In Nucleation in Condensed Matter, key theoretical models for nucleation are developed and experimental data are used to discuss their range of validity. A central aim of this book is to enable the reader, when faced with a phenomenon in which nucleation appears to play a role, to determine whether nucleation is indeed important and to develop a quantitative and predictive description of the nucleation behavior. The third section of the book examines nucleation processes in practical situations, ranging from solid state precipitation to nucleation in biological systems to nucleation in food and drink. Nucleation in Condensed Matter is a key reference for an advanced materials course in phase transformations. It is also an essential reference for researchers in the field. Unified treatment of key theories, experimental evaluations and case studies Complete derivation of key models Detailed discussion of experimental measurements Examples of nucleation in diverse systems

Federal Register

The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.

Global Securities Litigation and Enforcement provides a clear and exhaustive description of the national regime for the enforcement of securities legislation in cases of misrepresentation on financial markets. It covers 29 jurisdictions worldwide, some of them are important although their law is not well known. It will be an invaluable resource for academics and students of securities litigation, as well as for lawyers, policy-makers and regulators. The book also provides a comprehensive contribution debate on whether public or private enforcement is preferable in terms of development of securities markets. It will appeal to those interested in the legal origins theory and in comparative securities law, and shows that the classification of jurisdictions within legal families does not explain the differences in legal regimes. While US securities law often serves as a model for international convergence, some of its elements, such as securities class actions, have not been adopted worldwide.

The author seeks to clarify early Quaker views and explain how Friends came to differ so significantly in their beliefs from other English Protestants. By examining the Baptist-Quaker relationship in particular, he is able both to identify a primary link between the two and, and the same time, discover explanations for some of their dramatic differences. He draws on scores of previously unused tracts and manuscripts produced by the Baptist-Quaker disputes - materials which, in setting forth accusations, clarifications, and rebuttals, shed new light on the beliefs of the antagonists.

Email marketing effectively is not rocket science. It is much more about human relationships. Did you know ... I ran a national TV commercial airing on ESPN, MTV, A&E, VH-1, Comedy Central ... In this commercial my call to action was to visit a website and sign up for my list, then I would follow up with these folks using email marketing ... I also lost the gifts of communication (speaking, writing, reading, etc.) with a brain aneurism bursting and subsequent surgery. This book is dedicated to improving healthcare through reducing delays experienced by patients. With an interdisciplinary approach, this new edition, divided into five sections, begins by examining healthcare as an integrated system. Chapter 1 provides a hierarchical model of healthcare, rising from departments, to centers, regions and the "macro system." A new chapter demonstrates how to use simulation to assess the interaction of system components to achieve performance goals, and Chapter 3 provides hands-on methods for developing process models to identify and remove bottlenecks, and for developing facility plans. Section 2 addresses crowding and the consequences of delay. Two new chapters (4 and 5) focus on delays in emergency departments, and Chapter 6 then examines medical outcomes that result from waits for surgeries. Section 3 concentrates on management of demand. Chapter 7 presents breakthrough strategies that use real-time monitoring systems for continuous improvement. Chapter 8 looks at the patient appointment system, particularly through the approach of advanced access. Chapter 9 concentrates on managing waiting lists for surgeries, and Chapter 10 examines triage outside of emergency departments, with a focus on allied health programs Section 4 offers analytical tools and models to support analysis of patient flows. Chapter 11 offers techniques for scheduling staff to match patterns in patient demand. Chapter 12 surveys the literature on simulation modeling, which is widely used for both healthcare design and process improvement. Chapter 13 is new and demonstrates the use of process mapping to represent a complex regional trauma system. Chapter 14 provides methods for forecasting demand for healthcare on a region-wide basis. Chapter 15 presents queueing theory as a method for modeling waits in healthcare, and Chapter 16 focuses on rapid delivery of medication in the event of a catastrophic event. Section 5 focuses on achieving change. Chapter 17 provides a diagnostic for assessing the state of a hospital and using the state assessment to select improvement strategies. Chapter 18 demonstrates the importance of optimizing care as patients transition from one care setting to the next. Chapter 19 is new and shows how to implement programs that improve patient satisfaction while also improving flow. Chapter 20 illustrates how to evaluate the overall portfolio of patient diagnostic groups to guide system changes, and Chapter 21 provides project management tools to guide the execution of patient flow projects.

In this book, first published in 1990, the authors have provided a scholarly treatment of the body of training literature between 1980 and 1988 that can be used by practitioners. They have drawn from as many different sources as possible and have tried to maintain a balance between popular and academic literature. This title will also be of interest to students of business studies and human resource management.
