few of us are aware of the visual biases and behavioral patterns that influence our thinking when we 're on our laptops, iPads, smartphones, or smartwatches. The sheer volume of information and choices available online, combined with the ease of tapping "buy," often make for poor decision making on screens. In *The Smarter Screen*, behavioral economist Shlomo Benartzi reveals a tool kit of interventions for the digital age. Using engaging reader exercises and provocative case studies, Benartzi shows how digital designs can influence our decision making on screens in all sorts of surprising ways. For example:

- You 're more likely to add bacon to your pizza if you order online.
- If you read this book on a screen, you 're less likely to remember its content.
- You might buy an item just because it 's located in a screen hot spot,

defines each domain. The first domain provides information about risk analysis and mitigation, and it discusses security governance. The second domain discusses techniques of access control, which is the basis for all security disciplines. The third domain explains the concepts behind cryptography, which is a secure way of communicating that is understood only by certain recipients. Domain 5 discusses security system design, which is fundamental in operating the system and software security components. Domain 6 is one of the critical domains in the Common Body of Knowledge, the Business Continuity Planning and Disaster Recovery Planning. It is the final control against extreme events such as
