revolution. This book is a translation of

the Austrian semi-official history of the Winter Campaign. It therefore provides a detailed and authoritative account of this neglected war, replete with fascinating

episodes and invaluable
factual data, in English
for the first time ever.
It includes extensive
information about orders
of battle, precious
nuggets about uniforms and

weaponry, actual
despatches reproduced
verbatim, and accounts of
myriad actions from tiny
skirmishes up to the major
battles of Kápolna and
Isaszeg. The translation

From a master historian comes an astonishing chronicle of life in medieval Europe and the battle that altered the

Although almost six

Agincourt is just as exciting, just as fascinating, and far more significant. She paints a gripping narrative of the October 1415 clash between outnumbered English

Populated with chivalrous
heroes, dastardly spies,
and a ferocious and bold
king, Agincourt is as
earthshaking as its

The British campaign in Norway in 1940 was an ignominious and abject

failure. It is perhaps best known as the fiasco which directly led to the fall of Prime Minister Neville Chamberlain and his replacement by Winston Churchill. But what were

the reasons for failure?
Why did the decision
makers, including
Churchill, make such poor
decisions and exercise
such bad judgement? What
other factors played a

part? John Kiszely draws on his own experience of working at all levels in the military to assess the campaign as a whole, its context and evolution from strategic failures,

intelligence blunders and German air superiority to the performance of the troops and the serious errors of judgement by those responsible for the higher direction of the
