This book elaborates on the rules governing the prosecution and sentencing of multi-offenders. The term 'multi-offender' is used for an offender that has committed a series of offences (either in one single act or in different acts); hence the addition of 'multi' in 'multi-offender'. A crucial element thereto is that the whole series of offences – which make the offender a multi-offender – has been committed before being subject to a final conviction. A comparative EU-study was conducted, focussing on the rules governing multi-offenders within different EU Member States. It reveals that this type of offenders challenge both the legislator and the prosecution and judges: when the offences are prosecuted in one go, the challenges are linked to finding an appropriate way to assess

the severity of the criminal behaviour; if however the offences are prosecuted in several simultaneous or consecutive proceedings, the challenges are linked to taking account of the simultaneous or past proceeding. These challenges only grow if proceedings take place in different EU Member States. The analysis presented in this book is essential reading for EU policy makers, national policy makers, academics and defence lawyers throughout the EU working with multi-offenders. Undoubtedly, it will be an asset to their work in both mere national as well as in cross-border cases.

Following on from the earlier edited collection, *Loss of Control and Diminished Responsibility*, this book is the first volume in the *Substantive Issues in Criminal Law* series. It serves as a leading point of reference in the area relating to participation in crime and identifies the need for a consistent approach to the doctrinal and theoretical underpinnings of complicity liability. With a section on the UK analysing points of current interest, the book also has a large comparative section dealing with foreign jurisdictions and examines on the basis of a unified research grid how different legal systems treat core issues of participation in the context of criminal law. This book is a valuable reference resource for those in the criminal justice community in the UK and abroad and for academics, the judiciary and policy-makers. As attention moves rapidly towards comparative approaches, the research and teaching of company law has somehow lagged behind. The overall purpose of this book is therefore to fill a gap in the literature by identifying whether conceptual differences between countries exist. Rather than concentrate on whether the institutional structure of the corporation varies across jurisdictions, the objective of this book will be pursued by focusing on specific cases and how different countries might treat each of these cases. The book also has a public policy dimension, because the existence or absence of differences may lead to the question of whether formal harmonisation of company law is necessary. The book covers 10 legal systems. With respect to countries of the European Union, it focuses on the most populous countries (Germany, France, the UK, Spain, Italy and Poland) as well as two smaller Member States (Finland and Latvia). In addition, the laws of two of the world's largest economies (the US and Japan) are included for the purposes of wider comparison. All of these jurisdictions are subjected to scrutiny by deploying a comparative case-based study. On the basis of these case solutions, various conclusions are reached, some of which challenge established orthodoxies in the field of comparative company law.
