From Edward P. Jones comes one of the most acclaimed novels in recent memory—winner of the Pulitzer Prize for Fiction and the National Book Critics Circle Award for Fiction. The Known World tells the story of Henry Townsend, a black farmer and former slave

who falls under the tutelage of William Robbins, the most powerful man in Manchester County, Virginia. Making certain he never circumvents the law, Townsend runs his affairs with unusual discipline. But when death takes him unexpectedly, his widow, Caldonia, can't uphold the estate's order, and chaos ensues. Edward P. Jones has woven a footnote of history into an epic that takes an unflinching look at slavery in all its moral complexities. "A masterpiece that deserves a place in the American literary canon."—Time

John Howard 'Pondoro' Taylor (1904 - 1969) was a big-game hunter of Irish descent. In Africa he experimented extensively using different types of rifles and calibers, which made him an expert in big game rifles. He is credited with developing the 'Taylor KO Factor' and wrote several now classic books. As a professional ivory hunter with some thirty years of continuous living in the African bush, John Taylor used and tested all the various calibers of British, American and German rifles, and with them killed many species of big game found on the continent of Africa. Taylor's discussion on the practical

application of ballistics includes doubles, magazines, and single-shots; the practical value of steel-jacketed bullets versus those covered with cupronickel; the faults of copper-tubed bullets; the actual effects of softpoint bullets with varying degrees of lead exposure; the necessity of modern bullets that will really stand up to the requirements when fired into heavy animals; and many other valuable tips and explanations about cartridges and rifles. Remains a classic work.

This fascinating visual account of firearms shows everything from the earliest cannons to modern weapons of war. It also highlights how gun technology and military tactics developed in tandem over time. Centuries ago, the Chinese discovered that if they put gunpowder and a projectile into a

tube and ignited it, they could fire the projectile with enormous force. The first guns were born. Firearms: An Illustrated History showcases over 300 firearms including pistols, revolvers, rifles, shotguns, machine-guns, and artillery, each with annotated close-up photographs and details of origins, barrel, and caliber. It details the use of the firearms, not just in the military but for sports, hunting, and law enforcement. This comprehensive volume traces the history of firearms, highlighting "turning points" such as the rifle with its parallel spiraled grooves that could impart spin to bullets making them fly straighter. It also showcases iconic firearms such as the Walther self-loading pistol popularised in James Bond films. With information on the great gunsmiths including Beretta and Kalashnikov and a detailed guide to how guns work, Firearms: An Illustrated History is an essential purchase for everyone interested in guns and military history.

Heart of Darkness is a short novel by Polish novelist Joseph Conrad, written as a frame narrative, about Charles Marlow's life as an ivory transporter down the Congo River in Central Africa. The river is "a mighty big river, that you could see on the map, resembling an immense snake uncoiled, with its head in the sea, its body at rest curving

afar over a vast country, and its tail lost in the depths of the land." In the course of his travel in central Africa, Marlow becomes obsessed with Mr. Kurtz. The story is a complex exploration of the attitudes people hold on what constitutes a barbarian versus a civilized society and the attitudes on colonialism and racism that were part and parcel of European imperialism. Originally published as a three-part serial story, in Blackwood's Magazine, the novella Heart of Darkness has been variously published and translated into many languages. In 1998, the Modern Library ranked Heart of Darkness one of the hundred best novels in English of the twentieth century. This is a new release of the original 1948 edition.

Winchester lever-action repeating rifles are an integral part of the folklore of the American West. Introduced after the American Civil War, the first Winchester, the M1866, would go on to see military service as far afield as Bulgaria, but it was in the hands of civilians that it would become known as 'The gun that won the west'. Offering a lethal combination of portability, ruggedness and ammunition interchangeability with pistol sidearms, the Winchesters and their innovative and elegant breech-loading system represented a revolutionary design. They were used by a staggering variety of military and civilian groups - gold-miners, trappers, hunters, farmers, lawmen, professional gunmen and Native Americans. It equipped a whole generation of settlers and as such left an imprint on American culture that continues to resonate today. This book explores the Winchesters' unique place in history, revealing the technical secrets of their

