Occupations are part of our everyday world, meaning they can be used to encourage readers to make associations between a type of work and the person doing it, shortening the "get to know the character" curve. Whether a person loves or hates what they do, a job can reveal many things, including their priorities, beliefs, desires, and needs. The Occupation Thesaurus will show you how a career choice can characterize, drive the plot, infuse scenes with conflict, and get readers on the character's side through the relatable pressures, responsibilities, and stakes inherent with work. THINK OUTSIDE THE BOX REGARDING CAREER OPTIONS Select a job that packs a powerful punch. Inside The Occupation Thesaurus, you'll find: Informative profiles on popular and unusual jobs to help you write them with authority Believable conflict scenarios for each occupation, giving you unlimited possibilities for adding tension at the story and scene level Advice for twisting the stereotypes often associated with these professions Instruction on how to use jobs to characterize, support story structure, reinforce theme, and more An in-depth study on how emotional wounds and basic human needs may influence a character's choice of occupation A brainstorming tool to organize the various aspects of your character's personality so you can come up with the best careers for them Do more with your description and choose a profession for your character that showcases who they are, what they want, and what they believe in. *The global pandemic has decimated the job market and permanently transformed the future of the workplace. Seemingly overnight, some 40 million Americans became unemployed - at levels not seen since the Great Depression - and are now left wondering how to find their next job in a world where every job is at a premium. But headhunter Rob Barnett gives readers a leg up by providing an 11-point game plan to not only get them hired but help them find work they love and navigate the post-pandemic workforce.*

*You are unknowingly part of an underground army that gives the world new things every day. New designs, new looks, new features, and new ways for old things to work. Most of the world doesn't know where they come from, they just love to have them. Billions of dollars a year depend on creative people and thousands of companies hire them. This is where you come in. This is why the world needs you. Right now. Simply put, this book is about the business side of creativity, written for creative people, by creative people. Get a job you love, keep a job you have, get paid more for your talent. Whether you want a solo career, your own business, a position at a well-known company, or a promotion from within, this book will be your guide. This book also provides a comprehensive list of creative jobs in design, career best practices, and advice from experts in their field, helping talented creative people to:*

- Understand the vast universe of creative occupations in design
- Choose which career path to follow
- Master the social and business politics of the creative world
- Learn the truth about the Design industry (the good, the bad, and the ugly) from people who are already making money doing it

*The amount of people who hope to turn their creativity into a professional career wildly outnumber the very select few who actually end up doing so. Why? The biggest reason many amazingly gifted people never pursue a career in creativity is that they don't know where to start or how to do so. Thus, they never realize that they too can be one of the many people out in the world making a (rather good) living by doing something they love. Creativity is as genetic as eye color. It's hardcoded baby. Built in. Irreversible. Irresistible. Don't try to shake it. Embrace your talent, find the right job, get paid for your talent. This book is about so much more than money. It's about love. Loving what you do. Loving what you create. Loving where you work. There are very few people that can create something out of nothing. Use this book as a guide to focus your efforts in finding the right creative job. Don't stop wondering. Don't stop asking questions. And don't stop looking until your Monday mornings are as enjoyable as your Friday afternoons. It might not be easy to find, but that job exists.*

*Would you like to work with a green company but don't know where to start? Have you just moved to the Washington DC Metro Area and would like to learn more about which companies are 'green' in this area?Are you a recent grad and want to get some experience in the 'green' industry? Are you in the middle of your career and looking to redirect your efforts to a green industry, or the green version of your company? With the recent explosion of green jobs emerging in the United States, many individuals are seeking gainful green employment. Up until now there haven't been many comprehensive resource guides to help these individuals identify the best resources to get them started on the green career and green job path. This Guide is the first of its kind, a one stop resource for green career and green jobs featuring both national resources as well as local Washington, D.C. metro area specific resources.*
