

Carl Mcdaniel Gbv

This book interrogates the ways in which new technological advances impact the thought and practices of humanism. Chapters investigate the social, political, and cultural implications of the creation and use of advanced forms of technology, examining both defining benefits and potential dangers. Contributors also discuss technology's relationship to and impact on the shifting definitions we hold for humankind. International and multi-disciplinary in nature and scope, the volume presents an exploration of humanism and technology that is both racially diverse and gender sensitive. With great depth and self-awareness, contributors offer suggestions for how humanists and humanist organizations might think about and relate to technology in a rapidly changing world. More broadly, the book offers a critical humanistic interrogation of the concept of "progress" especially as it relates to technological advancement.

Presenting real-life case studies of child sexual abuse in the Caribbean as a basis for discussing interventions and models of practice that are relevant for a wide range of cultural and social settings, this multi-disciplinary text will be of interest to scholars, professionals and practitioners alike. Contributors to this volume demonstrate how sexual abuse is never just a problem of the individual: structures of inequality and the intersection of the factors they give rise to help to explain why some children are more at risk of abuse than others. Furthermore, the sub-systems in which lives are lived can compound risk and vulnerability or alternatively, can be sources of support and change. This book draws on these ideas to discuss practice across a range of service users: children, adolescent girls, teenage mothers, children with learning disabilities, fathers, mothers, women who abuse, juvenile sex offenders and children in residential care. p>

The death penalty is contested across modern social, political, academic, and legal institutions, and this interdisciplinary text helps readers analyze that debate. It begins with *Furman v. Georgia*, which doubles as the Supreme Court's only decision striking down the death penalty and as the origin of the modern American death penalty. The text explores the legal rules and moral reasoning behind the principle that the death penalty be reserved for the worst offenders, as well as the most uncomfortable realities of American capital punishment--the likelihood of wrongful executions and the undeniable influence of race on death penalty practice. Discussion of law and theory is always supplemented with appropriate empirical studies, and is connected to the practice of lawyers on the ground. The text concludes with a glimpse to the future of the death penalty, and situates the increasingly exceptional American experience in an international context. This legal material is carefully presented so as to remain accessible to non-lawyers, and it is intended for anyone with an interest in capital punishment.

A comprehensive overview of the interdisciplinary field of Women's and Gender Studies, featuring original contributions

from leading experts from around the world The Companion to Women's and Gender Studies is a comprehensive resource for students and scholars alike, exploring the central concepts, theories, themes, debates, and events in this dynamic field. Contributions from leading scholars and researchers cover a wide range of topics while providing diverse international, postcolonial, intersectional, and interdisciplinary insights. In-depth yet accessible chapters discuss the social construction and reproduction of gender and inequalities in various cultural, social-economic, and political contexts. Thematically-organized chapters explore the development of Women's and Gender Studies as an academic discipline, changes in the field, research directions, and significant scholarship in specific, interrelated disciplines such as science, health, psychology, and economics. Original essays offer fresh perspectives on the mechanisms by which gender intersects with other systems of power and privilege, the relation of androcentric approaches to science and gender bias in research, how feminist activists use media to challenge misrepresentations and inequalities, disparity between men and women in the labor market, how social movements continue to change Women's and Gender Studies, and more. Filling a significant gap in contemporary literature in the field, this volume: Features a broad interdisciplinary and international range of essays Engages with both individual and collective approaches to agency and resistance Addresses topics of intense current interest and debate such as transgender movements, gender-based violence, and gender discrimination policy Includes an overview of shifts in naming, theoretical approaches, and central topics in contemporary Women's and Gender Studies Companion to Women's and Gender Studies is an ideal text for instructors teaching courses in gender, sexuality, and feminist studies, or related disciplines such as psychology, history, education, political science, sociology, and cultural studies, as well as practitioners and policy makers working on issues related to gender and sexuality.

