

Canadian Business Law Journal

This book provides an important contribution to the debate on the legal status and treatment of animals in Canada. It addresses a range of doctrinal and conceptual questions, situating legal analysis in the broader context of ethical and philosophical debate about justice in human-animal relationships.

In this book Professor Nicholls, one of Canada's leading scholars in corporate and securities law, offers a succinct and insightful discussion of the principal laws governing mergers and acquisitions transactions conducted in Canada. This third edition discusses the implications of a host of recent legal and regulatory developments.

This book offers a succinct and insightful discussion of the laws governing mergers and acquisitions transactions conducted in Canada. It draws on a collection of loosely related legal principles and rules in corporate law and securities law as well as in tax, competition, and a handful of other areas. Professor Nicholls, one of Canada's leading scholars in corporate law, provides a clear guide to this complex pastiche of legislation, regulation, administrative and judicial decision-making, and standard practices which have developed over time from both domestic and international precedents. This second edition discusses the implications of a host of legal and regulatory developments since 2007, including Multilateral Instrument 62-104 and the parallel Ontario securities law developments, groundbreaking court decisions including the Supreme Court of Canada's judgment in BCE Inc. v. 1976 Debentureholders, the British Columbia Court of Appeal's decision in Icahn Partners LP v. Lions Gate Entertainment and major Delaware opinions such as Air Products and Chemicals, Inc. v. Airgas, Inc. and Lyondell Chemical Company v. Ryan, as well as many securities commission decisions including Re Neo Materials Technologies, Re Baffinland Iron Mining Corp., Canadian Hydro Developers, Re Pulse Data Inc., Re VenGrowth Funds, and Re Patheon Inc.

Possible consequences of awarding non compensatory damages for breach of contract on Commercial Law

The Welfare State in Canada

The Black Book

Historical Perspectives on Canadian Competition Policy

Symposium : 16th Annual Workshop on Commercial and Consumer Law : Paper and Comments

This book is a study of doctrinal and methodological divergence in the common law of obligations. It explores particular departures from the common law mainstream and the causes and effects of those departures. Some divergences can be justified on the basis of a need to adapt the common law of contract, torts, equity and restitution to local circumstances, or to bring them into conformity with local values. More commonly, however, doctrinal or methodological divergence simply reflects different approaches to common problems, or different views as to

*what justice or policy requires in particular circumstances. In some instances divergent methodologies lead to substantially the same results, while in others particular causes of action, defences, immunities or remedies recognised in one jurisdiction but not another undoubtedly produce different outcomes. Such cases raise interesting questions as to whether ultimate appellate courts should be slow to abandon principles that remain well accepted throughout the common law world, or cautious about taking a uniquely divergent path. The chapters in this book were originally presented at the Seventh Biennial Conference on the Law of Obligations held in Hong Kong in July 2014. A separate collection, entitled *The Common Law of Obligations: Divergence and Unity* (ISBN: 9781782256564), is also being published. Includes chapters on all the states of the United States, and a chapter each on the Equal Credit Opportunity Act's restrictions regarding guaranties, the District of Columbia, Canada, Quebec, and Puerto Rico.*

Master's Thesis from the year 2010 in the subject Law - Comparative Legal Systems, Comparative Law, grade: B+, University of Auckland, course: Remedies for breach of contract, language: English, abstract: In the now famous Blake case the majority in the House of Lords has granted a (restitutionary) remedy for a breach of contract which has been alien to the law of contract so far. Although it was held to be available only in exceptional circumstances the judgment prompted Lord Hobhouse to express the following warning in his dissenting opinion: "If some more extensive principle of awarding non compensatory damages for breach of contract is to be introduced into our commercial law, the consequences will be very far-reaching and disruptive." It is the goal of this essay to examine whether Lord Hobhouse's fear of a silent reconceptualisation of the law of contract is justified. In order to fully understand the potential impact of the Blake case it is vital to bring oneself to mind what the law of contract was before the judgement in Blake was rendered. Accordingly the essay will start with an outline as to which remedies were and in fact still are available to a claimant under the pre-Blake law. After a summary of the Blake case itself, it will be described why a broad Blake remedy indeed might have a revolutionary effect on the conventional law of contract. However, - as history shows - not all revolutions are bad. Thus, even if Blake should have far-reaching and disruptive consequences on the law of contract it is by no means said that this is an undesirable result. It should be borne in mind that the law of contract is a default system that provides remedies for a breach of contract in case the parties did not - unconsciously or deliberately - stipulate

their own remedies which they are free to do. Ideally this default system leads to just and economically reasonable results. By this measure a default system has to prove its value and practicability. Thus, if it turns out that a law of contract under which the Blake remedy is generally available is superior to the current law its implementation must not be declined only because of its revolutionary character. Part IV of this essay draws the necessary comparison between the two alternatives in terms of economic efficiency. In doing so special attention is given to what is called the "efficient breach theory", which is often called upon to defend the current contractual rules. The essay will then conclude with a final assessment as to what the contract of law should be like in the author's opinion.

