Over the past twenty years the American Catholic bishops have played a leading role

in the antiabortion movement, published lengthy and highly detailed pastoral letters on nuclear weapons and on the American economy, and involved themselves, collectively and individually, in several national election campaigns. What is the source of the sometimes controversial political role of these religious leaders? Timothy Byrnes proposes a new answer in this lucid description of the National Conference of Catholic Bishops and its activities. He demonstrates that the key to the political role of the bishops and other modern American religious leaders has been political change, rather than religious revival. Originally published in 1991. Over the last decade, and even since the bursting of the technology bubble, pundits, consultants, and thought leaders have argued that information technology provides the edge necessary for business success. IT expert Nicholas G. Carr offers a radically different

view in this eloquent and explosive book. As IT's power and presence have grown, he argues, its strategic relevance has actually decreased. IT has been transformed from a source of advantage into a commoditized "cost of doing business"--with huge implications for business management. Expanding on Carr's seminal Harvard Business Review article that generated a storm of controversy, *Does IT Matter?* provides a truly compelling--and unsettling--account of IT's changing business role and its leveling influence on competition. Through astute analysis of historical and contemporary examples, Carr shows that the evolution of IT closely parallels that of earlier technologies such as railroads and electric power. He goes on to lay out a new agenda for IT management, stressing cost control and risk management over innovation and investment. And he examines the broader implications for business strategy and organization as well as for the technology industry. A frame-changing statement on one of the most important business phenomena of our time, *Does IT Matter?* marks a crucial milepost in the debate about IT's future. An acclaimed business writer and thinker, Nicholas G. Carr is a former executive editor of the Harvard Business Review.

Longtime Myers collaborator Richard Straub provides an updated study guide for the new edition.

We live in an era when most litigation parties never see the inside of a courtroom. Cases are resolved by motion practice, by informal settlement, or by formal procedures such as arbitration and mediation. Rarely does an attorney get to say, "Ladies and gentlemen of the jury" Does this change render deposition practice obsolete? Quite the opposite—depositions are more important than ever. Instead of a battle between attorneys who are trying to hide their evidence for trial, depositions are the place to put your best case forward, establish your case theories, explore the strengths and weaknesses of your case, and prepare your disposition strategy, be it a motion for summary judgment, a settlement offer, or mediation. Taking effective depositions in this changed environment involves a new paradigm, a whole new way of thinking about the discovery process. This book will guide you through that

process, from interviewing and preparing your client through theory building and expert testimony. It also deals with concrete issues like creating a clean, understandable deposition record that will benefit your case throughout the litigation process. With its Q&A format and its many examples, *The Deposition Tutorial* will become the book you want on your desk for quick reference.

'Twas battered and scarred, and the auctioneer
Thought it scarcely worth his while
To waste much time on the old violin,
But he held it up with a smile.
"What am I bidden, good folk?" he cried,
"Who'll start the bidding for me? "A
dollar—a dollar—then two, only two—
"Two dollars, and who'll make it three?
"Going for three"—but no—
From the room far back, a gray-haired man
Came forward and picked up the bow,
Then, wiping the dust from the old violin,
And tightening the loosened strings,
He played a melody pure and sweet
As a caroling angel sings.
The music ceased, and the auctioneer,
With a voice that was quiet and low,
Said, "Now what am I bid for the old violin?"
And he held it up with the bow.
"A thousand dollars—and who'll make it two?
"Two thousand—and who'll make it three?
"Three thousand once—three thousand twice—
"And going—and gone," cried he.
The people cheered, but some of them cried, "We do

And many a man with life out of tune, And battered and scarred with sin, Is auctioned cheap, to a thoughtless crowd, Much like the old violin. A "mess of pottage"—a glass of wine, A game—and he travels on: He is going once—and going twice— He's going—and almost gone! But the Master comes, and the foolish crowd Never can quite understand The worth of a soul and the change that's wrought By the touch of the Master's hand. By Myra Brooks

The Master's hand is the only hand that can transform the soul. This very moment the Lord Jesus Christ is waiting to turn your darkness into day, your sorrow into joy. Hear His call: "Come now, and let us reason together... though your sins be as scarlet, they shall be as white as snow" (Isaiah 1:18). Have more wonderful words ever been spoken? God wants to cleanse your life from sin and give you a new life of hope and joy. He does not ask you to change your life yourself. He asks you to come to Him just as you are. His Word promises: "The blood of Jesus Christ His Son cleanseth us from all sin" (1 John 1:7). But first you must trust totally upon God's mercy. You cannot depend on your "good works" to gain entrance into Heaven. For before God we are all sinners. "There is none righteous,

no, not one... For all have sinned, and come short of the glory of God" (Romans 3:10, 23). There is only one way, one door through which we can enter the Kingdom of Heaven. Jesus said: "I am the door: by Me if any man enter in, he shall be saved" (John 10:9). Jesus made the way for you and me by dying on the cross for our sins: "He was bruised for our iniquities: the chastisement of our peace was upon Him; and with His stripes we are healed" (Isaiah 53:5). You can receive the risen, victorious Lord Jesus Christ by faith now. Why hold back any longer? Come to the Master today.

