

Can You Escape Guide

This is an epic story (four books) about a boy in Gold Rush California who finds the entrance beneath a lake to a vast motherlode of gold followed by the devastating results of sudden wealth. His dreams of doing good--building his father a steam-powered lumber mill, a beautiful white house with blue shutters for his mother, and a fine speedy horse for his little sister--all are shattered when the king of the mountains comes after him demanding a kings share of the gold. Rumors of California gold ran wild. Rivers of solid gold lay hidden in mountain valleys and could be harvested with a pick and shovel. Indians would trade chunks of gold for a pretty scarf or a few beads. Somewhere is a secret lake of gold. On his seventeenth birthday Petr Valory finds Gold Lake high and hidden in a valley protected by the Indians for centuries, a place that is a test of courage, a sacred place for dreaming. Far beneath the lake is a hidden chamber and a pharaohs wildest dreams of gold. Petr finds a fortune and his life turns into chaos. No man should see what lies beneath Gold Lake.

No one ever plans to fail in their faith. We all think we'll be the kind of Christian who follows the straight and narrow, ending our days with the relief of knowing we were ultimately a good and faithful servant. So why do so many leave that road? What enables some to survive as Christians when so many others have faltered? With A Christian Survival Guide, Ed Czerwski steps up to be your trail guide and provide some possible answers. He addresses some of the biggest, toughest questions in Christianity, including: - Disturbing Bible stories - Hell and what it means - Does the Bible have to be "true"? - The question of evil- Money and the church- Evangelizing when no one wants to listen Candid and wry, Czerwski deals with the tension of hard questions without resorting to empty answers, cliches, relativism, or the smug certainty that can so often drive seekers and strugglers further away. This popular blogger also has a knack of making long-ago biblical figures absolutely recognizable in today's issues. This survival guide is not meant to be a "one size fits all" handbook. It is a first step to confronting the big issues and challenges of a life of faith--even the ones that Christians fear most. Czerwski writes for those who both care and question deeply, and offers survival tips to help readers move from living on the edge to a place of health and life.

"This is a clear and thoughtful introduction to building relationships with your spirit guides. It shows readers how helpful spirit guides and angels can be in everything from the simplest to the most challenging of life decisions and how easy they are to connect with, too. Our spirit guides help us to: fulfill our purpose; make decisions that will move us forward faster; stop sabotaging ourselves as well as judging ourselves and everyone else; remember that we are more than our job or our relationship; see ourselves as beautiful and everything in life as a gift; give ourselves and everybody else a break; keep growing until the day we leave our bodies behind; go beyond the life we hoped for and onto the life we never even imagined."--Publisher information.

We live a time where man's wisdom prevails, to such an extent that the world has now determined what is good, what is real and what truth is. Moral-relativism has been promoted, where each man determined his own truth at the expense of absolute truth. Where the truth and wisdom of man prevails at the expense of God's wisdom, then corruption of mind and spirit follows (Romans 1, 1 Corinthians 1). We live a time where often people have turned what was once evil into good, and where good has become unpopular. This is why it says in the Scriptures to seek wisdom begins with the fear of the Lord, for wisdom is to know what is good and what is evil, and to know good from evil. And once we know what is right and wrong, we need to follow such a path. That is wisdom.

This true story of a revolt at a Nazi death camp, newly updated, is "a memorable and moving saga, full of anger and anguish, a reminder never to forget" (San Francisco Chronicle). On October 14, 1943, six hundred Jews imprisoned in Sobibor, a secret Nazi death camp in eastern Poland, revolted. They killed a dozen SS officers and guards, trampled the barbed wire fences, and raced across an open field filled with anti-tank mines. Against all odds, more than three hundred made it safely into the woods. Fifty of those men and women managed to survive the rest of the war. In this edition of Escape from Sobibor, fully updated in 2012, Richard Rashke tells their stories, based on his interviews with eighteen of the survivors. It vividly describes the biggest prisoner escape of World War II. A story of unimaginable cruelty. A story of courage and a fierce desire to live and to tell the world what truly went on behind those barbed wire fences.

Most scientists and researchers aren't prepared to talk to the press or to policymakers—or to deal with backlash. Many researchers have the horror stories to prove it. What's clear, according to Nancy Baron, is that scientists, journalists and public policymakers come from different cultures. They follow different sets of rules, pursue different goals, and speak their own language. To effectively reach journalists and public officials, scientists need to learn new skills and rules of engagement. No matter what your specialty, the keys to success are clear thinking, knowing what you want to say, understanding your audience, and using everyday language to get your main points across. In this practical and entertaining guide to communicating science, Baron explains how to engage your audience and explain why a particular finding matters. She explores how to ace your interview, promote a paper, enter the political fray, and use new media to connect with your audience. The book includes advice from journalists, decision makers, new media experts, bloggers and some of the thousands of scientists who have participated in her communication workshops. Many of the researchers she has worked with have gone on to become well-known spokespeople for science-related issues. Baron and her protégées describe the risks and rewards of "speaking up," how to deal with criticism, and the link between communications and leadership. The final chapter, "Leading the Way" offers guidance to scientists who want to become agents of change and make your science matter. Whether you are an absolute beginner or a seasoned veteran looking to hone your skills, Escape From the Ivory Tower can help make your science understood, appreciated and backed up acted upon.

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning. In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.
