

## Canyoneering 2nd

**#1 NATIONAL BESTSELLER • "A harrowing tale of the perils of high-altitude climbing, a story of bad luck and worse judgment and of heartbreaking heroism." —PEOPLE** A bank of clouds was assembling on the not-so-distant horizon, but journalist-mountaineer Jon Krakauer, standing on the summit of Mt. Everest, saw nothing that "suggested that a murderous storm was bearing down." He was wrong. The storm, which claimed five lives and left countless more--including Krakauer's--in guilt-ridden disarray, would also provide the impetus for *Into Thin Air*, Krakauer's epic account of the May 1996 disaster. By writing *Into Thin Air*, Krakauer may have hoped to exorcise some of his own demons and lay to rest some of the painful questions that still surround the event. He takes great pains to provide a balanced picture of the people and events he witnessed and gives due credit to the tireless and dedicated Sherpas. He also avoids blasting easy targets such as Sandy Pittman, the wealthy socialite who brought an espresso maker along on the expedition. Krakauer's highly personal inquiry into the catastrophe provides a great deal of insight into what went wrong. But for Krakauer himself, further interviews and investigations only lead him to the conclusion that his perceived failures were directly responsible for a fellow climber's death. Clearly, Krakauer remains haunted by the disaster, and although he relates a number of incidents in which he acted selflessly and even heroically, he seems unable to view those instances objectively. In the end, despite his evenhanded and even generous assessment of others' actions, he reserves a full measure of vitriol for himself. This updated trade paperback edition of *Into Thin Air* includes an extensive new postscript that sheds fascinating light on the acrimonious debate that flared between Krakauer and Everest guide Anatoli Boukreev in the wake of the tragedy. "I have no doubt that Boukreev's intentions were good on summit day," writes Krakauer in the postscript, dated August 1999. "What disturbs me, though, was Boukreev's refusal to acknowledge the possibility that he made even a single poor decision. Never did he indicate that perhaps it wasn't the best choice to climb without gas or go down ahead of his clients." As usual, Krakauer supports his points with dogged research and a good dose of humility. But rather than continue the heated discourse that has raged since *Into Thin Air*'s denouncement of guide Boukreev, Krakauer's tone is conciliatory; he points most of his criticism at G. Weston De Walt, who coauthored *The Climb*, Boukreev's version of events. And in a touching conclusion, Krakauer recounts his last conversation with the late Boukreev, in which the two weathered climbers agreed to disagree about certain points. Krakauer had great hopes to patch things up with Boukreev, but the Russian later died in an avalanche on another Himalayan peak, Annapurna I. In 1999, Krakauer received an Academy Award in Literature from the American Academy of Arts and Letters--a prestigious prize intended "to honor writers of exceptional accomplishment." According to the Academy's citation, "Krakauer combines the tenacity and courage of the finest tradition of investigative journalism with the stylish subtlety and profound insight of the born writer. His account of an ascent of Mount Everest has led to a general reevaluation of climbing and of the commercialization of what was once a romantic, solitary sport; while his account of the life and death of Christopher McCandless, who died of starvation after challenging the Alaskan wilderness, delves even more deeply and disturbingly into the fascination of nature and the devastating effects of its lure on a young and curious mind."

A comprehensive guide to American cross-country travel furnishes detailed descriptions of a variety of fascinating odysseys, including such routes as an Eastern Seaboard trip, Route 66, Highway 40, and the Al-Can Highway to Anchorage, along with Top Ten lists, more than 160 route and city maps, listings of lodgings and eateries, road safety and car care tips, mileage charts, and more. Original. 40,000 first printing.

