"Architect Tom Kundig is known worldwide for the originality of his work. This paperback edition of Tom Kundig: Houses, first published in 2006, collects five of his most prominent early residential projects, which remain touchstones for him today. In a new preface written for this edition, Kundig reflects on the influence that these designs continue to have on his current thinking. Each house, presented from conceptual sketches through meticulously realized details, is the product of a sustained and active collaborative process among designer, builder, and client. The work of the Seattle-based architect has been called both raw and refined--disparate characteristics that produce extraordinarily inventive designs inspired by both the industrial structures ubiquitous to his upbringing in the Pacific Northwest and the vibrant craft cultures that are fostered there." --

**In March 1968, thousands of Chicano students walked out of their East Los Angeles high schools and middle schools to protest decades of inferior and discriminatory education in the so-called "Mexican Schools." During these historic walkouts, or "blowouts," the students were led by Sal Castro, a courageous and charismatic Mexican American teacher who encouraged the students to make their grievances public after school administrators and school board members failed to listen to them. The resulting blowouts sparked the beginning of the urban Chicano Movement of the late 1960s and early 1970s, the largest and most widespread civil rights protests by Mexican Americans in U.S. history. This fascinating testimonio, or oral history, transcribed and presented in Castro's voice by historian Mario T. Garcia, is a compelling, highly readable narrative of a young boy growing up in Los Angeles who made history by his leadership in the blowouts and in his career as a dedicated and committed teacher. Blowout! fills a major void in the history of the civil rights and Chicano movements of the 1960s, particularly the struggle for educational justice.**

Advances in Business Education & Training is a Book Series to foster advancement in the field of Business Education and Training. It serves as an international forum for scholarly and state-of-the-art research and development into all aspects of Business Education and Training. This new volume deals with several aspects of the challenge to design learning in and for a changing world. The first part concerns program development. How to build curricula that are future-proof? Principles to innovate our curricula are identified. It answers the question how we can incorporate the need for change in our thinking about curriculum-development and identify the necessary elements to incorporate in our curricula. The second part focuses on the increasing diversity of students and employees within our schools and organizations, in terms of culture, language, and perception of ability, gifts, and talents. This offers a range of opportunities, but at the same time can possibly jeopardize some processes that are taken for granted. Chapters in this part analyze the processes that play a crucial role in dealing with this diversity and identify educational practices that can help to harvest the potential that lies within this diversity. The third part of this book digs further into the possibilities that are opened up by the implementation of

ICT-support in our learning environments. E-learning provides tools to adapt these environments to the needs of an increasingly diverse student-population. In the last part we focus specifically on the workplace and how learning can be designed in such a way that employees are equipped for a shifting workplace. On the one hand it is looked how training can affect performance in the workplace. Does learning transfer to the work environment? On the other hand it is questioned how one can design affordances to trigger learning in the workplace.

"Demon slayers, a kick-ass heroine who's as funny as she is fierce, and a hot enemies-to-lovers romance? Yes, please!" I'm ready to start fresh. I mean, who wouldn't be after defeating demons at a rave sent there by my criminal mastermind parents? I could use a vaca. Instead, I get a job. But, I can't complain. I've been hired as a full-time demon hunter for the best agency in the country. I've finally landed my dream job. There's only one little problem. Dax Murphy is my boss. The same Dax Murphy who tricked me, drugged me, and seduced me into thinking he was the best thing since sliced bread. What the hell was I thinking, getting hot and heavy with him? Dax isn't even that sexy. Who likes eight-pack abs, sparkling blue eyes, immeasurable wealth, and great power, anyway? Sure, I can secretly hate him while I do my job. The agency is going to need me, too, once demons begin popping up that can conjure magic. That shouldn't be happening, and I have a feeling my outlaw parents are involved. Soon, people in our agency start going belly up, and what I think is a routine investigation turns into a fight for our lives. When Dax and I are trapped together in an evil playscape, only my undeveloped magic stands between us and oblivion. And time is running out. If you like K.F. Breen, Patricia Briggs, Faith Hunter, Laurell K. Hamilton, Shannon Mayer, Kim Harrison, Ilona Andrews, Dannika Dark, and Jennifer Estep, you'll enjoy this wildly fun, enemies-to-lovers Urban Fantasy.

R&D Decisions, Strategy, Policy and Innovations explores how research and development decisions affect all of us. They are linked inextricably to the performance of firms and of economics as a whole. Their importance means that they are of concern to a large number of practitioners, policy-makers and researchers. This book demonstrates the range of issues and perspectives which R&D can encompass and at the same time brings out the elements which unite them. The papers in this book are organized into three main sections: \* Strategy and Organization explores the importance of R&D and of the structures and strategies of individual organizations. The emerging 'core competence paradigm' is especially noted. \* Policy and Performance looks at what new thinking on R&D more generally implies for government policy and the performance of industries, regions and economies. \* Disclosure and the Market examines issues raised by changing regulations on the disclosure of R&D expenditure.
