The Constant and Changing Faces of the Goddess: Goddess Traditions of Asia contains essays written by established scholars in the field that trace the multiplicity of Asian goddesses: their continuities, discontinuities, and importance as symbols of wisdom, power, transformation, compassion, destruction, and creation. The essays demonstrate that while treatments of the goddess may vary regionally. culturally, and historically, it is possible to note some consistencies in the overall picture of the goddess in Asia. The book provides a comprehensive treatment of the goddess, culminating in the selections that draw from research on Indian, Nepali, Chinese, Japanese, and Vietnamese traditions, seldom found in other works of similar subject. The volume will be useful for students in religious studies, gender studies, Asian studies, and women's studies. With the intent of making the volume truly broad in scope, an effort has been made to include works written by art historians, sociologists, anthropologists, and religious studies scholars. Culture cannot be separated from religion; they are intertwined as an organic whole, and variations manifest themselves in the rituals and daily lives of the people. In this sense, all the essays are interconnected: the goddess manifests in many forms and appeals to differing aspects of a particular culture as a paradigm of the divine feminine.

This book discusses the tradition and the institutions of federalism in the Eastern, Central and Western European countries and deals with many innovative issues such as multi-level-governance, network government, devolution, subsidiarity, asymmetry and functionalism. An assumption of the book is that the European enlargement and the new European constitution could result in two major evolutions in the future: one is a full federal state, the other is an institutional response to the effects of the technological innovations of our epoch.

This book focuses on various concepts of space and their historical evolution. In particular, it examines the variations and identification; in a range of contexts: in the determination and comprehension of exteriority; in individuation and identification; in defining the meaning of nature and of the natural sciences; in aesthetical formations and representations; in determining the relationship between experience, behavior and environment; and in the construction of mental and social subjectivity. Accordingly, the book offers a comprehensive review of concepts of space as formulated by Kant, Husserl, Heidegger, Einstein, Heisenberg, Penrose and Thorne, subsequently comparing them to notions developed more recently, in the current age, which Foucault dubbed the age of space. The book is divided into four distinct yet deeply interconnected parts, which explore the space of life, the space of experience, the space of science and the space of the arts. The Changing Faces of Journalism

In contrast to most migration studies that focus on specific "foreigner" groups in Germany, this study simultaneously compares and contrasts the legal, political, social, and economic opportunity structures facing diverse categories of the ethnic minorities who have settled in the country since the 1950s. It reveals the contradictory, and usually self-defeating, nature of German Leitkultur (with which very few of its own citizens still identify). The main barriers to effective integration—and socio-economic revitalization in general—sooner lie in the country's obsolete labor market regulations and bureaucratic procedures. Drawing on local case studies, personal interviews, and national surveys, the author describes "the human faces" behind official citizenship and integration practices in Germany, and in doing so demonstrates that average citizens are much more multi-cultural than they realize. How does a peoples' music reflect their history, their occupations, cultural beliefs and values? These are the core questions that this book addresses in rela-tion to the Aawambo people of Namibia. The author brings to the fore the nuanced views of different people,

Säkularisierung wird oft mit der Aufklärung in Verbindung gebracht. Jedoch wurde sie nicht von allen Denkern der Aufklärern aufgedeckten Probleme und Lösungen geworfen werden, die sich bei der Untersuchung des Stellenwertes der Religion in der Gesellschaft auftaten. Tatsächlich sahen Hutcheson, Reid, Hume, Smith, Ferguson und Millar die Situation der Religion in der Gesellschaft aus verschiedenen Perspektiven und kamen oftmals zu sehr unterschiedlichen Schlüssen. Dieses komplexe Verständnis von Religion führte zur Zusammenstellung dieses Buches, welches sich auf drei Fragen konzentriert: Welche Rolle nimmt die Religion die soziale Ordnung? Secularization is often associated with the Enlightenment. However, not all Enlightenment thinkers defended it. This book aims to cast light on the problems and solutions that the thinkers of the Scottish Enlightenment uncovered when studying the place of religion in society. In fact, Hutcheson, Reid, Hume, Smith, Ferguson and Millar saw

the situation of religion in society from different perspectives and often reached very different conclusions. This compile this book, which focuses on three questions: What is the role of religion in society? How does the existence of God and natural religion affect the social order? How should certain religious beliefs be understood in a secular context, and what are their social and moral repercussions? These three key issues are closely connected to the Scottish thinkers' chief common concerns: defending natural human sociability from contractualist theories and determining whether religion hinders or strengthens the political and moral order of society.