This nine-chapter book narrates a writing-centered approach to the teaching of literature and literary research. As the title suggests, the book also embraces a thematic approach to reading and writing about twentieth-century American literature, focusing on the grounds for hope in an age of despair. The first five chapters explore in detail the teaching of the twentieth-century American literature course at the University of Pristina in Kosovo, where the author served as Fulbright Professor of American Literature in the spring semester of

2012. Throughout, these chapters narrate students' in-class interactions to illustrate writing-to-learn strategies for teaching the literature. Chapter six then follows the same cohort of 22 students as they learned to ground their literary research in their own questions about American and Balkans narratives of oppression and liberty, of despair and hope. The last three chapters document the responses of students and their professors to this American theme of liberty and hope as seen through the Balkans lenses of ethnic violence and emerging republican government. Specifically, chapter seven focuses on students' participation in a blog featuring Balkans literature that explores the same issues of liberty and justice examined in the American literature they have read. Chapter eight then celebrates student writing, the fruit of the writing-to-learn strategies narrated in earlier chapters. Finally, chapter nine narrates professors' and students' responses, gathered through surveys and interviewing, to questions about their

Politics, Literature, Science and Art

R is for Revolution begins by examining the writings of Machiavelli, Erasmus of Rotterdam, and Sir Thomas More. It explores how Guttenberg's perfection of moveable-type printing, combined with textual analysis led to the Protestant Reformation. Chapter Two discusses how, after Christianity became the official religion of the empire, the Church "lost its way" and became "worldly." It examines the precursors of Protestantism and discusses the tenants of Protestantism. It ends with a discussion of Luther and Calvin. Chapter three begins with a review of English history from the time of the Romans to the reign of the Stuarts. Following that, comes the story of the Civil War. This necessitates rehearsing the history of the English constitution and Parliament. The chapter ends with a discussion of Hobbes and Locke. The American Revolution treats the colonies' dispute with Parliament as a recapitulation of Parliament's struggle with the Stuarts. The chapter begins with an examination of Anglo-Colonial economic

relations. It then reviews the milestones on the road to Independence; paying special attention to Thomas Paine. After reviewing the military aspects of the American Revolution, the chapter concludes with a discussion of the writing and adoption of the U.S. Constitution. The story of the French Revolution is told against the back-drop of England's Civil War and the American Revolution. The chapter discusses the French Enlightenment and examines what transpired between the time Louis XVI summoned the Estates General and Napoleon made himself emperor. Chapter Six discusses Mercantilism and the Physiocrats; it then examines the writings of Adam Smith, Thomas Malthus and David Ricardo. It discusses the Labor theory of Value, the Iron law of Wages, and the Theory of Surplus Value. The chapter ends with a look at utopian and scientific socialism. Chapter Seven studies the ancien regime's attempt to restore the status quo antebellum following Napoleon's defeat. Topics discussed include: Prince Metternich and the Congress of Vienna; Tsar Alexander and the Holy Alliance; the Bourbon Restoration, and the July Revolution. Special attention is paid to Metternich's efforts to suppress Nationalism in Europe, and how his efforts

resulted in a series of unsuccessful revolts known as the Springtime of the Peoples. Chapter eight examines how England avoided revolution by prudently reforming its institutions. It examines the effects of the Industrial Revolution, the effort to reform Parliament, and the campaign to repeal the Corn Laws; it ends with a discussion of Utilitarianism and the Chartist Movement. The Russian Revolution shows what happens when reform is thwarted. It begins with Alexander I, and ends with the conclusion of the Russian Civil War. In between, it discusses the Intelligencia, the Narodniks, and the Nihilists. C is for Counter-Revolution attempts to answer the question, "How did it happen?" That is, "How did it come about that the forces of tyranny triumphed over the forces of democracy in 1930s Germany. To answer that question, the chapter looks at the failures of the Weimar Republic, the ideology of fascism and National Socialism, and the political career of Adolf Hitler. The Chinese Revolution tells the story of how the Qing dynasty failed to retain the Mandate of Heaven and how a handful of Chinese visionaries undertook the task of turning China a modern nation. Enroute, such events as the Opium Wars,

the Taiping Rebellion and Boxer Rebellion are discussed. Special attention is paid to Mao's struggle with the "Bolsheviks" and his Sinification of Marxism. The chapter concludes by telling how the Sino-Japanese War morphed in the C.B.I. theater of operations and how,, in spite of having U.S. backing, Chiang Kai-shek, blew it all and lost the Civil War to the Communists.

