Peterson's Master the PCAT is an in-depth review that offers thorough preparation for the computer-based exam. After learning about the structure, format, scoring and score reporting, and the subtests and question types, you can take a diagnostic test to learn about your strengths and weaknesses. The next six parts of the eBook are focused on detailed subject reviews for each subtest: verbal ability, reading comprehension, biology, chemistry, quantitative ability, and writing. Each review includes practice questions with detailed answer explanations. You can take two practice tests to track your study progress. The tests also offer detailed answer explanations to further improve your knowledge and understanding of the tested subjects. The eBook concludes with an appendix that provides helpful information on a variety of careers in pharmacy and ten in-depth career profiles.

Threads of Life is the story of living organisms and their components, evolution, diversity, and interactions with the environment. Threads of Life discusses the organisms, their common threads or molecules, and how these threads promote the evolution of biologically diverse organisms. The evolution of organisms occurs through the processes of natural selection or the environmental influences, which define how these organisms exist. The main idea expressed throughout this manuscript is the presence of common threads that connect all organisms even in diversity. These common threads of life that are fundamental in all organisms include cell, DNA, RNA, chemicals, food web, and many others.
