

Charles V The World Emperor

The sack of Rome shocked the Christian world. Following the battle of Pavia, Pope Clement VII joined (1526) the French-led League of Cognac to resist the threatened Habsburg domination of Europe. Emperor Charles V appealed to the German diet for support and raised an army, which entered Italy in 1527 and joined the imperial forces from Milan, commanded by the Duke of Bourbon. This army marched on Rome, hoping to detach the pope from the league. The many Lutherans in its ranks boasted that they came with hemp halters to hang the cardinals and a silk one for the pope. Rome fell on 6 May 1527, Bourbon being killed in the first assault. Discipline collapsed, and the city was savagely pillaged for a week before some control was restored. Judith Hook's book is here reprinted with a foreward by Patrick Collinson. 'Charles V: Duty and Dynasty' explores the life of 16th century Europe's most influential (but not best known) monarch. Charles' inheritance from the leading dynasties of Europe has never been equalled - by the age of 20 he was Holy Roman Emperor, King of Spain (including its American colonies) and much of Italy, as well as ruler of the Low Countries of his birth. The book follows Charles' upbringing and education, his coming to power, his marriage and family life (made difficult by his almost constant travelling), and his dealings with individuals that loom large in history - Henry VIII, Medici popes, Martin Luther, Hernan Cortes, Titian. It investigates his

character and his fundamental beliefs - what drove him on, what influenced his momentous decisions, the apparent contradictions, and why he abdicated to spend his last years in a small Spanish monastery. It also introduces the great issues of the day - the challenge to the Catholic Church, how monarchs could finance their ever increasing expenditure, the changing nature of warfare, and in particular the relations between Charles and his rival monarchs - Francis I, Henry VIII and Suleiman. These may be characterised as a kaleidoscope of alliances - sometimes with laudable aims, often involving duplicitous agreements and frequently resulting in an open disregard for what had been signed. It should appeal to all who are interested in the 16th century, in the life of a complex individual, or keen to learn lessons from the past.

Charles V was elected Holy Roman Emperor and, until his death in 1558, he was to play a central role on the European political stage. The book is a clear introduction to the often confusing train of events in the first half of the sixteenth century. It looks at Charles's response to the Protestant Reformation in Germany; his efforts to retain the Netherlands under Habsburg control; his struggle with France for domination over Italy; and his attempts to check the expansion of Ottoman power in the Mediterranean.

The novel, which will evoke as many laughs as tears, begins in 1557 when a prematurely aged, ill, and very irritable Charles V, Holy Roman Emperor, (Carlos I of Spain and always known as Carlos), retires to a small isolated monastery in western Spain. He has brought with him memories of his past loves, his years in power, and his many military campaigns, most of them failures, and his delusions that his disastrous dynastic arranged marriages for all his family have been strokes of sheer genius. Among his few specially chosen companions is his outspoken major domo, who has been his lifelong aide and confidant. He knows Carlos better than Carlos knows himself and, uniquely, he is allowed total freedom to speak his mind, no matter what. The result is often very funny. With the other members of his household revealing tragicomic anecdotes from his past and the unremitting critical yet supposedly objective observations of an all-knowing narrator we see awarts and all picture of a ruler often called the greatest Holy Roman Emperor since Charlemagne. But was he? Or was he just a blustering, bumbling, egotistical, ultimately very humane, loving and lovable, ordinary, generous man; Barbara thought so.

The European Cultural Routes of the Emperor Charles V is one of the most significant routes to have been recognised by the European Council. Ruling over distant and strikingly

differing lands, Charles V of Hapsburg, the greatest European monarch of the first half of the 16th century, governed an empire that stretched from Holland and Germany to Spain and the Kingdom of Naples, in addition to his constantly growing America domains. The book, A New World. Emperor Charles V and the Beginnings of Globalisation, is an occasion to reflect upon how his reign impacted upon human development and how, through the rapid growth of communications and connectivity, we have ended up where we are now. The reign of Charles V was a major threshold in history that, along with images of the life and culture of the time, the papers in this book amply illustrate.