Global Corruption Report: Education

Hume and the Rise of Capitalism

Dying to be Men

Although David Hume's contributions to philosophy are firmly established, his economics has been largely overlooked. A Philosopher's Economist offers the definitive account of Hume's "worldly philosophy" and argues that economics was a central preoccupation of his life and work. Margaret Schabas and Carl Wennerlind show that Hume made important contributions to the science of

economics, notably on money, trade, and public finance. Hume's astute understanding of human behavior provided an important foundation for his economics and proved essential to his analysis of the ethical and political dimensions of capitalism. Hume also linked his economic theory with policy recommendations and sought to influence people in power. While in favor of the modern commercial world, believing that it had and would continue to raise standards of living, promote peaceful relations, and foster moral refinement, Hume was not an unqualified enthusiast. He recognized many of the underlying injustices of capitalism, its tendencies to promote avarice and inequality, as well as its potential for political instability and absolutism. Hume's imprint on modern economics is profound and far reaching, whether through his close friend Adam Smith or later admirers such as John Maynard Keynes and Friedrich Hayek. Schabas and Wennerlind's book compels us to reconsider the centrality and legacy of Hume's economic thought—for both his time and ours—and thus serves as an important springboard for reflections on the philosophical underpinnings of economics.

This book is a companion to Bhikkhu Anālayo's previous study of the Genesis of the Bodhisattva ideal. In the present book he turns to another important aspect in the development of Buddhist thought: the beginnings of the Abhidharma. Anālayo shows that the two main modes generally held in academic circles to explain the arising of the Abhidharma -- the use of lists (mātṅk?) and the question-and-answer format -- are formal elements that in themselves are not characteristic of Abhidharma thought. Going beyond the notion that the coming into being of the Abhidharma can be located in such formal aspects, he shows how the attempt to provide a comprehensive map of the teachings gradually led to the arising of new terminology and new ideas. He identifies the notion of the supramundane path as an instance where fully fledged Abhidharma thought manifests in the discourses. Anālayo concludes that what characterizes the Abhidharma is not the mere use of dry lists and summaries, but rather a mode of thought that has gone further (abhi-) than the Dharma taught in the early discourses in general.

More than two decades after Michael Rutter (1987) published his summary of protective processes associated with resilience, researchers continue to report definitional ambiguity in how to define and operationalize positive development under adversity. The problem has been partially the result of a dominant view of resilience as something individuals have, rather than as a process that families, schools, communities and governments facilitate. Because resilience is related to the presence of social risk factors, there is a need for an ecological interpretation

of the construct that acknowledges the importance of people's interactions with their environments. The Social Ecology of Resilience provides evidence for this ecological understanding of resilience in ways that help to resolve both definition and measurement problems.

For a full list of entries and contributors, sample entries, and more, visit the Routledge International Encyclopedia of Women website. Featuring comprehensive global coverage of women's issues and concerns, from violence and sexuality to feminist theory, the Routledge International Encyclopedia of Women brings the field into the new millennium. In over 900 signed A-Z entries from US and Europe, Asia, the Americas, Oceania, and the Middle East, the women who pioneered the field from its inception collaborate with the new scholars who are shaping the future of women's studies to create the new standard work for anyone who needs information on women-related subjects.

While humanist sensibilities have played a formative role in the advancement of our species, critical attention to humanism as a field of study is a more recent development. As a system of thought that values human needs and experiences over supernatural concerns, humanism has gained greater attention amid the rapidly shifting demographics of religious communities, especially in Europe and North America. This outlook on the world has taken on global dimensions as well, with activists, artists, and thinkers forming a humanistic response not only to traditional religion, but to the pressing social and political issues of the 21st century. With in-depth, scholarly chapters, The Oxford Handbook of Humanism aims to cover the subject by analyzing its history, its philosophical development, its influence on culture,

and its engagement with social and political issues. In order to expand the field beyond more Western-focused works, the Handbook discusses humanism as a worldwide phenomenon, with regional surveys that explore how the concept has developed in particular contexts. The Handbook also approaches humanism as both an opponent to traditional religion as well as a philosophy that some religions have explicitly adopted. By both synthesizing the field, and discussing how it continues to grow and develop, the Handbook promises to be a landmark volume, relevant to both humanism and the rapidly changing religious landscape.