Antidumping Law and Practice

Canadian Perspectives on Animals and the Law

The third edition of Insurance Law: Doctrines and Principles follows the widely acclaimed first and second editions. It provides a detailed examination of the developing law of insurance, combining exposition of the law with critical analysis. The book is designed with the needs of undergraduate and postgraduate students in mind. The text is enhanced by extensive citations to case law and academic commentaries, making the book ideal for students, scholars and practitioners alike. This new edition reflects the many changes that have occurred in the law of insurance since the second edition was published in 2005. The book is divided into two parts. Part I considers the regulation of insurance business and the general principles underlying the law of insurance contracts. Part II examines the way in which these principles are shaped by the particular insurance context in which they operate. The book is readable and authoritative, with a sound grasp of the realities of insurance practice; it is well sourced and generous with supplementary points. 'Lowry & Rawlings is a welcome addition to the ranks of insurance law textbooks and a serious contender for the student readership in this field.' Nicholas Legh-Jones QC, Lloyds Maritime Commercial Law Quarterly 'I recommend the book for undergraduate use, and as a starting point for postgraduate use. The book is well written and full of clear explanations of a difficult field of the law.' Neil Campbell, Law Quarterly Review '...can be warmly recommended for purchase or use by lecturers and students in the subject.' Dennis Dowding, The Law Teacher '...a very useful text on insurance law ... an eminently readable, good and critical book. It is clearly of the highest calibre.' Reuben Hasson, Canadian Business Law Journal

Standard economic models assume that many small investors own firms. This is so in most large U.S. firms, but wealthy

individuals or families generally hold controlling blocks in smaller U.S. firms and in all firms in most other countries. Given this, the lack of theoretical and empirical work on tightly held firms is surprising. What corporate governance problems arise in tightly held firms? How do these differ from corporate governance problems in widely held firms? How do control blocks arise and how are they maintained? How does concentrated ownership affect economic growth? How should we regulate tightly held firms? Drawing together leading scholars from law, economics, and finance, this volume examines the economic and legal issues of concentrated ownership and their impact on a shifting global economy.

Who enjoys statutory preferred creditor status? What justifications exist for jurisdictions to maintain statutes that favour 'priority' creditors over other creditors and contributories? This book examines preferential debts derived from specific legislative provisions applying to corporate insolvency. In exploring the concept of preferential treatment, *Statutory Priorities in Corporate Insolvency Law* includes chapters that provide a doctrinal, theoretical and historical analysis of who enjoys preferred creditor status. As well as examining the traditional major categories of priorities, this work also identifies potential new categories for priority status such as environmental clean-up costs, international creditors, tort claimants and consumers among other non-consensual creditors. While the study focuses on Australian corporate insolvency law, where appropriate, comparisons are made with other common law jurisdictions, particularly the UK, Canada, New Zealand and the US.

Calder provides an annotated bibliography of scholarly journal material on intelligence, espionage, and related topics selected from vetted articles in fields such as history, criminal justice, political science, military and intelligence studies, humanities, law, and physics from 1844 onward. It contains more than 10,000 citations organized by author, with an extensive key word or term index and an index of coauthors.

The book includes chapters on what multi-bank financing is and who does it, relevant areas of law (including contract, torts, insolvency, tax, and statutes, such as the Bank Act), the mechanics of arranging loan syndications and loan participations, financial accommodation used (direct loans, bank guarantees, letters of credit, and bankers' acceptances), legal relations between parties in loan syndications and loan participations, rights and duties of the agent bank, securities regulation issues in loan syndications and loan participations, and accounting and tax issues in loan syndications and loan participations. Agasha Mugasha argues that loan syndications, loan participations, and related practices are commercial transactions between sophisticated parties and should be analysed and regulated as such. Sample documents for syndicated facility agreements, participation agreements, sale and participation agreements, and standby letters of credit are provided in appendices. Based on law in Canada, particularly Ontario, *The Law of Multi-bank Financing* includes discussions of a significant body of United States jurisprudence as well as the most important court decisions in other common-law countries.

The nature and the role of competition policy in Canada's history is a subject of growing interest. This bibliography provides a comprehensive picture of the development of Canada's competition law and policy over the past 100 years.

Scholars, economists, lawyers, and government officials debate American trade policy

This book is a detailed overview of the corporate and financial laws of Korea and analyzes current issues within those fields from both academic and practical perspectives, providing a unique tool for understanding Korean law in a business and financial context. The approach of the book is two-fold. On the one hand the book offers valuable insight into the fundamental principles of Korean business law, and landmark cases in the field. On the other hand there is extensive analysis of more recent developments and of current issues raised by recent court cases. The book combines coverage of Korean corporate law and Korean financial law and includes detailed examination of corporate law issues such as director liability, minority shareholder protection, and the dynamic practice area of mergers and acquisitions, and of financial law topics, including private equity, structured finance and foreign financial institutions. A rich and extensive resource with insight from leading scholars and practitioners, Korean Business Law will be of great benefit both to lawyers who have clients with business interests in Korea, and to scholars of international corporate law and governance.