CORRESPONDENCE OF THE EMPEROR

Charles V, Emperor of Europe and the New World, is the central figure in the second volume of Hugh Thomas's great history of the Spanish Empire. It begins with the return of the remnants of Magellan's expedition around the world in 1522 and ends with Charles's death in 1558. In the decades between, the Spaniards conquer Guatemala, Yucatan, Columbia, Venezuela, Peru and Chile, and control the banks of the mighty River Plate; the audacious conquistador Francisco de Orellana journeys down the Amazon, Cabeza de Vaca walks from Florida to Mexico, Juan Vazquez Coronado pioneers into New Mexico and

Hernando de Soto vainly pursues worldly riches in Florida, Mississippi and Georgia. Hugh Thomas writes vividly, conveying the conquerors' almost disbelieving sense of what they were achieving. The discovery and subjugation of so many native peoples raised enormous controversy within Spain about how they should be treated, a debate Thomas explores perceptively, with an eye for resonances that have lasted centuries. Hugh Thomas brings alive one of the most extraordinary and influential moments in High Renaissance and world history.

The world of the first half of the sixteenth century was exceptionally dynamic. Voyages of discovery made the world larger; science and technology were revolutionized; Christian thought underwent a powerful renewal; the population and economy grew. And in the midst of this constellation of change, one man - the Emperor Charles V - ruled a conglomeration of territory more extensive than that previously held by any ruler in European history. What can one person, given an inordinate amount of power by quirk of fate, achieve? How much freedom did he in fact have? Did it help him reach his objectives? What unwanted results ensued from his actions? The relationship between the will of an individual and the power of structures in times of such mutability is at the core of Blockman's enquiry. He brings to the task a range of languages - without which it is scarcely possible to do justice to Charles's widespread, linguistically diverse imperium - a keen awareness of the most recent

findings in modern scholarship, and the fruits of a professional lifetime's reflection.

Why should we remember the reign of Charles V? What happened in those years that altered the course of history and helped to shape the world we live in today? Few ages have been more important to the history of Europe and America than the reign of Charles V. Charles ruled the first truly global empire, his sovereignty extending beyond Spain to the Netherlands, much of Italy, the Americas, and the Holy Roman Empire. His life saw the waning of the Renaissance, the religious transformation of Europe by the Protestant and Catholic Reformations, and the emergence of Spain as a leading international power. At the same time, the conquests of Mexico and Peru, the establishment of a Habsburg empire in eastern Europe, and a series of wars with France, the Ottoman Empire and the German Protestants transformed European politics and the global economy. William Maltby's engaging new study not only looks at Charles V as a person, but also examines important critical issues: the emperor's

policies and their consequences; the institutional, economic and intellectual development of his various realms; and his military and diplomatic struggles. Concise and readable, it provides students and the general reader with an indispensable introduction to a reign that defies historical comparison, and an era that changed the world.

This study examines a significant development within late medieval and early modern European government, set in the context of the tense relations between the young Emperor Charles V and his ageing chancellor Mercurino de Gattina. It focuses upon an important transformation in the administrative reorganisation of

European monarchies: the shift in the political centre of gravity from the medieval institution of the chancellery as the secretariat for all government business and authentication to a small group of secretaries, the minister of a later age, acting directly in collaboration with the prince. In the collision between the traditional judicial and administrative pre-eminence of the late medieval chancellor and the new secretaries as expeditors of the Renaissance prince's will. Charles gave his support to the latter, thus associating himself with the previous work of Ferdinand the Catholic.

Against the background of this struggle with the state secretaries the imperial chancellery is analysing in its relations to the individual chancelleries of Charles V's disparate lands.

The Empire of the Cities

“Bad behavior makes for entertaining history” in this bold history of Europe, the Middle East, and the men who ruled them in the early sixteenth century (Kirkus Reviews). John Julius Norwich—“the very model of a popular historian”—is acclaimed for his distinctive ability to weave together a fascinating narrative through vivid detail, colorful anecdotes, and captivating characters. Here, he explores four leaders—Henry VIII, Francis I, Charles V, and Suleiman—who led their countries during the Renaissance (The Wall Street Journal). Francis I of France was the personification of the Renaissance, and a highly influential patron of the arts and education. Henry VIII, who was not expected to inherit the throne but embraced the role with gusto, broke with the Roman Catholic Church and appointed himself head of the Church of England. Charles V was the most powerful man of the time, and unanimously elected Holy Roman Emperor. And Suleiman the Magnificent—who stood apart as a Muslim—brought the Ottoman Empire to its apogee of political, military, and economic power. These men collectively shaped the culture, religion, and politics of their respective domains. With remarkable erudition, John Julius Norwich offers “an important history, masterfully written,” indelibly depicting four dynamic characters and how their incredible achievements—and obsessions with one another—changed Europe forever (The Washington Times).