What are our obligations towards future generations who stand to be harmed by the impact of today's environmental crises? This book explores ecological sustainability as a human rights issue and examines what our long-term responsibilities might be. This interdisciplinary collection of chapters provides a basis for understanding the debates on the provision of sustainability for future generations from a diverse set of theoretical standpoints. Covering a broad range of perspectives such as risk and uncertainty, legal implementation, representation, motivation and economics, *Towards the Ethics of a Green Future* sets out the key questions involved in this complex ethical issue. The contributors bring theoretical discussions to life through the use of case studies and real-world examples. The book also includes clear and tangible recommendations for policymakers on how to put the suggestions proposed within the book into practice. This book will be of great interest to all researchers and students concerned with issues of sustainability and human rights, as well as scholars of environmental politics, law and ethics more generally.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Written by an international team of experts, the Handbook makes accessible a full range of theoretical and applied approaches to the study of material culture, and the place of materiality in social theory, presenting current thinking about material culture from the fields of archaeology, anthropology, geography, and science and technology studies.

This book brings together diverse voices from across the field of sustainable human computer interaction (SHCI) to discuss what it means for digital technology to support sustainability and how humans and technology can work together optimally for a more sustainable future. Contemporary digital technologies are hailed by tech companies, governments and academics as leading-edge solutions to the challenges of environmental sustainability; smarter homes, more persuasive technologies, and a robust Internet of Things hold the promise for creating a greener world. Yet, deployments of interactive technologies for such purposes often lead to a paradox: they algorithmically "optimize" heating and lighting of houses without regard to the dynamics of daily life in the home; they can collect and display data that allow us to reflect on energy and emissions, yet the same information can cause us to raise our expectations for comfort and convenience; they might allow us to share best practice for sustainable living through social networking and online communities, yet these same systems further our participation in consumerism and contribute to an ever-greater volume of electronic waste. By acknowledging these paradoxes, this book represents a significant critical inquiry into digital technology's longer-term impact on ideals of sustainability. Written by an interdisciplinary team of contributors this book will be of great interest to students and scholars of human computer interaction and environmental studies.

Capital punishment is irrevocable. It prohibits the correction of mistakes by the justice system and leaves no room for human error, with the gravest of consequences. There is no evidence of a deterrent effect of the death penalty. Those sacrificed on the altar of retributive justice are almost always the most vulnerable. This book covers a wide range of topics, from the discriminatory application of the death penalty, wrongful convictions, proven lack of deterrence effect, to legality of the capital punishment under international law and the morality of taking of human life.

Traditional homicide indicators are based on male violence - and do little to predict when, or whom, women will kill. Vickie Jensen shows that gender equality plays an important role in predicting female homicide patterns. Jensen's analysis of the occurrence of women's homicide reveals that lethal violence is most likely when severe gender inequalities exist in the family group. Her conclusions establish the clear relationship between political, economic, legal, and social equality for women and the reduction of all forms of domestic violence.

Culturally Intelligent Practice for Caribbean and International Contexts

Mastering This Competency with Ease and Confidence

This open access book looks at how a democracy can devolve into a post-factual state. The media is being flooded by populist narratives, fake news, conspiracy theories and make-believe. Misinformation is turning into a challenge for all of us, whether politicians, journalists, or citizens. In the age of information, attention is a prime asset and may be converted into money, power, and influence – sometimes at the cost of facts. The point is to obtain exposure on the air and in print

media, and to generate traffic on social media platforms. With information in abundance and attention scarce, the competition is ever fiercer with truth all too often becoming the first victim. *Reality Lost: Markets of Attention, Misinformation and Manipulation* is an analysis by philosophers Vincent F. Hendricks and Mads Vestergaard of the nuts and bolts of the information market, the attention economy and media eco-system which may pave way to postfactual democracy. Here misleading narratives become the basis for political opinion formation, debate, and legislation. To curb this development and the threat it poses to democratic deliberation, political self-determination and freedom, it is necessary that we first grasp the mechanisms and structural conditions that cause it.