THE INSTANT NEW YORK TIMES BESTSELLER! Starred reviews from Kirkus Reviews \* Publishers Weekly \* Library Journal Named a "Must-Read" by TODAY, Us Weekly, Bustle, BuzzFeed, Goodreads, Entertainment Weekly, Publishers Weekly, Southern Living, Book Riot, Woman's Day, The Toronto Star, and more! For two sworn enemies, anything can happen during the Hawaiian trip of a lifetime—maybe even love—in this romantic comedy from the New York Times bestselling authors of Roomies. Olive Torres is used to being the unlucky twin: from inexplicable mishaps to a recent layoff, her life seems to be almost comically jinxed. By contrast, her sister Ami is an eternal champion...she even managed to finance her entire wedding by winning a slew of contests. Unfortunately for Olive, the only thing worse than constant bad luck is having to spend the wedding day with the best man (and her nemesis), Ethan Thomas. Olive braces herself for wedding hell, determined to put on a brave face, but when the entire wedding party gets food poisoning, the only people who aren't affected are Olive and Ethan. Suddenly there's a free honeymoon up for grabs, and Olive will be damned if Ethan gets to enjoy paradise solo. Agreeing to a temporary truce, the pair head for Maui. After all, ten days of bliss is worth having to assume the role of loving newlyweds, right? But the weird thing is...Olive doesn't mind playing pretend. In fact, the more she pretends to be the luckiest woman alive, the more it feels like she might be. With Christina Lauren's "uniquely hilarious and touching voice" (Entertainment Weekly), The Unhoneymooners is a romance for anyone who has ever felt unlucky in love.

American Book Publishing Record

63 hikes and side trips into every corner of a million acres of spectacular Colorado Plateau scenery. Bradt's Azores is the only comprehensive guidebook to the nine-island archipelago, a nature-lovers' wilderness perched at the western extremity of Europe in the mid-Atlantic, and one of the best places in the world for whale watching. Thanks to the experience of expert botanist and author David Sayers, and the ongoing involvement of author Murray Stewart, the book retains a depth of knowledge about flora and fauna and continues to provide the strong geological and botanical information that is so integral to getting to know the islands. This new edition has been thoroughly updated and also has an expanded focus taking in the land- and sea-based activities which have become a significant part of Azores attractions in the past few years. In Bradt's Azores, full background and practical information is complemented by a region-by-region breakdown and nine chapters - one per island - to provide all the details needed for a successful visit. There are also 29 maps and separate sections on language and the islands' flora. This new edition includes details of Ponta Delgada's new 5-star hotels and Santa Maria's new round-island walk, plus a full update on the accommodation upgrades that have taken place in recent times. Information about new waymarked walks is also covered, plus new bike-hire and whale-watching companies. The Azores attract geologists, bird-watchers, whale-watchers and anyone who loves nature in all its forms. Mountaineers can head to Pico island to climb Portugal's highest peak. The Azores' volcanic origins make for a rugged, diverse landscape, a suitable backdrop for excellent walking, mountain-biking or canyoning. A geological curiosity, a nature-lover's paradise and - more recently - a mid-Atlantic adventure playground, the Azores have become increasingly accessible in recent years. Despite the increase in visitor numbers, though, they retain an authenticity, a genuineness which in most places remains true to its roots. Safe and welcoming, the islands are drawing in a whole new group of visitors, mainly from Europe and the USA, attracted by the diversity of outdoor activities, easier accessibility and improvements to the visitor infrastructure.

*Canyoning is the sport of descending narrow canyon gorges, which have flowing water and*

*rappelling through waterfalls. The canyons of the San Juan and West Elk Mountains in Colorado carve through colorful sedimentary, igneous and metamorphic rock layers with an active volcanic geologic history. This guidebook explores technical descents of the waterfalls and narrows found in these spectacular mountain ranges surrounding iconic Colorado mountain towns including Ouray, Silverton, Durango, Pagosa Springs, Telluride, Marble, Lake City and Creede along the Silver Thread Byway. Once an oasis for the Utes, and later a center of silver and gold mining, the San Juan Mountains have become a destination for outdoor recreation. This guide offers a detailed introduction to these special canyons along with historical, ecological and geological information for the area as well as ethics and safety considerations for the sport. In addition to new canyon descents, this book contains updated information on classic Ouray and Silverton canyon routes, with new details about exits and anchors.*

*This is another in the series by Michael Kelsey for those who enjoy hiking and climbing. This book is unique in that every canyon described requires the use of ropes and rapelling to get all the way through. There are hundreds of maps and pictures, as well as directions and descriptions of the many small canyons available for exploration. Mr Kelsey's books have sold and continue to sell well in the Rocky Mountain region.*

