Appropriate for one-semester courses in Administrative Law at both college and university levels. Legal concepts and Canadian business applications are introduced in a concise, one-semester format. The text is structured so that five chapters on contracts form the nucleus of the course, and the balance provides stand-alone sections that the instructor may choose to cover in any order. We've made the design more reader-friendly, using a visually-appealing four-colour format and enlivening the solid text with case snippets and extracts. The result is a book that maintains the strong legal content of previous editions while introducing more real-life examples of business law in practice.

This collection of essays, Volume VII in the Osgoode Society's series of Essays in the History of Canadian Law, is the first focused study of a variety of law firms and how they have evolved over a century and a half, from the golden age of the sole practitioner in the pre-industrial era to the recent rise of the mega-firm.

Marking 150 years since Confederation provides an opportunity for Canadian international law practitioners and scholars to reflect on Canada's rich history in international law and governance, where we find ourselves today in the community of nations, and how we might help shape a future in which Canada's rules-based and progressive approach to international law gains ascendancy.