A comprehensive overview of feminist scholarship edited by an internationally recognized and leading figure in the field *Companion to Feminist Studies* provides a broad overview of the rich history and the multitude of approaches, theories, concepts, and debates central to this dynamic interdisciplinary field. Comprehensive yet accessible, this edited volume offers expert insights from contributors of diverse academic, national, and activist backgrounds—discussing contemporary research and themes while offering international, postcolonial, and intersectional perspectives on social, political, cultural, and economic institutions, social media, social justice movements, everyday discourse, and more. Organized around three different dimensions of Feminist Studies, the *Companion* begins by exploring ten theoretical frameworks, including feminist epistemologies examining Marxist and Socialist Feminism, the activism of radical feminists, the contributions of Black feminist thought, and interrelated approaches to the fluidity of gender and sexuality. The second section focuses on methodologies and analytical frameworks developed by feminist scholars, including empiricists, economists, ethnographers, cultural analysts, and historiographers. The volume concludes with detailed discussion of the many ways in which pedagogy, political ecology, social justice, globalization, and other areas within Feminist Studies are shaped by feminism in practice. A major contribution to scholarship on both the theoretical foundations and contemporary debates in the field, this volume: Provides an international and interdisciplinary range of the essays of high relevance to scholars, students, and practitioners alike Examines various historical and modern approaches to the analysis of gender and sexual differences Addresses timely issues such as the difference between radical and cultural feminism, the lack of women working as scientists in academia and other research positions, and how activism continues to reformulate feminist approaches Draws insight from the positionality of postcolonial, comparative and transnational feminists Explores how gender, class, and race intersect to shape women's e

Writing across theological disciplines, nine African American women scholars reflect on what it means to live as responsible doers of justice. With some classic essays and some contributions published here for the first time, each chapter in this new volume in the *Library of Theological Ethics* series presents analytical strategies for understanding the

story of womanist scholarship in the service of the black community. The Library of Theological Ethics series focuses on what it means to think theologically and ethically. It presents a selection of important and otherwise unavailable texts in easily accessible form. Volumes in this series will enable sustained dialogue with predecessors through reflection on classic works in the field.

Case Conceptualization

During the past three decades, feminist scholars have successfully demonstrated the ubiquity and omnirelevance of gender as a sociocultural construction in virtually all human collectivities, past and present. Intrapsychic, interactional, and collective social processes are gendered, as are micro, meso, and macro social structures. Gender shapes, and is shaped, in all arenas of social life, from the most mundane practices of everyday life to those of the most powerful corporate actors. Contemporary understandings of gender emanate from a large community of primarily feminist scholars that spans the gamut of learned disciplines and also includes non-academic activist thinkers. However, while incorporating some cross-disciplinary material, this volume focuses specifically on sociological theories and research concerning gender, which are discussed across the full array of social processes, structures, and institutions. As editor, I have explicitly tried to shape the contributions to this volume along several lines that reflect my long-standing views about sociology in general, and gender sociology in particular. First, I asked authors to include cross-national and historical material as much as possible. This request reflects my belief that understanding and evaluating the here-and-now and working realistically for a better future can only be accomplished from a comparative perspective. Too often, American sociology has been both tempero- and ethnocentric. Second, I have asked authors to be sensitive to within-gender differences along class, racial/ethnic, sexual preference, and age cohort lines.

This major new Handbook provides a cutting-edge and transdisciplinary overview of the main issues, debates, state-of-the-art methods, and key concepts in peace and conflict studies today. The fields of peace and conflict studies have grown exponentially since being initiated by Professor Johan Galtung half a century ago. They have forged a transdisciplinary and professional identity distinct from security studies, political science, and international relations. The volume is divided into four sections: understanding and transforming conflict creating peace supporting peace peace across the disciplines. Each section features new essays by distinguished international scholars and professionals working in peace studies and conflict

resolution and transformation. Drawing from a wide range of theoretical, methodological, and political positions, the editors and contributors offer topical and enduring approaches to peace and conflict studies. The Handbook of Peace and Conflict Studies will be essential reading for students of peace studies, conflict studies and conflict resolution. It will also be of interest and use to practitioners in conflict resolution and NGOs, as well as policy makers and diplomats.