success with a full array of colour artwork, period illustrations and close-up photographs. The entirely updated and revised Ammo & Ballistics 6 is now available and is better than ever! Ammo & Ballistics 6 contains data and illustrations on virtually every sporting cartridge sold in the USA. Besides clear and concise writing that clarifies the complexities of ballistic coefficients and energy versus momentum, this revised edition covers 200-plus calibers . . . from the .17 Mach 2 to the .700 Nitro Express. It contains information on rifle and handgun calibers, and it covers manufacturers, bullet weights, types, and construction. In addition, each caliber has an exact technical drawing with all dimensions and angles. There are over 3,000 tables with ballistic data for every caliber and every load for all commercially loaded hunting ammunition sold in the United States. Tables include velocity, energy, wind drift, bullet drop, and ballistic coefficients up to 1,000 yards. Manufacturers include A-Square, Aguila, ATK, Black Hills, CCI/Speer, Cor-Bon Bullet, Dakota Arms, Eley Ltd., Federal Cartridge, Fiocchi, Hirtenberger, Hornady, Patria Lapua Oy, Lazzeroni, Kynoch (Kynamco Ltd.), MagTech, Norma, Nosler, Inc., PMC (Eldorado Cartridge Corp.), Remington, Dynamit (Nobel-RWS Inc.), Sellier and Bellot, Ultramax, Weatherby, and Winchester. If you want to know where you will be hitting at long distances, this is the book for you. This book is, quite literally, indispensable for the hunter or shooter.

Starting from the very beginning, The Practical Guide to Reloading Ammunition will help readers understand the gear they need - and what can wait. Chapter by chapter, the book explains the entire process from brass cleaning to final inspection. Loaded with pictures and illustrations, the process is made simple and clear. With this book, readers will be reloading their own cost-effective ammunition quickly and safely. From the very earliest days of organized warfare, combatants have wanted to develop weapons with more firepower. This has inevitably led to a wide variety of repeating weapons, capable of a degree of sustained fire without reloading. Based largely upon new research, this book explores the history of repeating and multi-fire weapons, beginning with the Chinese repeating crossbow in the 4th century BCE, and ending with the world's most common firearm, the Kalashnikov AK-47. The author describes the potency of the machine gun in World War I, the development of the semiautomatic pistol and the role of the submachine gun in improving the effectiveness of the infantryman.

MacKayla Lane's life is good. She has great friends, a decent job, and a car that breaks down only every other week or so. In other words, she's your perfectly ordinary twenty-first-century woman. Or so she thinks . . . until something extraordinary happens. When her sister is murdered, leaving a single clue to her death—a cryptic message on Mac's cell phone—Mac journeys to Ireland in search of

answers. The quest to find her sister's killer draws her into a shadowy realm where nothing is as it seems, where good and evil wear the same treacherously seductive mask. She is soon faced with an even greater challenge: staying alive long enough to learn how to handle a power she had no idea she possessed—a gift that allows her to see beyond the world of man, into the dangerous realm of the Fae. . . . As Mac delves deeper into the mystery of her sister's death, her every move is shadowed by the dark, mysterious Jericho, a man with no past and only mockery for a future. As she begins to close in on the truth, the ruthless Vlane—an alpha Fae who makes sex an addiction for human women—closes in on her. And as the boundary between worlds begins to crumble, Mac's true mission becomes clear: find the elusive Sinsar Dubh before someone else claims the all-powerful Dark Book—because whoever gets to it first holds nothing less than complete control of the very fabric of both worlds in their hands. . . . The 1864 Sand Creek Massacre is one of the most disturbing and controversial events in American history. While its historical significance is undisputed, the exact location of the massacre has been less clear. Because the site is sacred ground for Cheyenne and Arapaho Indians, the question of its location is more than academic; it is intensely personal and spiritual. In 1998 the National Park

Service, under congressional direction, began a research program to verify the location of the Sand Creek site. The team consisted of tribal members, Park Service staff and volunteers, and local landowners. In Finding Sand Creek, the project's leading historian, Jerome A. Greene, and its leading archeologist, Douglas D. Scott, tell the story of how this dedicated group of people used a variety of methods to pinpoint the site. Drawing on oral histories, written records, and archeological fieldwork, Greene and Scott present a wealth of evidence to verify their conclusions. Greene and Scott's team study led to legislation in the year 2000 that established the Sand Creek Massacre National Historic Site.