Who's Who in Canadian Business 2001

The first major reference work of its kind in the social welfare field in Canada, this volume is a selected bibliography of works on Canadian social welfare policy. The entries in Part One treat general aspects of the origins, development, organization, and administration of the welfare state in Canada; included is a section covering basic statistical sources. The entries in Part Two treat particular areas of policy such as unemployment, disabled persons, prisons, child and family welfare, health care, and day care. Also included are an introductory essay

reviewing the literature on social welfare policy in Canada, a "User's Guide," several appendices on archival materials, and an extensive chronology of Canadian social welfare legislation both federal and provincial. The volume will increase the accessibility of literature on the welfare state and stimulate increased awareness and further research. It should be of wide interest to students, researchers, librarians, social welfare policy analysts and administrators, and social work practitioners.

Who's Who in Canadian Business, now in its 21st year, is a comprehensive and independent guide to Canada's business elite. Listing over 5,000 corporate and entrepreneurial leaders, each with a detailed biography and contact information, this directory is an excellent resource for anyone needing information on Canada's business world. Biographies include such information as current employment, address, education, career history, publications, favourite charities, and honours. Those listed are included because of the positions they hold in Canadian business and industry, or because of the contributions they have made to business in Canada. The directory is updated annually; new and updated biographies are marked for easy reference. All biographies are indexed by company name. Included in this edition is the PROFIT 100 / Next 100 listing of Canada's fastest-growing companies, as well as a list of professional associations, each with full address, contact names, and a brief description. This bundle includes Bankruptcy and Insolvency Law in Canada: Cases, Materials, and Problems and the Bankruptcy Law Picture Book: A Brief Intro to the Law of Bankruptcy, in Pictures.

Religious Institutions and the Law in Canada

Statutory Priorities in Corporate Insolvency Law

Business Law and Economics for Civil Law Systems highlights the relevance of economic analysis of business law from a civilian perspective. It integrates a comparative approach (common law and civil law) to economic analysis using tools and illustrations to assist in conducting critical economic analysis of rules in the field of business law. This book is a valuable contribution to the reflection on the place and meaning of value creation and accountability as goals for business law. It will be of great value to academics interested in business law, competition law, comparative law and legal theory, students studying law, business and economics, and to policy makers and regulators.

This fourth revised edition is the leading Canadian legal text on the law relating to religious institutions. Designed for use by both lawyers and church administrators, this synthesis of legal and religious concerns makes this text an essential resource for all professionals working in the area.

"Much has changed, in the markets and in the world over the decade and a half since the first edition. There have also been vast changes in many of the details of the Canadian securities regulatory environment. Nevertheless, the central

themes, topics and structure of securities regulation endure, and so the basic organization of the book is largely unchanged from the first edition. It begins with a very broad general overview of the Canadian capital markets and instruments in Chapter 1 aimed at readers with little or no prior business background. Chapters 2 and 3 then introduce the most fundamental definitions and concepts in Canadian securities law and sketch out the institutional framework within which Canadian securities laws and regulations are promulgated and administered. The chapters that follow, as in the first edition, deal with most of the principal topics covered in a law school course in securities regulation, including the regulatory regime governing dealers, advisers and other registrants (Chapter 4), public offerings (Chapter 6), exempt distributions (Chapter 7), insider reporting and prohibited insider trading (Chapter 8), continuous disclosure (Chapter 9), take-over and issuer bids (Chapter 10), and securities law enforcement (Chapter 11). A new chapter on the history of securities regulation has been added to this edition (Chapter 5), and a host of new, and still developing topics in securities regulation are discussed in Chapter 12, including changes that occurred after the earlier chapters of the book were completed. The status of the nascent Canadian co-operative capital markets regulatory system is among the issues canvassed in Chapter 12, an important and potentially transformative development on which the final word has not yet been written."

Cases, Materials, and Problems

'Proving' the cause of the plaintiff's injury in personal injury litigation often entails significant challenges, particularly when science cannot identify the cause of a biological phenomenon or when the nature of this cause is debatable. This problem is frequently encountered in medical malpractice cases, where the limitations of scientific knowledge are still extensive. Yet judges must decide cases, however uncertain the evidence with regard to proof of causation. Reluctant to leave patients without compensation, courts have in some cases challenged their traditional approach to causation through recourse to such techniques as reliance on factual presumptions and inferences, the concept of loss of chance, and reversal of the burden of proof. This book analyses and criticises the use of these various techniques by the courts of England,

Australia, Canada, France, and the civilian Canadian province of Quebec in confronting evidentiary causal difficulties caused by the uncertainties of medical science.

This publication includes eight papers which address the following issues: the beginning of Canadian competitions policy, 1888-1900; the administration and enforcement of competitions policy in Canada, 1889 to 1952; Canadian competition law reform, 1919 and 1935; the history of price maintenance legislation in Canada; the evolution of legislation, adjudication and administration; the case of the Competition Act; a comparison of Canada's competitive environment in 1889 and 1989; and 1889-1989 and into the twenty-first century.

Authored by leading experts from across the country, *Bankruptcy and Insolvency Law in Canada: Cases, Materials, and Problems* reimagines the traditional casebook. It provides clear, accessible, and detailed textual commentary on the and presents problem-solving exercises to challenge students to do what lawyers are renowned for--provide solutions.