The Nature of Transformation: Environmental Adult Education is based on 15 years of educating for social-environmental change around the world. It is for adult and community educators, trainers, literacy and health care practitioners, social activists, community artists and animators, labour educators, and professors in higher education interested in weaving environmental issues in to their educational practice. It is also for environmental activists and educators who want to link social issues to environmental issues and problems. This book is a contribution to the discourse and practice of adult education in the community and/or the academy, aimed to respond creatively and critically the contemporary socio-environmental crisis and to encourage hope and a stronger sense of political agency through an ecological approach to teaching, and learning. The Nature of Transformation includes a discussion of key adult education theories we used to augment our educational practice, provides a plethora educational activities, shares workshop design considerations and some of the challenges we faced in our work, as well as stories from adult and community educators around the world. The book concludes with a list of resources to enhance understandings of adult education theory and practice. The Nature of Transformation illustrates how to critically and creatively integrate the rest of nature, concepts of ecological and gender and justice, citizenship, critical environmental consciousness and activism into educating and learning in community settings, organisations, education institutions or workplaces. In particular, there is an emphasis on using the arts as a tool for learning and change. With its emphasis on acknowledging and confronting ecological oppression, working towards socio-environmental justice, ensuring hope and fun are integral to the learning process, encouraging defiance, agency and creativity, challenging assumptions, and helping people to find solutions environmental adult education is a valuable player in any pedagogical quest for change and transformation.

Integrating recent research and developments in the field, this revised second edition introduces an easy-to-master strategy for developing and writing culturally sensitive case conceptualizations and treatment plans. Concrete guidelines and updated case material are provided for developing conceptualizations for the five most common therapy models: Cognitive-Behavioral Therapy (CBT), Psychodynamic, Biopsychosocial, Adlerian, and Acceptance and Commitment Therapy. The chapters also include specific exercises and activities for mastering case conceptualization and related competencies and skills. Also new to this edition is a chapter on couple and family case conceptualizations, and an emphasis throughout on trauma. Practitioners, as well as graduate students in counseling and in clinical psychology, will gain the essential skills and knowledge they need to master case conceptualizations.

Treating Child Sexual Abuse in Family, Group and Clinical Settings

A distinguished social and feminist historian chronicles the dramatic changes that have taken place in the lives of American and British women over the course of the last one hundred years, explaining how women have shaped the twentieth century and featuring essays on topics ranging from lesbian culture to Barbie dolls.

“Far more than a book about how to care for a horse, though it stands out as one of the best on the subject . . . beautiful” (Susan Richards, author of Chosen by a Horse). This unique guide to horsemanship incorporates Eastern philosophy to describe how horses understand and respond to the flow of vital energy around them, and how they use this energy, called chi, to communicate with their herd, express dominance, and sense predators. Written by the award-winning author of The Scalpel and the Soul, and including forewords by Monty Roberts and Dr. Robert Miller, Zen Mind, Zen Horse shares safe, simple techniques to make you more receptive to your animal’s chi, so you can develop a calm and effective training style that will not only help your horse follow commands, but strengthen the spiritual bond between horse and rider.

Deception and truth-telling weave through the fabric of nearly all human interactions and every communication context. The Palgrave Handbook of Deceptive Communication unravels the topic of lying and deception in human communication, offering an interdisciplinary and comprehensive examination of the field, presenting original research, and offering direction for future investigation and application. Highly prominent and emerging deception scholars from around the world investigate the myriad forms of deceptive behavior, cross-cultural perspectives on deceit, moral dimensions of deceptive communication, theoretical approaches to the study of deception, and strategies for detecting and deterring deceit. Truth-telling, lies, and the many grey areas in-between are explored in the contexts of identity formation, interpersonal relationships, groups and organizations, social and mass media, marketing, advertising, law enforcement interrogations, court, politics, and propaganda. This handbook is designed for advanced undergraduate and graduate students, academics, researchers, practitioners, and anyone interested in the pervasive nature of truth, deception, and ethics in the modern world.

Based on field research and interviews in the USA and Brazil, 'Dying to be Men' explores how manhood or male identity is shaped in poor urban settings, how it is that some young men resist the prevailing norms, what the implications are for social policy and what are the most important forms of intervention.

