This book is published open access under a CC BY license. This book constitutes the proceedings of the 5th International Workshop on Symbiotic Interaction, Symbiotic 2016, held in Padua, Italy, in October 2016. The 12 full papers and 3 short papers presented in this volume were carefully reviewed and selected from 23 submissions. The idea of symbiotic systems put forward in this workshop capitalizes on the computers' ability to implicitly detect the users goals, preferences or/and psycho-physiological states and thereby enhancing human-computer interaction (HCI). The papers present an overview of the symbiotic relationships between humans and computers with emphasis on user-driven research on symbiotic systems, adaptive systems, implicit input data, physiological computing and BCI, but also on understanding the nature of the interdependence and agency between computers and humans more broadly.

This book comprises eight essays that consider the politics and polemics of monuments in Africa in the wake of the #RhodesMustFall movement in 2015. The removal of the Rhodes statue from UCT main campus is the pivot on which the discussion of monuments as heritage in South Africa turns. It raised a number of questions about the implementation of heritage policy and the unequal deployment of memorials in the South African and other postcolonial landscapes. The essays in this volume are written by authors coming from different backgrounds and different disciplines. They address different aspects of this event and its aftermath, offering some intensive critique of existing monuments, analysing the successes of new initiatives, meditating on the visual resonances of all monuments and attempting to map ways of moving forward.
