The Eurozone crisis and the age of austerity, as well as challenges to the environment as a result of economic growth have highlighted the need for a greater understanding of those facets of economics that are of most use to businesses and their decision makers. This book introduces all of the relevant theoretical aspects of the subject and applies them to real-life examples of economics that are of particular interest to students today, including: the impact of globalization; the way in which "green" perspectives can be built into decision making and how the financial crisis has challenged economists, politicians and business people to rethink their existing ideas. Replete with illuminating case studies, and benefitting from features such as activities, review questions and further reading, Business Economics introduces the theory and practice of economics for non-specialist students new to the topic.

In order to effectively solve business problems, managers need to understand how managerial accounting can improve decision-making. This book lays the groundwork by presenting managerial accounting in a strategic framework. Each module examines cost estimation and planning decisions in both the short- and long-term context. Budgets are then discussed as devices that connect planning and control decisions. Within each chapter, a specific decision problem is framed in a four-step manner. Throughout the pages, Chapter Connections ties the decision problems to concepts in earlier chapters. End-of-chapter material also provides a good balance of quantitative and qualitative problems. This approach enables managers to learn the linkages among seemingly unrelated decisions.

Eldeburg's fourth edition of Management Accounting combines the basic technical issues associated with cost management, management accounting and control with more recent and emerging themes and issues. Management accounting is a compulsory element of the accounting major, and this text is written to cover the content typically taught in the two management accounting units offered in most accounting programs. The Management Accounting interactive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes case videos, interactive problems and questions with immediate feedback. Eldeburg's unique resource can also form the basis of a blended learning solution for lecturers.

Managing Financial Resources aims to explain the principles involved in the management of financial resources. It aims to provide practicing non-financial managers with an understanding of the terms and techniques of accountancy so they may communicate more easily with and understand financial reports issued by their more accounting-aware colleagues. The book concentrates on one type of financial information—management accountancy—but draws together concepts from systems analysis, organizational behavior, marketing, and other distinct disciplines to reflect the rich variety which is involved in the management of any limited resource within large organizations. Key topics discussed include published accounting statements; management decision-making, planning, and control; short- and long-term decision making in organizations; pricing decisions; and performance measurement and transfer pricing issues within divisionalized organizations. Each chapter includes problems and discussion topics ranging from open-ended case studies to problems with particular numerical answers. Suggested answers are offered at the back of the book.

For prospective and existing "high-growth" entrepreneurs and students. "A company's finances dictate success or failure" There are plenty of books on entrepreneurial finance with exhaustive scope and coverage however the basics understanding of information related to the management of COST, RISK, and CONTROL for accessing and evaluating the impact of entrepreneurial financial decisions is missing. This book is the first of its kind that examines and explains entrepreneurial financial decisions from these perspectives and aims to bridge the gap by specifically addressing and developing the financial understanding for effective management of financial resources. This book will help prospective and existing "high-growth" entrepreneurs who are not financially literate in developing a conceptual understanding of the fundamentals of financial decisions and enable them to better manage their financial resources and create economic value.

MANAGEMENT AND COST ACCOUNTING**Management Accounting**

This textbook presents concepts and applications of Management Accounting, one of the main approaches used by management to support future organisational performance. It covers methods and instruments of management and cost accounting, cost management, and management control and is based on the German textbook "Interne Unternehmensrechnung" by Ralf Ewert and Alfred Wagenhofer (Springer). The authors describe the managerial uses of accounting information, both for decision-making and decision-influencing, and provide a broad perspective on the subject combining the academic foundations of the field with recent cutting-edge research results. Moreover, traditions of German accounting theory and practice that are little known outside of the German-speaking countries are reflected in the book. With its unique approach based on information economics, the textbook offers a comprehensive and innovative presentation to a global audience.

Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Practical Management for the Digital Age is an innovative introductory management textbook that shows the sweeping impact of information technology on the business world. At the same time, it addresses the pressing issue of how environmental aspects are interwoven with management decisions. This book forms an academically rigorous, accurate, and accessible first exposure to a topic that often challenges novices with competing definitions, inconsistent use of terminology, methodological variety, and conceptual fuzziness. It has been written for readers with little or no prior knowledge of management and is compact enough to be read cover-to-cover over the course of a semester. Features of this book: Provides a broad, self-contained treatment of management for those without prior knowledge of management or commerce, emphasizing core ideas that every manager should know. Establishes the context of modern management by characterizing the nature of the private enterprise, the economic theory of the firm, the economics of digitalization and automation, processes of innovation, and life cycle thinking. Introduces readers to various activities of managing, including business modeling, new business formation, operations management, managing people, marketing, and the management of quality and risk. Provides practical introductions to broadly applied management techniques, including financial planning, financial analysis, evaluating flows of money, and planning and monitoring projects. This book is aimed at a wide range of undergraduate and postgraduate students in a variety of disciplines, as well as practitioners. It will be especially useful to those in the fields of engineering, science, computer science, medicine, pharmacy, social sciences, and more. It will help student readers engage confidently with project work in the final parts of their degree courses and, most importantly, with managerial situations later in their careers. For instructors, who may not have a management background, this book offers content for a self-contained year-long course in management at the intermediate undergraduate level. In addition, it has been developed for undergraduate and postgraduate courses with accreditation requirements that include a taught element in management, such as the UK Engineering Council's Accreditation of Higher Education (AHEP) framework.