*Zion National Park is home to majestic and wondrous canyons, cliffs, crags, mesas, rivers, and slot canyons. World travelers remain in awe as they drive, walk, hike, and climb into such a unique place that is filled with vibrant, sacred, and mystical energy. Gradually becoming transfixed, many push themselves further into the wilds, oblivious to weather and dangers, deeper into the backcountry, suddenly finding themselves in extreme predicaments. These are the moments when accidents often occur. . .and these once beautiful, holy places become menacing and dangerous--sometimes leading to agonizing and horrific accidents--and even death! Since the early 1900s there have been 70 recordable deaths that have taken place inside Zion's park boundaries. Hundreds of rescues of outdoor enthusiasts have ensued as well. This book covers all of those deaths, and many of the gripping rescues that have occurred during the past century. Bo Beck, a senior Zion Search and Rescue member for over 17 years, also shares his personal accounts. You will marvel at the riveting stories, and take away a better understanding of how to be smarter and better prepared for your next great adventure!*

Rappelling accident analysis and prevention is also included, along with a section on rappel back-ups and safety checks. Inside you'll find information on: Ropes Rappel devices Slings and webbing Knots and hitches Rigging rappel anchors Rappelling methods Rope retrieval techniques Rappelling accident analysis Rappel safety back-ups Working with fixed lines Rope ascending techniques

This full color book includes everything beginning climbers need to know to safely top rope climbing routes, from tying knots to setting anchors to belaying. The author is an American Mountain Guides Association certified Rock Instructor.

The San Rafael Swell is a seemingly endless expanse of slickrock, reefs, rivers, narrow canyons, mesas, towers, and pinnacles. It is the wilderness home of coyotes, eagles, mountain lions, and bighorn sheep. Steve Allen's Canyoneering: The San Rafael Swell has long been the standard for exploring this remarkable area. With the input of fellow guidebook author Joe Mitchell, Canyoneering the Northern San Rafael Swell replaces the older volume with a completely rewritten and updated text containing more detail, greater accuracy, and a tighter focus on the northern half of the Swell. This is the most current and comprehensive guide to the region. Designed for wilderness enthusiasts of all ages and skill levels, this guide provides detailed information on 25 hikes, including trip length, difficulty, elevation gain, and water sources. Side trips, points of interest, and historical information are noted throughout the text. This guidebook includes for the first time a wealth of topographic maps for all routes and roads, elevation profiles, and GPS coordinates. A second volume covering the southern portion of the San Rafael Swell is in preparation.

On Sunday April 27, 2003, 27-year old Aron Ralston set off for a day's hiking in the Utah canyons. Dressed in a t-shirt and shorts, Ralston, a seasoned climber, figured he'd hike for a few hours and then head off to work. 40 miles from the nearest paved road, he found himself on top of an 800-pound boulder. As he slid down and off of the boulder it shifted, trapping his right hand against the canyon wall. No one knew where he was; he had little water; he wasn't dressed correctly; and the boulder wasn't going anywhere. He remained trapped for five days in the canyon: hypothermic at night, de-hydrated and hallucinating by day. Finally, he faced the most terrible decision of his life: bracing the bones in his wrist by snapping them against the boulder, he hacked through the skin, and finally succeeded in amputating his right hand and wrist. The ordeal, however, was only beginning. He still faced a 60-foot rappell to freedom, and a walk of several hours back to his car - along the way, he miraculously met a family of hikers, and with his arms tourniqued, and blood-loss almost critical, they heard above them the whir of helicopter blades; just in time, Aron was rescued and rushed to hospital. Since that day, Aron has had a remarkable recovery. He is back out on the mountains, with an artificial limb; he speaks to select groups on his ordeal and rescue; and amazingly, he is upbeat, positive, and an inspiration to all who meet him. This is the account of those five days, of the years that led up to them, and where he goes from here. It is narrative non-fiction at its most compelling.

In July 1993, five teenage boys and three men on an LDS youth group attempted a canyoneering trip in Kolob Creek of Zion National Park. The upstream Kolob Reservoir was releasing a ton per second of water through the canyon. Though this flow surprised them at the canyon's entrance, the leader believed that the park's rangers had assured them that their trip was safe, so they continued. Two of the adult leaders quickly drowned; the remaining man and five boys were trapped in the canyon for five days until the Park Service rescued them. This book tells the story of the group's tragic adventure and explores its damage suit against the National Park Service and the Washington County Water Conservancy District (owner of the reservoir).
