A book on Mathematics

George Orwell's Nineteen Eighty-Four is unquestionably the most famous dystopian novel of all times. Written in the year of 1948, the author swapped the last two digits while describing a future totalitarian society where the minds, attitudes and actions of the subjects are thoroughly scrutinized by the "Thought Police", suspected dissidents tracked down and where the worship of the mythical party leader Big Brother is forced upon the masses. The low-ranking party member Winston Smith begins secretly to question the whole system and initiates a forbidden love affair with another party member.

Well for starters, avocado is a fruit that is pear shaped in appearance. If you’re into fruits and veggies and believe in natural ways of living an ailment free life, then this book is all you need. Even if you don’t like fruits, you should still know about this one. Being a nutritionist, I would crown this fruit as the “king of all fruits” because of its nutritional value and health benefits. The interesting thing is that all these benefits come with no side effects, which are quite frequent with the advertised pills and supplements. In our daily life we give value to things that are ready to eat or things that we can eat on the go. No wonder diseases like heart attack, high blood pressure, arthritis and obesity are so common in western lifestyle. Yes, I called obesity a disease. To you obesity might only mean having socially unacceptable outlook, but medicine people would tell you that obesity is the harbinger of countless diseases. The cure and control of all these things comes with one single fruit. Yes, you guessed it right. It’s avocado that promises you not only a healthy outlook but also a healthy inside too. Above all, the taste of this fruit is something that would surely tickle your taste buds. This book has been divided into four sections. The first section will inform you about avocado and tell you what it is, its history and its nutritional value. The second section of the book is about the health benefits of avocado. With Mina’s uncanny ability and her master’s magical strength, the beast responsible for her misery will fall ... even if she has to take matters into her own hands. Okonkwo is the greatest warrior alive, famous throughout West Africa. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. Chinua Achebe's stark novel reshaped both African and world literature. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in Arrow of God and No Longer at Ease.

This book aims to explain to the readers the basic idea of the general equilibrium theory, which forms the core of the current mainstream economics called neoclassical school. To understand this theory is absolutely necessary, either to study further or to criticize the contemporary economic theories. The author not only explains traditional theories, but also makes clear the many problems which are still unsolved. As a text book or reference book for those students who are studying microeconomics for the first time, the author recommends the use of Chapter 1, Chapter 2 (except section 9), Chapter 3 (from section 1 to section 3, section 6, section 11), Chapter 4 (from section 1 to section 4), Chapter 5 (from section 1 to section 5, section 8), Chapter 6 (except sections 6 and 7), Chapter 7 (from section 1 to section 5), Chapter 8 (from section 1 to section 6) and Chapter 9 (sections 1, 4 and 7). For more advanced readers, the author recommends the remaining sections and the literature recommended in the last part of each chapter. Problems given at the end of each chapter allow readers to confirm understanding of the content of the chapter and suggest to the readers more advanced studies. Incidentally, the author tried to avoid the use of the advanced mathematics. Only elementary knowledge of differential calculus and linear algebra are required to read this book.

For use in schools and libraries only. Macon Dead, Jr., called Milkman, son of the richest Negro in town, moves from childhood into early manhood, searching, among the disparate, mysterious members of his family, for his life and reality.

Herodotus was an ancient Greek historian who lived in the fifth century BC (c.484 - 425 BC). He has been called the "Father of History", and was the first historian known to collect his materials systematically, test their accuracy to a certain extent and arrange them in a well-constructed and vivid narrative. The Histories-his masterpiece and the only work he is known to have produced-is a record of his "inquiry", being an investigation of the origins of the Greco-Persian Wars and including a wealth of geographical and ethnographical information. The Histories, were divided into nine books, named after the nine Muses: the "Muse of History", Clio, representing the first book, then Euterpe, Thaleia, Melpomene, Terpsichore, Erato, Polymnia, Ourania and Calliope for books 2 to 9, respectively.

Chapter 7. Mechanical Working of Aluminum–Lithium Alloys

Digital Forensics for Legal Professionals

Elements of Neo-Walrasian Economics

**Mechanical working of Al–Li alloys is primarily concerned with aerospace alloy rolled products (sheet and plate), extrusions, and to a lesser extent forgings. These products are fabricated by hot working with intermittent and final heat treatments. This thermomechanical processing (TMP) can be rather complex for the modern 3rd generation Al-Li alloys, but is necessary to obtain optimum combinations of properties. This Chapter is in two parts. Part 1 discusses the ‘workability’ of metals and alloys and the hot deformation characteristics of Al–Li alloys, leading to the concept of Process Maps. A comprehensive Process Map for a binary Al–Li alloy illustrates the usefulness of these Maps for defining temperature–strain rate regions for safe and unsafe hot working, recrystallization and recovery, and superplastic behaviour Part 2 provides some general considerations about processing Al–Li alloy products, followed by a review and discussion of the currently available information for 3rd generation alloys. It is concluded that their complex TMP schedules may make it difficult to obtain optimum combinations of properties for thicker products.**