The Dawn of Abhidharma

Routledge International Encyclopedia of Women

Towards the Ethics of a Green Future (Open Access)
Youth, Masculinity and Social Exclusion
Encountering the Other in Mental Health Care
A Reader

The sixth edition of the highly successful The City Reader juxtaposes the very best classic and contemporary writings on the city to provide the comprehensive mapping of the terrain of Urban Studies and Planning old and new. The City Reader is the anchor volume in the Routledge Urban Reader Series and is now integrated with all ten other titles in the series. This edition has been extensively updated and expanded to reflect the latest thinking in each of the disciplinary areas included and in topical areas such as compact cities, urban history, place making, sustainable urban development, globalization, cities and climate change, the world city network, the impact of technology on cities, resilient cities, cities in Africa and the Middle East, and urban theory. The new edition places greater emphasis on cities in the developing world, globalization and the global city system of the future. The plate sections have been revised and updated. Sixty generous selections are included: forty-four from the fifth edition, and sixteen new selections, including three newly written exclusively for The City Reader. The sixth edition keeps classic writings by authors such as Ebenezer Howard, Ernest W. Burgess, LeCorbusier, Lewis Mumford, Jane Jacobs, and Louis Wirth, as well as the best contemporary writings of, among others, Peter Hall, Manuel Castells, David Harvey, Saskia Sassen, and Kenneth Jackson. In addition to newly commissioned selections by Yasser Elshestawy, Peter Taylor, and Lawrence Vale, new selections in the sixth edition include writings by Aristotle, Peter Calthorpe, Alberto Camarillo, Filip DeBoech, Edward Glaeser, David Owen, Henri Pirenne, The Project for Public Spaces, Jonas Rabinovich and Joseph Lietman, Doug Saunders, and Bish Sanyal. The anthology features general and section introductions as well as individual introductions to the selected articles introducing the authors, providing context, relating the selection to other selection, and providing a bibliography for further study. The sixth edition includes fifty plates in four plate sections, substantially revised from the fifth edition.

“A passionate, incisive critique of the many ways in which women and girls of color are systematically erased or marginalized in discussions of police violence.” —Michelle Alexander, author of The New Jim Crow Invisible No More is a timely examination of how Black women, Indigenous women, and women of color experience racial profiling, police brutality, and immigration enforcement. By placing the individual stories of Sandra Bland, Rekia Boyd, Dajerria Becton, Monica Jones, and Mya Hall in the broader context of the twin epidemics of police violence and mass incarceration, Andrea Ritchie documents the evolution of movements centered around women’s experiences of policing. Featuring a powerful forward by activist Angela Davis, Invisible No More is an essential exposé on police violence against WOC that demands a radical rethinking of our visions of safety—and the means we devote to achieving it.

Corruption and poor governance are acknowledged as major impediments to realizing the right to education and to reaching the Millennium

Development Goal of universal primary education by 2015. Corruption not only distorts access to education, but affects the quality of education and the reliability of research findings. From corruption in the procurement of school resources and nepotism in the hiring of teachers, to the buying and selling of academic titles and the skewing of research results, major corruption risks can be identified at every level of the education and research systems. Conversely, education serves as a means to strengthen personal integrity and is a critical tool to address corruption effectively. The Global Corruption Report (GCR) is Transparency International's flagship publication, bringing the expertise of the anti-corruption movement to bear on a specific corruption issue or sector. The Global Corruption Report on education consists of more than 70 articles commissioned from experts in the fields of corruption and education, from universities, think-tanks, business, civil society and international organisations. The Global Corruption Report on education and academic research will provide essential analysis for understanding the corruption risks in the sector and highlight the significant work that has already been done in the field to improve governance and educational outcomes. This will be an opportunity to pull together cutting edge knowledge on lessons learnt, innovative tools and solutions that exist in order to fight corruption in the education sector.

Based on a recently completed project of cultural consultation in Montreal, Cultural Consultation presents a model of multicultural and applicable health care. This model used clinicians and consultants to provide in-depth assessment, treatment planning, and limited interventions in consultation with frontline primary care and mental health practitioners working with immigrants, refugees, and members of indigenous and ethnocultural communities. Evaluation of the service has demonstrated that focused interventions by consultants familiar with patients' cultural backgrounds could improve the relationship between the patient and the primary clinician. This volume presents models for intercultural work in psychiatry and psychology in primary care, general hospital and specialty mental health settings. The editors highlight crucial topics such as: - Discussing the social context of intercultural mental health care, conceptual models of the role of culture in psychopathology and healing, and the development of a cultural consultation service and a specialized cultural psychiatric service - Examining the process of intercultural work more closely with particular emphasis on strategies of consultation, the identity of the clinician, the ways in which gender and culture position the clinician, and interaction of the consultant with family systems and larger institutions - Highlighting special situations that may place specific demands on the clinician: working with refugees and survivors of torture or political violence, with separated families, and with patients with psychotic episodes This book is of valuable use to mental health practitioners who are working in multidisciplinary settings who seek to understand cultural difference in complex cases. Psychiatrists, psychologists, social workers, nurse practitioners, primary care providers and trainees in these disciplines will make thorough use of the material covered in this text.