Cost Accounting with Integrated Data Analytics takes the approach that you need to reach students in order to engage and effectively teach them to make meaning of costing concepts. Through storytelling, students develop a deeper understanding of cost accounting fundamentals, allowing them to apply their knowledge to modern business scenarios and develop the competencies and decision-making skills needed to become the future accounting professional. Throughout Cost Accounting, students also work through a variety of data analysis applications that allow them to develop their decision-making skills within real-world contexts. Through assignments and integrated cases that leverage market-leading technology, students learn how to make informed business decisions and think critically about data.

Management Accounting: Principles & Practice, 3rd Edition

An Introduction for Engineers, Scientists, and Other Disciplines

Many corporate managers struggle to see the relevance of accounting in their everyday responsibilities. Weygandt shows them how managerial accounting information fits in the larger context of business so they are better able to understand the important concepts. The new Do It! feature reinforces the basics by providing quick-hitting examples of brief exercises. The chapters also incorporate the All About You (AAY) feature as well as the Accounting Across the Organization (AAO) boxes that highlight the impact of accounting concepts. With these features, readers will have numerous opportunities to think about what they have just read and then apply that knowledge to sample problems.

Managing Financial Resources addresses the complicated issues of financial planning and control. These include performance measures and cost analysis, methods of improving profitability and techniques of financial monitoring and control. Real examples and case studies are used throughout to illustrate points in a practical context. All chapters have been updated and new material has been added to extend the original text in areas such as public sector management issues, audit commission, capital investment decisions, stakeholder analysis for published reports and accounts, performance measurement, outsourcing, new developments in the public sector and transfer pricing. This book is based on the Management Charter Initiative's Occupational Standards for Management NVQs and SVQs at level 4. It is particularly suitable for managers on the Diploma in Management or part 1 of the Postgraduate Diploma, especially those accredited by the Chartered Management Institute and Edexcel but this also a useful text for practicing managers and those individuals studying for a MBA.

The book starts with a comparison of financial accounting and management accounting - both discussed based on the production firm PENOR Ltd. It further demonstrates accounting work in support of general management (CVP-analysis, DOL, performance measurement, risk management and M&A) as well as cost accounting (structures for absorption and marginal cost accounting systems, internal cost allocations, reporting, monitoring, manufacturing accounting/calculation, contribution margin accounting and activity based costing). The content is explained by detailed case studies. This Asia edition also includes real case studies about companies in Malaysia. All chapters outline the learning objectives, provide an overview, include case studies and how-it-is-done-paragraphs. They end with a summary, the explanation of new technical terms and a question bank with solutions for checking your learning progress. On the internet, you can find more than 300 exam tasks with solutions as well as youtube-videos from the authors.

Written by and for nurses, this key foundational text helps to build the fundamental economics and financial management skills nurses and nurse leaders need for daily use. This third edition delivers several new features, adding to its value as the only timely and relevant text written for the full spectrum of RN-to-BSN, BSN, and MSN students. It has been significantly revised to simplify content, to address the vast changes in and increasing complexity of U.S. health care financing, and to be useful in both traditional in-class format and hybrid and online programs. Two new and refocused chapters address assessing financial health and nurse entrepreneurship and practice management, and new material illuminates recent research findings and statistics. Chapters feature worksheets such as business plan checklists and text boxes expanding on key chapter content. The book is distinguished by its provision of case examples based on nurse-run clinic and inpatient nursing unit financial issues. It provides multiple opportunities for experiential learning, such as writing business plans and health program grant proposals. It delivers cost-benefit and cost-effectiveness analyses, discusses budget preparation, offers strategies for controlling budget costs, and updates relevant health policies and statistics. The text's engaging format promotes the synthesis of economics and finance across the nursing curriculum through the use of end-of-chapter exercises, discussion questions, and games based on concepts within the text. Additionally, tips throughout the book alert students about the need to apply concepts from other aspects of their education to economic and financial situations. Also included are online supplemental materials for teachers and students, including Excel spreadsheets, grant proposals, a test bank, and PowerPoint slides. New to the Third Edition: Updates health reform, health care spending, and other relevant policies and statistics Includes two new and refocused chapters that address assessing the financial health of a business and nurse entrepreneurship and practice management Highlights recent research findings and key concepts in text boxes Provides blank and completed worksheets, such as business plan checklists, so nurses can apply financial concepts in their clinical settings Fosters understanding of key concepts with enhanced explanations and samples of business plans and other reports Key Features: Aligned with AACN and ACONE guidelines, the CNL certification exam, and QSEN competencies Serves as a primary financial management text for multiple nursing academic programs Facilitates experiential learning through end-of-chapter exercises, games, tips for synthesizing knowledge, worksheets, and case examples Designed for use in traditional classrooms and in hybrid and online learning programs Includes a chapter on measuring nursing care with indicators for capacity, staffing, patient acuity, performance, and patient flow NEW! a FREE Q&A App is available!