Originally published in 2002, State Governments and Research Universities focuses on differences in unrestricted state appropriations for Carnegie Public Research I Universities during the 1990s. Through statistical analyses and case studies, a framework is developed that illuminates the impact of higher education governance, institutional characteristics, and economic, demographic, political, and cultural factors as critical elements determining levels of state appropriations for public research universities. The framework is strengthened through an application of organization theories from rational, political, and cultural perspectives. Among its most valuable contributions, the study places empirical evidence behind the assertion that future state support for research universities will be contingent on an institution's ability to demonstrate its service to the state. Faith on Trial explains how the Supreme Court's reliance on "procedural liberalism" hampers its ability to adequately address the reality of religion as a pluralistic social institution.

Citizens have lost trust in their institutions of public governance. In trying to fix the problem, presidents and prime ministers have misdiagnosed the patient, failing to recognize that government bureaucracies are inseparable from political institutions. As a result,

career officials have become adroit at managing the blame game but much less so at embracing change. Donald Savoie looks to the United States, Great Britain, France, and Canada to assess two of the most important challenges confronting governments throughout the Western world: the concentration of political power and the changing role of government bureaucracy. The four countries have distinct institutions shaped by distinct histories, but what they have in common is a professional non-partisan civil service. When presidents and prime ministers decide to expand their personal authority, national institutions must adjust while bureaucracies grow to fill the gap, paradoxically further constricting government efficacy. The side effects are universal - political power is increasingly centralized; Parliament, Congress, and the National Assembly have been weakened; Cabinet has lost standing; political parties have been debased; and civil services have been knocked off their moorings. Reduced responsibility and increased transparency make civil servants slow to take risks and politicians quick to point fingers. Government astutely diagnoses the problem of declining trust in government: presidents and prime ministers have failed to see that efficacy in government is tied to well-performing institutions.

Structuring the Thesis

This book gives a complete guide to carrying out and completing a project or dissertation which has a leadership or management focus. It is written in accessible, jargon-free language and provides practical advice in all the relevant areas of research and its reporting. The authors provide case examples of students' work from a range of contexts. They give guidance on what pitfalls to avoid, and show clearly how to structure the project, write a literature review, present personal research findings, as well as how to understand different kinds of research, assessment, and maximising tutorial support. The book is essential for Masters' students - and their tutors - in fields such as education or business studies, giving a clear step-by-step approach to doing the fieldwork and writing up the outcomes, including how to make conclusions and recommendations. It provides a comprehensive resource to ensure success in leadership and management projects and dissertations. DAVID

He is currently the director of external relations at the Institute of Education at the University.

Get The Job! focuses on the critical part of job hunting - the interview. It discusses questions, answers and approaches to help applicants look smart and get the job! It's for my students and every student about to graduate from college.

The book is a collective investigation of the structuring of theses in education, the social sciences and other disciplines that commonly do not follow the standard procedures of the scientific method. To help research students design a structure for their own thesis and liberate their investigations from the constraints associated with the use of the conventional structure, it explains how the structures adopted were designed to suit the topic, methodology and

paradigm. It also provides a wide range of examples to draw upon, which suit a broad spectrum of theory, methodological approaches, research methods and paradigms. Additionally, by analyzing the methodologies and paradigms, and reviewing the methodological and paradigmatic spectrum, it offers a significant contribution to the way research is conceptualized. The book addresses a number of key questions faced by students, supervisors and examiners:

- Why do examiners often find it difficult to read work in non-scientific disciplines when theses are structured in accordance with the conventional scientific method?**
- Why do students in non-scientific disciplines struggle to write up the outcomes of their research in the conventional structure?**
- What alternative thesis structures can be devised to better suit the wide range of methods?**
- Which theories and paradigms are commonly followed in education and the social sciences and how do these perspectives influence the research process?**
- What methods, theories and paradigms are**

commonly adopted by education and social science students and what problems do these pose when students write their theses?

The authors of this timely book argue that a fundamentally complex problem—how to assess the knowledge of a child—cannot be reduced to a simple test score. Beyond Testing describes seven forms of assessment that are more effective than standardized test results: (1) student self-assessments, (2) direct teacher observations of students and their work, (3) descriptive reviews of the child, (4) reading and math interviews with children, (5) portfolios and public defense of student work, (6) school reviews and observations by outside professionals, and (7) school boards and town meetings. These assessments are more honest about what we can and cannot know about children's knowledge, skills, and dispositions, and are more adaptable to varying educational missions.