Companion to Women's and Gender Studies

Serial murderers generate an abundance of public interest, media coverage, and law enforcement attention, yet after decades of studies, serial murder researchers have been unable to answer the most important question: Why? Providing a unique and comprehensive exploration, *Creating Cultural Monsters: Serial Murder in America* explains connections between American culture and the incidence of serial murder, including reasons why most identified serial murderers are white, male Americans. It describes the omnipresence of serial murder in American media and investigates what it would take to decrease its occurrence. Presenting empirically supported arguments that have the potential to revolutionize how serial murder is understood, studied, and investigated, this volume: Places the serial murder phenomenon in a cultural context, promoting qualitative understanding and the potential for reducing its frequency Includes an illustrated model that explains how people utilize cultural values to construct lines of action according to their cultural competencies Demonstrates how the American cultural milieu fosters serial murder and the creation of white male serial murderers Provides a critique of the American mass media's role in the development and notoriety of serial murder Describes the framework on which the majority of definitions of serial murder are based Drawn from years of dedicated research of Dr. Julie B. Wiest, this volume presents a new approach to the study of U.S. serial murder, offers important implications for law enforcement and mass media, and forms a basis for future research on serial murder, murder, and violence in the U.S. and in other nations.

Available Open Access under CC-BY-NC-ND. Drawing on Roma community voices and expert research, this book provides a powerful tool to challenge conventional discourses and analyses on Romani identity, poverty and exclusion. Through the transformative vehicle of a 'Social Europe', this edited collection presents new concepts and strategies for framing social justice for Romani communities across Europe. The vast majority of Roma experience high levels of exclusion from the labour market and from social networks in society. This book maps out how the implementation of a new 'Social Europe' can offer innovative solutions to these intransigent dilemmas. This insightful and accessible text is vital reading for the policymaker, practitioner, academic and activist.

In response to extensive market feedback, Larry Gitman and Carl McDaniel are proud to offer *The Best of The Future of Business*. Developed directly from Gitman and McDaniel's larger, best-selling text, this new version will appeal to instructors wanting a streamlined text combined with a proven ancillary package. With a goal of helping students understand business trends, anticipate future

business conditions, and prepare for successful careers, The Best of The Future of Business showcases the dramatic changes occurring in the business environment of today and tomorrow. Key principles are illustrated by hundreds of current examples, while the latest concepts and theories are covered in detail with numerous illustrations. Regardless of how you teach, The Best of The Future of Business offers an extensive system of teaching and learning resources designed to ease course preparation and drive student interactivity.

Longlisted for the PEN/John Kenneth Galbraith Award for Nonfiction "A MUST-READ FOR ANYONE WHO WANTS TO UNDERSTAND THE INTERSECTION OF RACE AND POLICE BRUTALITY IN AMERICA."-CONGRESSMAN JOHN LEWIS During his 28-year career, Matthew Horace rose through the ranks from a police officer working the beat to a federal agent working criminal cases in some of the toughest communities in America to a highly decorated federal law enforcement executive managing high-profile investigations nationwide. Yet it was not until seven years into his service-when Horace found himself face down on the ground with a gun pointed at his head by a white fellow officer-that he fully understood the racism seething within America's police departments. Through gut-wrenching reportage, on-the-ground research, and personal accounts from interviews with police and government officials around the country, Horace presents an insider's examination of archaic police tactics. He dissects some of the nation's most highly publicized police shootings and communities to explain how these systems and tactics have hurt the people they serve, revealing the mistakes that have stoked racist policing, sky-high incarceration rates, and an epidemic of violence. "Horace's authority as an experienced officer, as well as his obvious integrity and courage, provides the book with a gravitas."-THE WASHINGTON POST "The Black and the Blue is an affirmation of the critical need for criminal justice reform, all the more urgent because it comes from an insider who respects his profession yet is willing to reveal its flaws."-USA TODAY
