Canon Eos 70d

David Busch's Canon EOS R5/R6 Guide to Digital Photography

This new camera released in March of this year, following the Canon EOS 70D has been well reviewed for its picture quality, sensitive shutter and the fact that it can go with almost any lenses available on the market. It also has the ability to shot high quality videos (1080p) continuously focusing on a moving object. The price is very reasonable, so that both amateurs and professionals can have a go at taking great pictures. The new Canon EOS 80D has also been improved with an updated sensor, the ability to share pictures using Wi-Fi or near field communication (NFC) as well as an improved auto focus (AF) system. This open access peer-reviewed volume was inspired by the UNESCO UNITWIN Network for Underwater Archaeology International Workshop held at Flinders University, Adelaide, Australia in November 2016. Content is based on, but not limited to, the work presented at the workshop which was dedicated to 3D recording and interpretation for maritime archaeology. The volume consists of contributions from leading international experts as well as up-and-coming early career researchers from around the globe. The content of the book includes recording and analysis of maritime archaeology through emerging technologies, including both practical and theoretical contributions. Topics include photogrammetric recording, laser scanning, marine geophysical 3D survey techniques, virtual reality, 3D modelling and reconstruction, data integration and Geographic Information Systems. The principal incentive for this publication is the ongoing rapid shift in the methodologies of maritime archaeology within recent years and a marked increase in the use of 3D and digital approaches. This convergence of digital technologies such as underwater photography and photogrammetry, 3D sonar, 3D virtual reality, and 3D printing has highlighted a pressing need for these new methodologies to be considered together, both in terms of defining the state-of-the-art and for consideration of future directions. As a scholarly publication, the audience for the book includes students and researchers, as well as professionals working in various aspects of archaeology, heritage management, education, museums, and public policy. It will be of special interest to those working in the field of coastal cultural resource management and underwater archaeology but will also be of broader interest to anyone interested in archaeology and to those in other disciplines who are now engaging with 3D recording and visualization.

The Canon EOS 7D Mark II—a major update to the very popular 7D from 2009—is a powerful camera intended for everyone from beginners to advanced amateurs to professionals alike. With boosts in technology that significantly improve autofocus, video, and frame rate (the camera can shoot an astounding 10 frames per second!), the 7D Mark II is poised to be a big hit this fall. This book, in the popular From Snapshots to Great Shots series, is for anyone who upgrades from a point-and-shoot or for anyone who wants to jump into photography with the control and capabilities of a powerful DSLR. There's the manual, of course, as well as competing books, and while they all explain, often in 400+ pages, what the camera can do, none of them shows exactly how to use the camera to create great images! This book has one goal: to teach Canon EOS 7D Mark II owners how to make great shots using their camera. Everything in the book is in service of creating a great image. Starting with the top ten things needed to know about the camera, photographer Jeff Revell then carefully guides readers through the modes of the camera. Users get practical advice from a pro on which settings to use when, great shooting tips, and even end-of-chapter assignments. The Canon EOS 7D Mark II will be available at the end of November 2014. Features include: 20.2 MP sensor; 10 frames per second continuous shooting; wireless flash control; 1080p HD video recording; 65-point autofocus; and more.