Charles V (1500-1558), King of Spain (1516-1556) and Holy Roman Emperor (1519-1556) is one of the most interesting and perplexing of the great European monarchs. The son of Philip the Handsome (son of the the Holy Roman Emperor Maximillian I) and Joanna the Mad (daughter of Ferdinand and Isabella of Spain), he became King of Spain at a time when the Valois and

Habsburgs were involved in bitter disputes over northern European territories. When he was elected Holy Roman Emperor and united to the old Habsburg lands the empire of Spain, it seemed that the family might well be on the way to the universal monarchy. of Charles V it may truthfully be said that he ruled an empire on which the sun never set. he set out with high aims and ideals but found himself overwhelmed. The demands of ruling over the greatest number of territories ever accumulated by any European ruler role and the seeming impossibility of achieving peace in Europe proved too great, and the disillusioned Emperor retired to the monastery of San Yuste, where legend has it his ghost continues to advise the Spanish monarchs. This book offers a chance to see Charles against the background of turmoil and unprecedented European expansion. It is an important study in ideas of kingship and dynasty, showing the last medieval emperor defending the ideals of Christian Christendom.

This study of the Spanish monarchy, bureaucracy and representative government under Charles V before and after the "comunero" revolt (1520-1521) demonstrates how the emperor and Castilian republics institutionalized management procedures that promoted accountability, advanced a meritocracy, and facilitated expansionism and domestic stability.

The definitive history of a powerful family dynasty who dominated Europe for centuries -- from their rise to power to their eventual downfall. In *The Habsburgs*, Martyn Rady tells the epic story of a dynasty and the world it built -- and then lost -- over nearly a

millennium. From modest origins, the Habsburgs gained control of the Holy Roman Empire in the fifteenth century. Then, in just a few decades, their possessions rapidly expanded to take in a large part of Europe, stretching from Hungary to Spain, and parts of the New World and the Far East. The Habsburgs continued to dominate Central Europe through the First World War. Historians often depict the Habsburgs as leaders of a ramshackle empire. But Rady reveals their enduring power, driven by the belief that they were destined to rule the world as defenders of the Roman Catholic Church, guarantors of peace, and patrons of learning. The Habsburgs is the definitive history of a remarkable dynasty that forever changed Europe and the world.

Drawing on vital new evidence, a top historian dramatically reinterprets the life and reign of Holy Roman Emperor Charles V, ruler of the world's first transatlantic empire

"Masterly."--William Anthony Hay, Wall Street Journal

"Seldom does one find a work of such profound scholarship delivered in such elegant and engaging prose. Drawing deftly on an astonishing volume of documentary evidence, Parker has produced a masterpiece: an epic, detailed and vivid life of this complex man and his impossibly large empire."--Susannah

Lipscomb, Financial Times Selected as a book of the year (2020) by Simon Sebag Montefiore in Aspects of History magazine The life of Emperor Charles V (1500-1558), ruler of Spain,

Germany, the Netherlands, and much of Italy and Central and South America, has long intrigued biographers. But the elusive nature of the man (despite an abundance of documentation), his relentless travel and the control of his own image, together with the complexity of governing the world's first transatlantic empire, complicate the task. Geoffrey Parker, one of the world's leading historians of early modern Europe, has examined the surviving written sources in Dutch, French, German, Italian, Latin, and Spanish, as well as visual and material evidence. He explores the crucial decisions that created and preserved this vast empire, analyzes Charles's achievements within the context of both personal and structural factors, and scrutinizes the

intimate details of the ruler's life for clues to his character and inclinations. The result is a unique biography that interrogates every dimension of Charles's reign and views the world through the emperor's own eyes.
