The field of oncology benefits from several large-scale reference books and a host of monographs dedicated to specific cancers. However, truly excellent practice and review books are, surprisingly, quite scarce. Outside of a scant handful of books and online reference tools that offer clinical response practice and board review in a basic question and answer format, there are no resources that offer a robust, engaging, fully referenced tool for these vital activities in every oncologist's and oncology trainee's work. This print and electronic book seeks to fill that void, offering comprehensive question-and-answer style content that covers the entire specialty of oncology and provides practicing oncologists with a fascinating and immediately applicable compendium of vital information dealing with a well-balanced selection of common and uncommon cancers. At the heart of this book is the editor's and authors' desire to overcome the controversies and barriers to practice that usually emerge following the appearance of new data. In every section, the user is guided toward collaboration in ongoing clinical research – for example, via discussions of well-designed ongoing clinical trials in each specific area. Developed with both the teacher and learner in mind, this book also offers trainees and fellows an excellent opportunity to enhance their preparation for the ABIM oncology fellowship exam as well as for the oncology boards. It will also be an extremely useful tool for oncologists working toward the recertification exam. This comprehensive, beefy book includes hundreds of painstakingly developed multiple-choice and mini-case-based questions covering the principles of medical oncology, malignant hematology, surgical oncology, and radiation oncology. It also contains mini-cases and questions dealing with the biology, diagnosis, classification, staging, and multidisciplinary treatment of cancers at every anatomic site. The very latest topics are included, such as molecular techniques, targeted therapies, and translational cancer research. Concise but detailed answers are referenced to key journals and books, and evidence-based wherever possible. NCCN guidelines are also referenced as appropriate. With its powerful focus on take-home messages from and for actual clinical work,

this book will help keep oncologists up to date, bridging the gaps between journal and reference literature, conferences, and their existing knowledge base.

Given the degree of popular fascination with Gnostic religions, it is surprising how few pay attention to the one such religion that has survived from antiquity until the present day: Mandaeism. Mandaeans, who esteem John the Baptist as the most famous adherent to their religion, have in our time found themselves driven from their historic homelands by war and oppression. Today, they are a community in crisis, but they provide us with unparalleled access to a library of ancient Gnostic scriptures, as part of the living tradition that has sustained them across the centuries. Gnostic texts such as these have caught popular interest in recent times, as traditional assumptions about the original forms and cultural contexts of related religious traditions, such as Judaism, Christianity, and Islam, have been called into question. However, we can learn only so much from texts in isolation from their own contexts. Mandaean literature uniquely allows us not only to increase our knowledge about Gnosticism, and by extension all these other religions, but also to observe the relationship between Gnostic texts, rituals, beliefs, and living practices, both historically and in the present day.

The new commentaries continue this tradition. All new evidence now available is incorporated and new methods of study are applied. The authors are of the highest international standing. One man's quest to rectify the mistakes he is convinced were made by history's most famous prophet, Jesus. "Are you secure in your beliefs? Whatever your answer might be, you should read this book... This book qualifies as an excellent debut novel on so many levels. Firstly, it tells a cracking story of one confused and increasingly delusional man's journey through life, land and time. It depicts, in a highly fictional yet worryingly prophetic way, how destructively the influence of religion can effect not just the perspective of a single individual, but the development of an entire belief system. Secondly it questions the origins, validity, theory, authenticity, and general principles of modern belief systems, in an often scathing but always genuinely inquisitive way. A way, nevertheless, that some will find fascinating, while others, more orthodox religious practitioners, might find unacceptable. But keep reading, there are many twists and turns in the story. I have been lucky enough to read the second instalment of the story, which is not yet available to the public, but I can assure you takes the story to a conclusion that's worth the wait. (I must add that this first book is a complete story in itself.) Thirdly, the story leads the main character to develop a theory which daringly suggests a complete alternative to the religiously accepted concept of 'God', or divine being. One that will ruffle the feathers of believers and non-believers alike. Ultimately, the book is just a novel and I enjoyed it as a story. But as a committed atheist, I found myself doing the one thing I never thought I would... considering the possible existence of divine spirituality. Many will scoff, many will take umbrage, many will have their religious commitment undermined, others will be thrown into confusion, but no one will read this book without re-examining their attitude towards modern religion, God, and spirituality. The question that matters is - No matter what your religious convictions are, are they strong enough to read this book?"
